Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the

Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Thin Within Judy Halliday, Arthur Halliday, 2005-04-17 I want to lose weight, but dieting just doesn't seem to work. I've tried everything, and I'm still three sizes too big. Help! I hate the way my body looks. Sound familiar? Like many women and men, perhaps you have tried virtually every weight-loss plan that exists only to give up in disappointment and despair. Have you faithfully counted fat grams and calories? Have you subjected yourself, week after week, to the humiliation of hearing what your current weight should be compared to what it is? Have you exercised excessively, given up your favorite foods, and felt guilty when you've failed to meet your weight goals? Time tested for more than 30 years, Thin Within is the original hunger-fullness plan. Tens of thousands of participants in the program have joyfully

reported the release of unwanted weight. More importantly, they have maintained that weight with a new and incomparable peace with themselves and with the One who designed them. Thin Within makes it possible to: Identify and resolve issues that cause you to eat more than your body needs Leave diets behind forever Discover and enjoy those foods that promote health and vitality Experience the abundant life as you reach and maintain your natural God-given size

Adhesives and Adhesive Tapes Gerhard Gierenz, Werner Karmann, 2008-09-26
Adhesion is among the oldest technologies known to mankind, but the technology of adhesives began to boom with the developments in chemistry in the early 1900s. The last few years have seen tremendous progress in the performance of adhesives, allowing two pieces to be connected inseparably. Modern adhesives perform so well that more sophisticated joining methods, e.g. welding, can often be replaced by adhesion, meaning that adhesives have found new areas of application. This book allows readers to quickly gain an overview of the adhesives available and to select the best adhesive for each purpose.

How Bad Are Bananas? Mike Berners-Lee, 2011-04-01 Part green-lifestyle guide, part popular science, *How Bad Are Bananas?* is the first book to provide the information we need to make carbon-savvy purchases and informed lifestyle choices and to build carbon considerations into our everyday thinking. The book puts our decisions into perspective with entries for the big things (the World Cup, volcanic eruptions, the Iraq war) as well as the small (email, ironing, a glass of beer). And it covers the range from birth (the carbon footprint of having a child) to death (the carbon impact of cremation). Packed full of surprises – a plastic bag has the smallest footprint of any item listed, while a block of cheese is bad news – the book continuously informs, delights, and engages the reader. Solidly researched and referenced, the easily digestible figures, statistics, charts, and graphs (including a section on the carbon footprint of various foods) will encourage discussion and help people to make up their own minds about their consumer choices.

Animated Encounters Daisy Yan Du, 2019-02-28 China's role in the history of world animation has been trivialized or largely forgotten. In *Animated Encounters* Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period, the 1940s–1970s. She introduces readers to transnational movements in early Chinese animation, tracing the involvement of Japanese, Soviet, American, Taiwanese, and China's ethnic minorities, at socio-historical or representational levels, in animated filmmaking in China. Du argues that Chinese animation was international almost from its inception and that such border-crossing exchanges helped make it “Chinese” and subsequently transform the history of world animation. She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of “Chineseness” and further questions the long-held belief that the forty-year-period in question was a time of cultural isolationism for China due to constant wars and revolutions. China's socialist era, known for the pervasiveness of its political propaganda and suppression of the arts, unexpectedly witnessed a golden age of animation. Socialist collectivism, reinforced by totalitarian politics and centralized state control, allowed Chinese animation to prosper and flourish artistically. In addition, the double marginality of animation—a

minor art form for children—coupled with its disarming qualities and intrinsic malleability and mobility, granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship, both at home and abroad. A captivating and enlightening history, *Animated Encounters* will attract scholars and students of world film and animation studies, children's culture, and modern Chinese history.

Transnational Chinese Cinemas Sheldon H. Lu, 1997-10-01 Zhang Yimou's first film, *Red Sorghum*, took the Golden Bear Award in 1988 at the Berlin International Film Festival. Since then Chinese films have continued to arrest worldwide attention and capture major film awards, winning an international following that continues to grow. *Transnational Chinese Cinemas*

spans nearly the entire length of twentieth-century Chinese film history. The volume traces the evolution of Chinese national cinema, and demonstrates that gender identity has been central to its formation. Femininity, masculinity and sexuality have been an integral part of the filmic discourses of modernity, nationhood, and history. This volume represents the most comprehensive, wide-ranging, and up-to-date study of China's major cinematic traditions. It is an indispensable source book for modern Chinese and Asian history, politics, literature, and culture.

The Hottentot Venus Rachel Holmes, 2016-05-19 The acclaimed biography of Sarah Baartman, once a slave and later a showgirl 'A significant and timely book ... Holmes has produced a laceratingly powerful story' Frances Wilson, Literary Review 'Impeccable ... In telling her extraordinary story, Holmes's fascinating book illuminates the forces which dominated her age, and resound in our own' Sunday Telegraph In 1810 the slave turned showgirl Sarah

Baartman, London's most famous curiosity, became its legal cause célèbre. Famed for her exquisite physique – in particular her shapely bottom – she was stared at, stripped, pinched, painted, worshipped and ridiculed. This talented, tragic young South African woman became a symbol of exploitation, colonialism – and defiance. In this scintillating and vividly written book Rachel Holmes traces the full arc of Baartman's extraordinary life for the first time.
