📖 **The World to Come** Liliya Berezhnaya,John-Paul Himka,2014 Elaborate icons and murals of the Last Judgment adorned many Eastern-rite churches in medieval and early modern Ukraine. The largest compilation of its kind, The World to Come includes more than eighty such images from present-day Ukraine, eastern Slovakia, and southeastern Poland, with most printed in full color.

📖 **Czechoslovakia** Zuzana Palovic,Gabriela Bereghazyova,2020-01-11 Take a journey into the borderland of the red empire, during an ideological battle that saw the world ripped in half. Dare to step into communist Czechoslovakia, where the controlled ‘east’ and the free ‘west’ converged at their closest. This is a story of ordinary people caught up in the midst of the 20th century’s greatest political experiment. Through tales only told in whispers, glimpse into the everyday reality of those whose entire universe was ruled by the hammer and sickle.

📖 **Social Capital** Rene Dubos,2017-07-12 Leading scholars in the field of social networks from diverse disciplines present the first systematic and comprehensive collection of current theories and empirical research on the informal connections that individuals have for support, help, and information from other people. Expanding on concepts originally formulated by Pierre Bourdieu and James Coleman, this seminal work will find an essential place with educators and students in the fields of social networks, rational choice theory, institutions, and the socioeconomics of poverty, labor markets, social psychology, and race. The volume is divided into three parts. The first segment clarifies social capital as a concept and explores its theoretical and operational bases. Additional segments provide brief accounts that place the development of social capital in the context of the family of capital theorists, and identify some critical but controversial perspectives and statements regarding social capital in the literature. The editors then make the argument for the network perspective, why and how such a perspective can clarify controversies and advance our understanding of a whole range of instrumental and expressive outcomes. Social Capital further provides a forum for ongoing research programs initiated by social scientists working at the crossroads of formal theory and new methods. These scholars and programs share certain understandings and approaches in their analyses of social capital. They argue that social networks are the foundation of social capital. Social networks simultaneously capture individuals and social structure, thus serving as a vital conceptual link between actions and structural constraints, between micro- and macro-level analyses, and between relational and collective dynamic processes. They are further cognizant of the dual significance of the structural features of the social networks and the resources embedded in the networks as defining elements of social capital.

📖 **Emotions, Media and Politics** Karin Wahl-Jorgensen,2019-01-15 Emotions have long been neglected in media research, although their role is a vital ingredient in shaping our shared stories and the ways we engage with them. But emotions, as they circulate through the media, can also be divisive and exclusionary. Karin Wahl-Jorgensen makes the case for researching the role of emotions in mediated politics. Drawing on a series of studies, she explores the complex relationship between emotions, politics and media. The book includes analyses of how Facebook structures emotional reactions; the anger of Donald Trump; the use of personal storytelling in feminist Twitter hashtags; the role of emotionality in award-winning journalism; and the communities created by political fandoms. Essential reading for scholars and students, this important volume opens up new ways of thinking about and researching emotions, media and politics.

📖 **Community Building on the Web** Amy Jo Kim,2006-07-19 What’s the point of creating a great Web site if no one goes there—or worse, if people come but never return? How do some sites, such as America Online, eBay, and GeoCities, develop into Internet communities with loyal followings and regular repeat traffic? How can Web page designers and developers create sites that are vibrant and rewarding?
