*The Scariest Dinosaur* Roy Awbery,2020-12-24 All dinosaurs are scary. Aren't they? Asked who is the scariest, the dinosaurs argue that each is more scary than the other but we soon discover that the scariest creature might not be the creature you think! A light-hearted look at dinosaurs with a lesson in never judging someone on size alone. The Scariest Dinosaur is aimed at 3-7 year olds and makes a great bedtime read but also has beautifully illustrated images that children will find engaging and they may even spot some unexpected guests hiding in the pictures. The Scariest Dinosaur is Roy P. Awbery's debut children's book and was inspired by his love of art (Roy is also an accomplished artist) and his fondness for making up stories for his grandchildren. Combining the two seemed to be a natural progression. Roy lives in Berkshire with his wife and two dogs, Ruby and Jess.

How can it be a dinosaur when it is so little? Dinosaurs didn't have feathers . . . or did they? This tiny dino is here to explain to its animal friends that birds are, in fact, dinosaurs, and all creatures are connected to one big animal family. With a playful ensemble of animal characters and dynamic bursts of dialogue, celebrated author and illustrator Deborah Freedman has created a spirited and informative picture book for dinosaur lovers of all ages.

Fontosaur Sarah Hyndman,2020-04-13 This brilliant colouring book is crammed full of dinosaurs reimagined as different fonts. Children will have fun learning to recognise letters in different shapes and sizes. They will learn how to spell out the names of their favourite dinosaurs while they colour them in. The book contains 50 fontosaurs to colour in along with activity sheets of fontosaurs to cut out, colour and stick onto a prehistoric landscape. The idea to mix dinosaurs with fonts was inspired by Sarah's 12-year-old nephew Eddie, who loves fonts and makes animals out of the letters that spell out their names. The challenge for Sarah was to choose fonts to suit different dinosaurs and then to construct each one out of the letters of its name. Top dinosaur fan 3-year-old Blake has given the book his enthusiastic thumbs-up and says oh I love this book.

This book teaches you all you need to know about XML: what it is, how it works, what technologies surround it, and how it can best be used in a variety of situations, from simple data transfer to using XML in your Web pages. It builds on the strengths of the first and second editions, and provides new material to reflect the changes in the XML landscape – notably RSS and SVG.

**Dinosaurs** Mary Higby Schweitzer, Elena Rita Schroeter, Charles Doug Czajka, 2020-11-17 This textbook introduces research on dinosaurs by describing the science behind how we know what we know about dinosaurs. A wide range of topics is covered, from fossils and taphonomy to dinosaur physiology, evolution, and extinction. In addition, sedimentology, paleo-tectonics, and non-dinosaurian Mesozoic life are discussed. There is a special opportunity to capitalize on the enthusiasm for dinosaurs that students bring to classrooms to foster a deeper engagement in all sciences. Students are encouraged to synthesize information, employ critical thinking, construct hypotheses, devise methods to test these hypotheses, and come to new defensible conclusions, just as paleontologists do. Key Features Clear and easy to read dinosaur text with well-defined terminology Over 600 images and diagrams to illustrate concepts and aid learning Reading objectives for each chapter section to guide conceptual learning and encourage active reading Companion website (teachingdinosaurs.com) that includes supporting materials such as in-class activities, question banks, lists of suggested specimens, and more to encourage student participation and active learning Ending each chapter with a specific What We Don't Know section to encourage student curiosity Related Titles Singer, R.
