Artistry of the Mentally III H. Prinzhorn,2013-11-11 No one is more conscious of the faults of this work than the author. Therefore some self -criticism should be woven into this foreward. There are two possible methodologically pure solutions to this book's theme: a de scriptive catalog of the pictures couched in the language of natural science and accom panied by a clinical and psychopathological description of the patients, or a completely metaphysically based investigation of the process of pictorial composition. According to the latter, these unusual works, explained psychologically, and the exceptional circum stances on which they are based would be integrated as a playful variation of human expression into a total picture of the ego under the concept of an inborn creative urge, behind which we would then only have to discover a universal need for expression as an instinctive foundation. In brief, such an investigation would remain in the realm of phenomenologically observed existential forms, completely independent of psychiatry and aesthetics. The compromise between these two pure solutions must necessarily be piecework and must constantly defend itself against the dangers of fragmentation. We are in danger of being satisfied with pure description, the novelistic expansion of details and questions of principle; pitfalls would be very easy to avoid if we had the use of a clearly outlined method. But the problems of a new, or at least never seriously worked, field defy the methodology of every established

subject.

Fifteen Hours Mitchel Scanlon,2005 A young Imperial Guardsman arrives in the wrong battle on the wrong planet and gets caught in a meat-grinder war. With the brutal ork forces attacking in wave after wave, it is no wonder that the life expectancy of a new arrival is only 15 hours. Original.

Euro Firefighter Paul Grimwood,2008 Paul Grimwood has responded and worked from over a hundred fire stations in the USA and Europe. In this, his third book, he demonstrates how the very best strategies and tactical approaches from Europe and the USA may be effectively combined to enhance firefighter tactics and safety at structure fires. The book also covers and exceeds the 2007 syllabus of the European (UK) EDXCEL CFBT Instructor Qualification (90 hours) for practical Fire Behavior Training (flashover training in ISO shipping containers and other FDS units). Euro Firefighter is for the CFBT instructor, firefighter, company officer and fire chief. The concept of teaching about flashover using ISO steel shipping containers was developed in Europe - now read how European instructors teach fire behavior using a vast array of Fire Development Simulators (FDS). This book will also take you out onto the fire-grounds of London, New York, Madrid, Chicago, Paris, Germany and Sweden, demonstrating how similar fires are fought using different strategic approaches and showing how US and EURO firefighting tactics are gradually aligning in many areas. From tactical ventilation to air management, from Rapid Intervention Teams to high-rise firefighting and limited staffing, the author brings you the best tactics from Europe and the USA in one training manual! Written in such a way that the training officer can immediately transfer key learning points directly into training presentations, the core principles of this training package enhance firefighter safety on the fire-ground. The book also provides a LINK CODE for ongoing updates and web-based downloads. Euro Firefighter covers a broad range of issues important to anyone who steps off a fire truck at the scene of an emergency.
