Obsessed by a Dream Aashild Sørheim,2019-01-01 This Open Access biography chronicles the life and achievements of the Norwegian engineer and physicist Rolf Widerøe. Readers who meet him in the pages of this book will wonder why he isn't better known. The first of Widerøe's many pioneering contributions in the field of accelerator physics was the betatron. He later went on to build the first radiation therapy machine, an advance that would eventually revolutionize cancer treatment. Hospitals worldwide installed his machine, and today's modern radiation treatment equipment is based on his inventions. Widerøe's story also includes a fair share of drama, particularly during World War II when both Germans and the Allies vied for his collaboration. Widerøe held leading positions in multinational industry groups and was one of the consultants for building the world's largest nuclear laboratory, CERN, in Switzerland. He gained over 200 patents, received several honorary doctorates and a number of international awards. The author, a professional writer and maker of TV documentaries, has gained access to hitherto restricted archives in several countries, which provided a wealth of new material and insights, in particular in relation to the war years. She tells here a gripping and illuminating story.

Invasive Species in Forests and Rangelands of the United States Therese M. Poland,Toral Patel-Weynand,Deborah M. Finch,Chelcy Ford Miniat,Deborah C. Hayes,Vanessa M. Lopez,2021-02-01 This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars, policy makers, natural resource managers and practitioners.

The Origins of the Final Solution Christopher R. Browning,2007-05-01 This groundbreaking work is the most detailed, carefully researched, and comprehensive analysis of the evolution of Nazi policy from the persecution and ethnic cleansing of Jews in 1939 to the Final Solution of the Holocaust in 1942.

Flood Risk Assessment and Management Andreas H. Schumann,2011-01-04 Flood catastrophes which happened world-wide have shown that it is not sufficient to characterize the hazard caused by the natural phenomenon flood with the well-known 3M-approach (measuring, mapping and modelling). Due to the recent shift in paradigms from a safety oriented approach to risk based planning it became necessary to consider the harmful impacts of hazards. The planning tasks changed from attempts to minimise hazards towards interventions to reduce exposure or susceptibility and nowadays to enhance the capacities to increase resilience. Scientific interest shifts more and more towards interdisciplinary approaches, which are needed to avoid disaster. This book deals with many aspects of flood risk management in a comprehensive way. As risks depend on hazard and vulnerabilities, not only geophysical tools for flood forecasting and planning are presented, but also socio-economic problems of flood management are discussed. Starting with precipitation and meteorological tools to its forecasting, hydrological models are described in their applications for operational flood forecasts, considering model uncertainties and their interactions with hydraulic and groundwater models. With regard to flood risk planning, regionalization aspects and the options to utilize historic floods are discussed. New hydrological tools for flood risk assessments for dams and reservoirs are presented. Problems and options to quantify socio-economic risks and how to consider them in multi-criteria assessments of flood risk planning are discussed. This book contributes to the contemporary efforts to reduce flood risk at the European scale. Using many real-world examples, it is useful for scientists and practitioners at different levels and with different interests.

Handbook of Partial Least Squares Vincenzo Esposito Vinzi,Wynne W. Chin,Jörg Henseler,Huiwen Wang,2010-03-10 This handbook provides a comprehensive overview of Partial Least Squares (PLS) methods with specific reference to their use in marketing and with a discussion of the directions of current research and perspectives. It covers the broad area of PLS methods, from regression to structural equation modeling applications, software and interpretation of results. The handbook serves both as an introduction for those without prior knowledge of PLS and as a comprehensive reference for researchers and practitioners interested in the most recent advances in PLS methodology.

The Correspondence of Wolfgang Capito ,2005-01-01 This penultimate volume in the series is a fully annotated translation of Capito's existing correspondence covering the years 1532-36 and culminating in the Wittenberg Concord between the Lutheran and Reformed churches.

Introducing Social Semiotics Theo Van Leeuwen,2005 Introducing Social Semiotics uses a wide variety of texts including photographs, adverts, magazine pages and film stills to explain how meaning is created through complex semiotic interactions. Practical exercises and examples as wide ranging as furniture arrangements in public places, advertising jingles, photojournalism and the rhythm of a rapper's speech provide readers with the knowledge and skills they need to be able to analyse and also produce successful multimodal texts and designs. The book traces the development of semiotic resources through particular channels such as the history of the Press and advertising; and explores how and why these resources change over time, for reasons such as advancing technology. Featuring a full glossary of terms, exercises, discussion points and suggestions for further reading, Introducing Social Semiotics makes concrete the complexities of meaning making and is essential reading for anyone interested in how communication works.

Plant Systems Biology Sacha Baginsky,Alisdair R. Fernie,2007-06-25 This volume aims to provide a timely view of the state-of-the-art in systems biology. The editors take the opportunity to define systems biology as they and the contributing authors see it, and this will lay the groundwork for future studies. The volume is well-suited to both students and researchers interested in the methods of systems biology. Although the focus is on plant systems biology, the proposed material could be suitably applied to any organism.

Forest Economics Daowei Zhang,Peter H. Pearse,2011-09-15 Forestry cannot be isolated from the forces that drive all economic activity. It involves using land, labour, and capital to produce goods and services from forests, while economics helps in understanding how this can be done in ways that will best meet the needs of people. Therefore, a firm grounding in economics is integral to sound forestry policies and practices. This book, a major revision and expansion of Peter H. Pearse's 1990 classic, provides this grounding. Updated and enhanced with advanced empirical presentation of materials, it covers the basic economic principles and concepts and their application to modern forest management and policy issues. Forest Economics draws on the strengths of two of the field's leading practitioners who have more than fifty years of combined experience in teaching forest economics in the United States and Canada. Its comprehensive and systematic analysis of forest issues makes it an indispensable resource for students and practitioners of forest management, natural resource conservation, and environmental studies.

Why French Women Wear Vintage Aloïs Guinut,2020-08-06 The sustainable fashion revolution has begun, and we must all be part of it. - Aloïs Guinut Stylish women everywhere are realizing the environmental damage of fast fashion and looking for new ways to dress that don't involve cramming their wardrobe with clothes that may never get worn. As Paris-based style-coach Aloïs Guinut explores in this invaluable book, French women have a lot to teach us about how to cherish the planet without sacrificing your style: - Know what works for you. - Buy less and buy better. - Mix vintage items with a few wisely chosen modern pieces. - Optimize your closet. - Look after what you have and make it last. - Seek out quality fabrics that don't poison the environment.

Your Diamond Dreams Cut Open My Arteries Else Lasker-Schüler,Robert P. Newton,1982 Critics have called Else Lasker-Schüler the greatest of all German women poets and one of the finest Jewish poets. This large and representative selection of translations by Robert P. Newton, supplemented by a biographical and critical introduction and a selected bibliography, was the first substantial presentation of her works in English at its original publication in 1982.

Developing Writing Skills in German Annette Duensing,Uwe Baumann,2006-11-22 Developing Writing Skills in German, is a unique course designed to improve the reading and writing skills of intermediate students of German. Presenting a wide range of authentic written materials, the book aims to develop reading strategies and the ability to write texts of various types - essays, articles and reviews - while imparting an understanding of important aspects of German society. From the environment to consumerism, each chapter focuses on a different theme and concentrates on the advancement of particular skills; all the chapters conclude with a task appropriate to the skills focus of the section. Summary writing, note-taking, the use of mind-maps to collect ideas, and other strategies for successful writing in German are presented here. This course is suitable both for classroom use and independent study, with feedback and answer key supplied at the back of the book.

Independent Theatre in Contemporary Europe Manfred Brauneck,ITI Zentrum Deutschland,2017-03-31 Over the past 20 years European theatre underwent fundamental changes in terms of aesthetic focus, institutional structure and in its position in society. The impetus for these changes was provided by a new generation in the independent theatre scene. This book brings together studies on the state of independent theatre in different

European countries, focusing on the fields of dance and performance, children and youth theatre, theatre and migration and post-migrant theatre. Additionally, it includes essays on experimental musical theatre and different cultural policies for independent theatre scenes in a range of European countries.

Plast: Ukrainian Scouting, a Unique Story Orest Subtelny,2016-12-01 In this book, the renowned historian Orest Subtelny, who wrote *Ukraine: A History*, describes to us how, in 1911, a small group of teachers, whose people lived under foreign rule, at the crossroads of empires, took Baden Powell's idea, adapted it to their circumstances and formed a scouting organization for the betterment of Ukrainian youth and to provide hope to the Ukrainian nation. The organization was buffeted by history – repression, war, emigration, dispersement throughout the world – and finally found renewal in a free Ukraine. It was an amazing journey, truly a unique story.

Stockley's Herbal Medicines Interactions Elizabeth M. Williamson,Samuel Driver,Karen Baxter,2009 This is a professional level major reference work containing information, in A-Z format, on herb-drug, herb-supplement, herb -food and herb-laboratory test interactions; all of which is data referenced. Commercial herbal medicinal products are increasingly consumed on a regular basis by people in the developed world. Often such products are taken concurrently with conventional medicines, frequently without the knowledge of health care professionals. As more evidence has become available, there has been an increasing awareness of the potential and actual problems of interactions, often dangerous, between conventional medicines and herbal medicines. This proposed new major reference brings together available data on approximately 200 of the most commonly used herbal medicines in highly structured, rigorously scientific monographs. Although our texts on herbal medicines and drug interactions include the major well-known interactions, this text is able to treat the subject in considerably more detail.

Skinny Bitch Rory Freedman,Kim Barnouin,2010-09 Not your typical boring diet book, this is a tart-tongued, no-holds-barred wakeup call to all women who want to be thin. With such blunt advice as, Soda is liquid Satan and You are a total moron if you think the Atkins Diet will make you thin, it's a rallying cry for all savvy women to start eating healthy and looking radiant. Unlike standard diet books, it actually makes the reader laugh out loud with its truthful, smart-mouthed revelations. Behind all the attitude, however, there's solid guidance.Skinny Bitchespouses a healthful lifestyle that promotes whole grains, fruits, and vegetables, and encourages women to get excited about feeling clean and pure and energized.
