Light Tanks Mikhail Baryatinskiy, 2006 It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs. However, unhindered by many of the tactical constraints that affected tank development in the West, the Red Army was able to acquire and develop technology that was under-rated in both Britain and the USA. From Britain, the famous manufacturer Vickers produced a Six-Ton light tank; effectively rejected by the War Office, one example was acquired by the Russians and this formed the basis of the Russian T-26 of 1931. Further British designs also influenced the later light tanks, equipment which was pivotal to the Red Army during its campaigns in Manchuria, Finland and against the initial German assault in 1941. In the USA, Walter Christie was also largely ignored as a designer but, as with Vickers, his designs came to be highly important. His influence was seen in the 'BT' - short for 'Bystrochodri' or 'Fast Tank' - series of light-medium tanks that was first introduced in 1932. The BT series saw service in Spain, Manchuria, Finland and in the defense of Russia itself in 1941. The critical aspect of the Christie design was that the vehicles were capable of operating both with nor without tracks; in the latter case eight road wheels carried the weight of the vehicle, with steering being achieved via a steering wheel acting in conjunction with the clutch/brake system. In the second of the new 'Soviet Tanks' series, Mikhail Baryatinsky provides the reader with a comprehensive account of the development and operational record of Soviet light tanks. Utilizing photographs, line drawings and specially prepared artworks, he provides a detailed portrait of these highly successful tanks. Aimed at the modeler, military historian and war gamer, the new 'Soviet Tanks' series is designed to provide, probably for the first time in the English language, authoritative information on the classic Soviet tank designs of the 20th century. The series will be required reading

for all those interested in the development of armored warfare over the past 100 years.

Soviet Tank Company Tactics Defense Intelligence Agency, 2019-07-25 Soviet Tank Company Tactics, May 1976 We were surprised to find there were no clean copies in print so we decided to reconstitute the report as best we could. Unfortunately, the photos are not very good and the originals are nowhere to be found, so we did not replace them. Rather than change the document, we decided to add a new document at the end that would show current (2019) Russian tanks and include what little information is available. As far as tactics go, not really sure how the new tanks, such as the T-14 will cause changes to Russian tank tactics but some of the information is still valid today, such as the use of snorkel, night vision and the effects of poor weather conditions. You will note that we added some additional information regarding Russian New Generation Warfare (RNGW), 4th Generation Warfare, Hybrid War, and new Russian weapons at the end including: - 1K17 Szhatie (1K17 Сжатие) Russian Stiletto Laser Tank - Combat Laser System (Peresvet) Russian Laser Cannon - T-14 Armata Main Battle Tank - T-15 Heavy Infantry Combat Vehicle - Kurganets-25 Light Tracked Armored Vehicle - 2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer - VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright

material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Russian Tanks of World War II Tim Bean, Will Fowler, 2002 The dramatic struggle of the tank crews against German advance is told through the photographs in the book, some of which have never been published before.

M1 Abrams at War Michael Green, 2005 The impact of the M1 tank cannot be overstated; while applying lessons learned from mistakes of the past, this new tank defined tanks and armored warfare for the foreseeable future. It redefined how the U.S. Army thought, planned, trained, and fought. The M1 carried the army into an order-of-magnitude change that ran the gamut of ground warfare. The speed that the army moved across the battlefield was increased, the methods used to supply this faster-moving force were redefined and mastered, the methods used to provide supporting fire from artillery and close-air-support aircraft were redefined and mastered, and the decision-making process used by the leadership at virtually all levels was accelerated. For the first time in history, the U.S. Army had the best tank in the world. The M1 Abrams became the yardstick for foreign countries potential enemies, and friends alike, to measure the capabilities of their own tanks ... the M1 embodied what arguably may be the ultimate balance of the three classic tank design criteria - firepower, mobility, and protection--Introduction.

The Central Intelligence Agency and Overhead Reconnaissance Gregory Pedlow, Donald Welzenbach, 2016-03-15 The CIA's 2013 release of its book The Central Intelligence Agency and Overhead Reconnaissance 1954-1974 is a fascinating and important historical document. It contains

a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes

overlooked and to authors whose work might not otherwise find a home.

From the Fulda Gap to Kuwait Stephen P. Gehring, 1998 CMH Publication 70-56-1. This study describes how the United States Army, Europe (USAREUR), under the command of General Crosbie E. Saint, supported the armed response of the United States and the United Nations to Iraq's August 1990 invasion of Kuwait at the very time it was managing a fundamental transition in its fifty-year history of defending Central Europe. Discusses the complicated planning for the deployment and the rapid-fire implementation.

Bats in the Anthropocene: Conservation of Bats in a Changing World Christian C. Voigt, Tigga Kingston, 2015-12-07 This book focuses on central themes related to the conservation of bats. It details their response to land-use change and management practices, intensified urbanization and roost disturbance and loss. Increasing interactions between humans and bats as a result of hunting, disease relationships, occupation of human dwellings, and conflict over fruit crops are explored in

depth. Finally, contributors highlight the roles that taxonomy, conservation networks and conservation psychology have to play in conserving this imperilled but vital taxon. With over 1300 species, bats are the second largest order of mammals, yet as the Anthropocene dawns, bat populations around the world are in decline. Greater understanding of the anthropogenic drivers of this decline and exploration of possible mitigation measures are urgently needed if we are to retain global bat diversity in the coming decades. This book brings together teams of international experts to provide a global review of current understanding and recommend directions for future research and mitigation.

A Command Post at War David Hogan, Jr., 2006-03-01 World War II remains the defining experience for the U.S. Army in the twentieth century. It has had a lasting impact on the nation and its place in the world and on the Army and the way it organizes and fights. Although historians have

written numerous volumes concerning this global conflict, some gap in the literature remain. In particular, the subject of an American field army headquarters and its organization and role have attracted little attention. Studies on the personalities and styles of individual commanders exist, but the command posts themselves-the ways in they were structures and operated and the functions they performed-have not been much explored. With *A Command Post at War: First Army Headquarters in Europe, 1943-1945*, the Center of Military History attempts to redress this shortcoming. This study addresses the First Army headquarters in the European theater from its activation in October 1943 to V-E Day in May 1945. Under Generals Omar N. Bradley and Courtney H. Hodges, the First Army headquarters oversaw the American landings on D-Day, the breakout from the Normandy beachhead, the battle of Hürtgen Forest along the German frontier, the defense of the northern shoulder during the Battle of the Bulge, and the crossing of the Rhine River at Remagen prior to the final American drive into central Germany. In examining the First Army headquarters' role, this volume shows the army headquarters of World War II as a complicated organization with functions ranging from the immediate supervision of tactical operations to long-range operational planning and the sustained support of frontline units. The commander and staff faced the problem of coordination with Allied counterparts as well as with headquarters and units from other services. Inadequate information and the limitations of technology added to their challenges. The human dimension was always important, and at times critical, in affecting the work of the headquarters under the stresses of a difficult campaign against an obstinate and resourceful foe. Although times have changed and the modern Army focuses more on regional conflicts and contingencies than on global warfare, we can still learn much from the experience of the First Army headquarters. The Gulf War reemphasized the role of an army headquarters in a theater of operations as a pertinent issue for today's military professional. By

examining the experience of soldiers in past conflicts we gain the deeper perspectives and understandings necessary to meet the challenges facing the Army today and in the future.

Your Post Has Been Removed Frederik Stjernfelt, Anne Mette Lauritzen, 2019-01-01 This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, hate speech and fake news will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as *Dit opslag er blevet fjernet - techgiganter & ytringsfrihed*. Praise for 'Your Post has been Removed' From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the

21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future. Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed! Nadine Strossen, Professor, New York Law School. Author, HATE: Why We Should Resist It with Free Speech, Not Censorship.

Handbook of Alternative Fuel Technologies, Second Edition Sunggyu Lee,James G. Speight,Sudarshan K. Loyalka,2014-07-08 While strides are being made in the research and development of environmentally acceptable and more sustainable alternative fuels—including efforts to reduce emissions of air pollutants associated with combustion processes from electric power generation and vehicular transportation—fossil fuel resources are limited and may soon be on the verge of depletion in the near future.
