Vroom Vroom Garbage Truck Asia Citro,2018 A garbage truck goes through its daily routine of picking up garbage throughout the city and bringing it to the dump, in a book that explores the sounds a garbage truck makes.

Animals Go Vroom! Abi Cushman,2021-08-24 With a nod to Richard Scarry, this inventive picture book surprises readers with every turn of the page! Hiss! Screech! Roar! It's a noisy day in Bumperville! But are the sounds what you think they are? That Honk! must surely be a goose. But turn the page and it's the taxi that a goose is driving! Using cleverly placed die-cuts, this inventive book hints at what is making the sound, but with each turn of the page, it's an eye-opening surprise and part of an unfolding story that is part guessing game and part giggle-inducing caper. Abi Cushman is the master of surprise and silliness in this absolutely delightful picture book.

Soaked! Abi Cushman,2020-07-14 A Hula-Hooping moose, a badger with a bumblebee umbrella, a rabbit in a cashmere sweater, and a very wet bear star in this unpredictable and laugh-out-loud picture book in which having fun gets the best of a grumpy bear. It looks like a wet and dreary day for Bear and his trio of friends. How could he possibly have fun when he is soaked? But Badger, Rabbit, and Moose don't seem to mind. In fact, Moose can still hula hoop! And it looks like so much fun. Might Bear like to try? Here is a story that shows that fun is not dependent on sunshine and blue skies. In fact, it might be more fun to be soaked!

The Mouse and the Motorcycle Beverly Cleary,2009-10-06 In this imaginative adventure from Newbery Medal-winning author Beverly Cleary, a young mouse named Ralph is thrown into a world of excitement when a boy and his shiny toy motorcycle check in to the Mountain View Inn. And with a pal like Keith always looking out for him, there's nothing this little mouse can't handle. This timeless classic now features a foreword written by New York Times bestselling author Kate DiCamillo, as well as an exclusive interview with Beverly Cleary herself. *The Mouse and the Motorcycle* is perfect for independent reading or for shared reading at home or in a classroom. This fun story is the first of a trilogy, along with *Runaway Ralph* and *Ralph S. Mouse*, all inspired by the author's hope to create appealing books for boys and girls—and by the sight of her son playing with toy cars.

Management David Boddy,2005 'The language is highly accessible and this makes it particularly suitable for undergraduate and international students at all levels. The combination of extended case material, shorter cases and illustrations of management in practice makes for a varied and stimulating approach. The activities will encourage and enable students to work independently to develop both their knowledge and skills.' Abby Cathcart, Sunderland Business School, University of Sunderland 'I like the activities that explicitly ask for critical reflection and am sure that my students will benefit from the development of their critical thinking skills. The cases and examples in the book are helpful both because they come from a wide variety of national backgrounds and because companies like Ryanair and Nokia are familiar names!' Ad van Iterson, Organization and Strategy Department, Faculty of Economics and Business Administration, Maastricht University 'All the case studies are both relevant and appropriate: there is a wide spread of international examples and a striking variety of organisations throughout the chapters, which will undoubtedly enhance the students' learning process.' Paschal McNeill, Department of Business Administration, Quinn School of Business, University College Dublin What is 'management', and what activities and behaviour does it entail? How do ideas and theories of management apply to commercial enterprise and other areas of work? How is the environment of management changing, and what are the impacts of recent trends? *Management: An Introduction* addresses these and many other questions by providing a comprehensive account of the themes and functions of management. Aimed at the first-time student of the subject and written in a highly accessible style, this is an academically rigorous text which brings the topic to life with a wide range of appealing and readily identifiable examples. Among the most valuable features and aids to learning in the book are: Case studies on organisations as diverse as Ryanair, Vodafone/Ericsson and Oxfam, to provide relevant illustrations of theory in practice. Critical Reflections to encourage the application of personal experience and critical thinking to the issues in question. Skills Development Activities to build practical and work-based competences. Key Terms highlighted in the text and defined both at the margin and in a full Glossary. A companion website at www.pearsoned.co.uk/boddy provides tools for revision, such as self-assessment questions and flashcards, and for research, such as weblinks and case study updates. David Boddy is a Research Fellow at the School of Business and Management, University of Glasgow.

He is author of two other books published by Pearson Education: *Managing Information Systems: An Organisational Perspective* (2005), and *Managing Projects* (2002).

Born a Crime Trevor Noah,2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, *Time*), “poignant” (*Entertainment Weekly*), “soul-nourishing” (*USA Today*) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—*Esquire* Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by *The New York Times*, *USA Today*, *San Francisco Chronicle*, *NPR*, *Esquire*, *Newsday*, and *Booklist* Trevor Noah’s unlikely path from apartheid South Africa to the desk of *The Daily Show* began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother’s unconventional, unconditional love.

Grammar, Meaning, and Concepts Susan Strauss,Parastou Feiz,Xuehua Xiang,2018-05-11 *Grammar, Meaning, and Concepts: A Discourse-Based Approach to English Grammar* is a book for language teachers and learners that focuses on the meanings of grammatical constructions within discourse, rather than on language as structure governed by rigid rules. This text emphasizes the ways in which users of language construct meaning, express viewpoints, and depict imageries using the conceptual, meaning-filled categories that underlie all of grammar. Written by a team of authors with years of experience teaching grammar to future teachers of English, this book puts grammar in the context of real language and illustrates grammar in use through an abundance of authentic data examples. Each chapter also provides a variety of activities that focus on grammar, genre, discourse, and meaning, which can be used as they are or can be adapted for classroom practice. The activities are also designed to raise awareness about discourse, grammar, and meaning in all facets of everyday life, and can be used as springboards for upper high school, undergraduate, and graduate level research projects and inquiry-based grammatical analysis. *Grammar, Meaning, and Concepts* is an ideal textbook for those in the areas of teacher education, discourse analysis, applied linguistics, second language teaching, ESL, EFL, and communications who are looking to teach and learn grammar from a dynamic perspective.

Guesstimation 2.0 Lawrence Weinstein,2012-09-30 Simple and effective techniques for quickly estimating virtually anything *Guesstimation 2.0* reveals the simple and effective techniques needed to estimate virtually anything—quickly—and illustrates them using an eclectic array of problems. A stimulating follow-up to *Guesstimation*, this is the must-have book for anyone preparing for a job interview in technology or finance, where more and more leading businesses test applicants using estimation questions just like these. The ability to guesstimate on your feet is an essential skill to have in today's world, whether you're trying to distinguish between a billion-dollar subsidy and a trillion-dollar stimulus, a megawatt wind turbine and a gigawatt nuclear plant, or parts-per-million and parts-per-billion contaminants. Lawrence Weinstein begins with a concise tutorial on how to solve these kinds of order of magnitude problems, and then invites readers to have a go themselves. The book features dozens of problems along with helpful hints and easy-to-understand solutions. It also includes appendixes containing useful formulas and more. *Guesstimation 2.0* shows how to estimate everything from how closely you can orbit a neutron star without being pulled apart by gravity, to the fuel used to transport your food from the farm to the store, to the total length of all toilet paper used in the United States. It also enables readers to answer, once and for all, the most asked environmental question of our day: paper or plastic?
