*Letters and Letter Fragments* Jean de Pins,2007 Réunissant plus de cent trente lettres et fragments de lettres de la correspondance privée et diplomatique de l'humaniste toulousain Jean de Pins, Jan Pendergrass ouvre une perspective unique sur quelque quarante ans d'histoire française et européenne. Humaniste, juriste, diplomate et homme d'Eglise sous les règnes de Louis XII et François Ier, de Pins fit de longues études en France et en Italie du nord avant de devenir, tour à tour, sénateur aux Parlements de Toulouse et Milan, puis ambassadeur français à Venise et à Rome. Consacré évêque de Rieux en 1524, il se démit de ses fonctions parlementaires et finit ses jours à Toulouse, entouré d'étudiants et de gens de lettres épris de littérature classique. Cette édition de sa correspondance révèle l'étendue considérable de ses rapports, non seulement avec les représentants de l'humanisme européen, mais aussi avec les chefs de la diplomatie française, avec des parlementaires, des gens de loi et d'Eglise exceptionnels.

**The Da Vinci Globe** Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds: a distinct globe with mysterious images, such as old ships, sailors, a volcano, a hybrid monster, pentimenti, waving patterns, conic individualised mountains, curving rivers, vigorous coastal lines, chiaroscuro and an unresolved triangular anagram, which remains an enigma. The globe is hand-engraved in great detail on ostrich egg shells from Pavia by a left-handed Renaissance genius of unquestionable quality. It shows secret knowledge of the map world from the time of Columbus, Cabral, Amerigo Vespucci and Leonardo da Vinci. Central and North America are covered by a vast ocean. The da Vinci globe originates from Florence and dates from 1504. It marks the first time ever that the names of countries such as Brazil, Germania, Arabia and Judea have appeared on a globe. A Leonardo drawing for this

globe, showing the coast of the New World and Africa has been discovered in the British Library. This book brings the reader through a fabulous journey of scholars, maps, riddles, rebuses, iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe. It details 500 years of mystery, fine scholarship and expert forensic testing at numerous material science laboratories the world over. The da Vinci globe now takes its rightful place, surpassing the Lenox globe, its copper-cast identical twin, as the most mysterious globe of our time. As such, this monograph is an essential text in Leonardo studies and in the history of cartography.

*The Naming of America* Martin Waldseemüller,2008 This new book features a facsimile of the 1507 World Map by Martin Waldseemuller - the first map ever to display the name America - and tells the fascinating story behind its creation in 16th-century France and rediscovery 300 years later in the library of Wolfegg Castle, Germany, in 1901. It also includes a completely new translation and commentary to Martin Waldseemuller and Matthias Ringmann's seminal cartographic text, the Cosmographiae Introductio, which originally accompanied the World Map. John Hessler considers answers to some of the key questions raised by the map's representation of the New World, including How was it possible for a small group of cartographers to have produced a view of the world so radical for its time and so close to the one we recognize today?; and What evidence did they possess to show the existence of the Pacific Ocean when neither Vasco Nunez de Balboa nor Ferdinand Magellan had yet reached it'. There are no easy answers, and yet, as this fascinating book reveals, this group of unknowns created some of the most important maps in the history of cartography, and afford us a glimpse into an age when accepted scientific and geographic principles fell away, spawning the birth of modernity.
