Hyperbole and a Half Allie Brosh,2013-10-29 #1 New York Times Bestseller “Funny and smart as hell” (Bill Gates), Allie Brosh’s *Hyperbole and a Half* showcases her unique voice, leaping wit, and her ability to capture complex emotions with deceptively simple illustrations. FROM THE PUBLISHER: Every time Allie Brosh posts something new on her hugely popular blog *Hyperbole and a Half* the internet rejoices. This full-color, beautifully illustrated edition features more than fifty percent new content, with ten never-before-seen essays and one wholly revised and expanded piece as well as classics from the website like, “The God of Cake,” “Dogs Don’t Understand Basic Concepts Like Moving,” and her astonishing, “Adventures in Depression,” and “Depression Part Two,” which have been hailed as some of the most insightful meditations on the disease ever written. Brosh’s debut marks the launch of a major new American humorist who will surely make even the biggest scrooge or snob laugh. We dare you not to. FROM THE AUTHOR: This is a book I wrote. Because I wrote it, I had to figure out what to put on the back cover to explain what it is. I tried to write a long, third-person summary that would imply how great the book is and also sound vaguely authoritative—like maybe someone who isn’t me wrote it—but I soon discovered that I’m not sneaky enough to pull it off convincingly. So I decided to just make a list of things that are in the book: Pictures Words Stories about things that happened to me Stories about things that happened to other people because of me Eight billion dollars* Stories about dogs The secret to eternal happiness* *These are lies. Perhaps I have underestimated my sneakiness!

City Economics Brendan O'Flaherty,2005-10-30 This introductory but innovative textbook on the economics of cities is aimed at students of urban and regional policy as well as of undergraduate economics. It deals with standard topics, including automobiles, mass transit, pollution, housing, and education but it also discusses non-standard topics such as segregation, water supply, sewers, garbage, fire prevention, housing codes, homelessness, crime, illicit drugs, and economic development. Its methods of analysis are primarily verbal, geometric, and arithmetic. The author achieves coherence by showing how the analysis of various topics reinforces one another. Thus, buses can tell us something about schools and optimal tolls about land prices. Brendan O'Flaherty looks at almost everything through the lens of Pareto optimality and potential Pareto optimality--how policies affect people and their well-being, not abstract entities such as cities or the economy or growth or the environment. Such traditionalism leads to radical questions, however: Should cities have police and fire departments? Should tax preferences for home ownership be repealed? Should public schools charge for their services? O'Flaherty also gives serious consideration to such heterodox policies as pay-at-the-pump auto insurance, curb rights for buses, land taxes, marginal cost water pricing, and sidewalk zoning.

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Aquaculture Engineering Odd-Ivar Lekang,2013-01-15 As aquaculture continues to grow at a rapid pace, understanding the engineering behind aquatic production facilities is of increasing importance for all those working in the industry. Aquaculture engineering requires knowledge of the many general aspects of engineering such as material technology, building design and construction, mechanical engineering, and environmental engineering. In this comprehensive book now in its second edition, author Odd-Ivar Lekang introduces these principles and demonstrates how such technical knowledge can be applied to aquaculture systems. Review of the first edition: 'Fish farmers and other personnel involved in the aquaculture industry, suppliers to the fish farming business and designers and manufacturers will find this book an invaluable resource. The book will be an important addition to the shelves of all libraries in universities and research institutions where aquaculture, agriculture and environmental sciences are studied and taught.' Aquaculture Europe 'A useful book that, hopefully, will inspire successors that focus more on warm water aquaculture and on large-scale mariculture such as tuna farming.' Cision

When Dimple Met Rishi Sandhya Menon,2021-02-09 The inspiration for the Netflix original series *Mismatched*! Everyone is talking about this New York Times bestselling rom-com that Mindy Kaling called “utterly charming!” *Eleanor & Park* meets Bollywood in this hilarious and heartfelt novel about two Indian-American teens whose parents conspire to arrange their marriage. Dimple Shah has it all figured out. With graduation behind her, she’s more than ready for a break from her family, from Mamma’s inexplicable obsession with her finding the “Ideal Indian Husband.” Ugh. Dimple knows they must respect her principles on some level, though. If they truly believed she needed a husband right now, they wouldn’t have paid for her to attend a summer program for aspiring web developers...right? Rishi Patel is a hopeless romantic. So when his parents tell him that his future wife will be attending the same summer program as him—wherein he’ll have to woo her—he’s totally on board. Because as silly as it sounds to most people in his life, Rishi wants to be arranged, believes in the power of tradition, stability, and being a part of something much bigger than himself. The Shahs and Patels didn’t mean to start turning the wheels on this “suggested arrangement” so early in their children’s lives, but when they noticed them both gravitate toward the same summer program, they figured, Why not? Dimple and Rishi may think they have each other figured out. But when opposites clash, love works hard to prove itself in the most unexpected ways.

Rise of the Machines Kristen Lamb,2013-09-24 Get the book that has best-selling authors buzzing over the new age of publishing! ***** Here we are-the future is now. The machines have taken over. Everything is computerized. People no longer talk, they text. What number do we have to press to get a flesh and blood HUMAN? It's easy to feel like we're losing our humanity when surrounded by computers, cell phones, and text messaging, but here's the good news: The same machines that seem to be stealing our humanity also have the power to restore it. Yes, you read correctly. The more we embrace technology, the more distinctly human we can become. The new author in today's publishing world is a cyborg of sorts-part human, part machine. The machine part allows us to compose series of words, copy them, email them, and then send them across the globe with a push of a button. We can research faster and more accurately than ever before. We can communicate with people all over the planet real-time and virtually for free. The new power technology has given writers has made us, in effect, superhuman. Branding has broken free of marketing's shackles and merged with personal identity. If we want to thrive in our new environment, we need to adapt, to apply technology as an extension of our humanness. This is not a book to teach you 1,000 ways to blast people with advertising. The WANA Way is different than anything you've likely encountered. It is constructed using the timelessness of art, blended with the strength of human relationships. Platforms are more than a zillion ways to try to part readers from money; they are living works of art and meshed with the soul of the writer-artist. The machines are rising, but humans were here first. ***** WHAT OTHERS ARE SAYING: For writers, the purchase price of Kristen Lamb's *Rise of the Machines* should easily become the best investment you'll ever make for your writing career. In Kristen's brilliant and easy-to-grasp book, not only will you learn how to become a successful marketer of your work-whether it's published by a legacy press or self-published-and achieve significant and ever-increasing sales of your work, but you'll learn how to without spending hours and hours each week to do so. *Rise of the Machines* is the standard-the cutting edge. -- Les Edgerton, award-winning author of *HOOKED* and *FINDING YOUR VOICE* In *Rise of the Machines*, Kristen Lamb has provided an invaluable compass for navigating the uncharted waters of 21st century publishing. I pity the writer working today who doesn't take advantage of the wealth of valuable insights and breakthrough methods contained in these pages. -David Corbett, award-winning author of *THE ART OF CHARACTER*

Drawing from Within Lisa Hinz,2006-07-15 *Drawing from Within* is an introductory guide for those wanting to explore the use of art with clients with eating disorders. Art therapy is a particularly effective therapeutic intervention for this group, as it allows them to express uncomfortable thoughts and feelings through artistic media rather than having to explain them verbally. Lisa D. Hinz outlines the areas around which the therapist can design effective treatment programmes, covering family influences, body image, self-acceptance, problem solving and spirituality. Each area is discussed in a separate chapter and is accompanied by suggestions for exercises, with advice on materials to use and how to implement them. Case examples show how a therapy programme can be tailored to the individual client and photographs of client artwork illustrate the text throughout. Practical and accessible to practitioners at all levels of experience, this book gives new hope to therapists and other mental health professionals who want to explore the potential of using art with clients with eating disorders.

The Book of Solomon's Magick Carroll Runyon,1996-09-01

Expanded Cinema Gene Youngblood,2020-03-03 Fiftieth anniversary reissue of the founding media studies book that helped establish media art as a cultural category. First published in 1970, Gene Youngblood's influential *Expanded Cinema* was the first serious treatment of video, computers, and holography as cinematic technologies. Long considered the bible for media artists, Youngblood's insider account of 1960s counterculture and the birth of cybernetics remains a mainstay reference in today's hypermediated digital world. This fiftieth anniversary edition includes a new Introduction by the author that offers conceptual tools for understanding the sociocultural and sociopolitical realities of our present world. A unique eyewitness account of burgeoning experimental film and the birth of video art in the late 1960s, this far-ranging study traces the evolution of cinematic language to the end of fiction, drama, and realism. Vast in scope, its prescient formulations include "the paleocybernetic age," "intermedia," the "artist as design scientist," the "artist as ecologist," "synaesthetics and kinesthetics," and "the technosphere: man/machine symbiosis." Outstanding works are analyzed in detail. Methods of production are meticulously described, including interviews with artists and technologists of the period, such as Nam June Paik, Jordan Belson, Andy Warhol, Stan Brakhage, Carolee Schneemann, Stan VanDerBeek, Les Levine, and Frank Gillette. An inspiring Introduction by the celebrated polymath and designer R. Buckminster Fuller—a perfectly cut gem of countercultural thinking in itself—places Youngblood's radical observations in comprehensive perspective. Providing an unparalleled historical documentation, *Expanded Cinema* clarifies a chapter of countercultural history that is still not fully represented in the arthistorical record half a century later. The book will also inspire the current generation of artists working in ever-newer expansions of the cinematic environment and will prove invaluable to all who are concerned with the technologies that are reshaping the nature of human communication.

Everyone Eats E. N. Anderson,2005-03-01 Everyone eats, but rarely do we ask why or investigate why we eat what we eat. Why do we love spices, sweets, coffee? How did rice become such a staple food throughout so much of eastern Asia? *Everyone Eats* examines the social and cultural reasons for our food choices and provides an explanation of the nutritional reasons for why humans eat, resulting in a unique cultural and biological approach to the topic. E. N. Anderson explains the economics of food in the globalization era, food's relationship to religion, medicine, and ethnicity as well as offers suggestions on how to end hunger, starvation, and malnutrition. *Everyone Eats* feeds our need to understand human ecology by explaining the ways that cultures and political systems structure the edible environment.

Allies at Dieppe Will Fowler,2012-06-20 In August 1942, the Allies launched a raid against the German-held port of Dieppe on the French channel coast. It was largely a disaster, with the Canadian forces bearing

the brunt of the catastrophe. However, it wasn't all a failure, and history has tended to overlook the role of 4 Commando, who, along with their US Ranger counter-parts, landed and successfully disabled the German guns threatening the rest of the landings. Their actions proved an excellent demonstration of the military adage “train hard, fight easy” and showed the advantage of proper operational planning and brilliant leadership. This controversial raid also included members of the Free French and it was the first time US land forces engaged the Germans on mainland Europe. Set in the context of the Dieppe raid as a whole, Will Fowler studies the contribution of No. 4 Commando and Operation Cauldron, and evaluates how and why they achieved their objectives in this daring Commando raid of World War II.

Let's Pretend This Never Happened Jenny Lawson,2013-03-05 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of Furiously Happy. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent Let’s Pretend This Never Happened, Lawson’s long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives.
