How Animals Smell Alicia Z. Klepeis,2018-12-15 From sniffing out a meal to finding a mate, species throughout the animal kingdom use their sense of smell every day. While most animals use their noses to smell, such as cats, dogs, and humans, others use different parts of their bodies. For example, bees use their antennae, snakes use their tongues, and butterflies use their legs. A good sense of smell can allow animals to survive in dark, underground habitats. It can help others locate food sources in the vast oceans or the driest of deserts. In this book, readers can find out about how animals' and people's senses of smell work and why this sense is essential for most creatures' everyday lives.

Japanese Missions to the International Space Station John O'Sullivan,2019-03-23 Japan has a rich history of human spaceflight, flying in space with both NASA and the Soviet/Russian space agencies over the years. This book tells the story of the JAXA astronauts who have visited the

International Space Station and how they have lived on board, helped construct the space laboratory and performed valuable scientific experiments. JAXA has contributed the largest single module to the ISS: the Kibō (Hope) science laboratory with its Logistics Module, Exposed Facility and robot arm. JAXA supplies the station with cargo and supplies on its automated cargo spacecraft, the H-II Transfer Vehicle (HTV), but it is the human endeavour that captures the imagination. From brief visits to six-month expeditions, from spacewalking to commanding the Earth's only outpost in space, JAXA astronauts have played a vital role in the international project. Extensive use of colour photographs from NASA and JAXA depicting the experiments carried out and the phases of the ISS construction, together with the personal stories of the astronauts' experiences in space, highlight the crucial part the Japanese have played in human spaceflight.
