Hiroshige 53 Stations of the Tokaido Cristina Berna, Eric Thomsen, 2023-07-17 This was the most popular print series ever made in Japan. It was even more popular series ever made in Japan. It was even more popular than the Hokusai series Thirty-six Views of Mount Fuji, which had been recently published and which had influenced Hiroshige tremendously (ISBN 9783756844104). There were 53 post stations along this important road, apart from the start and terminus, in all 55 prints, which are all here in the order from Edo to Kyoto, as in the Hoeido edition (1833-34).

New Trends in Disruptive Technologies, Tech Ethics and Artificial Intelligence Daniel H. de la Iglesia, Juan F. de Paz Santana, Alfonso J. López Rivero, 2022-08-27 This book provides a forum for experts to present their latest research in disruptive technologies, promoting knowledge transfer. Due to the important advances in technologies such as artificial intelligence, big data, the Internet of things, or bioinformatics produced in recent years, it is necessary to conduct a thorough review of current ethical patterns. One of the research fields that is in full expansion and with a broad future is technology ethics or tech ethics. Just a few years ago, this type of research was a small part, and they did not have too many technology researchers involved. At present, due to the explosion of new applications of artificial intelligence, their problems and their legal barriers have flourished innumerable

initiatives, declarations, principles, guides, and analyses focused on measuring the social impact of these systems and on the development of a more ethical technology. It is, therefore, a problem that needs to be addressed from an academic and multidisciplinary point of view, where experts in ethics and behavior work together with experts in new and disruptive technologies. The international conference “Disruptive Technologies Tech Ethics and Artificial Intelligence” (DITTET 2022) provides a forum to present and discuss the latest scientific and technical advances and their implications in the field of ethics. It provides a unique opportunity to bring together experts in different fields, academics, and professionals to exchange their experience in the development and deployment of disruptive technologies, artificial intelligence, and their ethical problems.

With this in mind, the workshop on Digital Forensics and Incident Analysis (WDFIA) specifically addresses this multi-faceted aspect, with papers invited from the full spectrum of issues relating to digital forensics and incident analysis. This book represents the proceedings from the 2012 event, which was held in Crete, Greece. A total of 13 papers are included, spanning a range of topics including systems and network investigation, services and applications and supporting the forensic process. In Public Restrooms Birk Weiberg, 2016-05-03 *In Public Restrooms* is a long-term observation on identity and meta data.

A Geek in Korea Daniel Tudor, 2014-09-09 For every fan of K-Pop music, Korean Wave dramas and Kimchi—or anyone intrigued by Korea and Korean culture—*A Geek in Korea* is a hip, new guide to the land of the Samsung smartphone and Gangnam Style. Author Dan Tudor first arrived in Korea on the eve of the 2002 World Cup when South Korea played Italy in the finals. What he saw inspired him to return and work in Korea. He served as *The Economist* magazine's Korea correspondent for three years, and he writes regular columns for the national daily *Joongang Ilbo* newspaper. Along the way, he has developed a great love and admiration for Korean culture and the Korean people. *A Geek in Korea* reinvents the culture guide for the Internet age. Packed with articles and photographs, it covers all the touchstones of Korean culture—from Buddhism and Confucianism to chapters on the traditional arts and disciplines like Taekwondo. There are chapters on cultural code words and norms; personal

relationships; business and technology; and symbols and practices that are peculiarly Korean. A number of chapters are devoted to Korean pop culture, with attention to the stars, idols, and urban subcultures associated with them. For visitors to Korea, the author includes a mini-guide to his favorite neighborhoods in Seoul and other places of outstanding interest. Spotlighting the originality and creativity of the Koreans, debunking myths about them, and answering nagging questions like why they're so obsessed with education and success—Tudor has created the perfect book for the growing ranks of Koreaphiles in this inspired, insightful, and highly informative guide.

Formation and Control of Biofilm in Various Environments Hideyuki Kanematsu,Dana M.

Barry,2020-01-25 This book provides excellent techniques for detecting and evaluating biofilms: sticky films on materials that are formed by bacterial activity and produce a range of industrial and medical problems such as corrosion, sanitary problems, and infections. Accordingly, it is essential to control biofilms and to establish appropriate countermeasures, from both industrial and medical viewpoints. This book offers valuable, detailed information on these countermeasures. It also discusses the

fundamentals of biofilms, relates various substrates to biofilms, and presents a variety of biofilm reactors. However, the most important feature of this book (unlike others on the market) is its clear focus on addressing the practical aspects from an engineering viewpoint. Therefore, it offers an excellent practical guide for engineers and researchers in various fields, and can also be used as a great academic textbook.

Investigating Child Exploitation and Pornography Monique M. Ferraro, Eoghan Casey, Michael McGrath, 2005 *Investigating Child Exploitation: The Internet, The Law and Forensic Science* is a pioneering interdisciplinary work. This book brings together all the information that prosecutors, investigators, forensic computer analysts, information technology professionals and students need to understand and solve these complex crimes. Real-life examples help to guide the reader through the often multi-layered, technology driven field of investigating and prosecuting Internet-related child exploitation.--

Emerging Digital Forensics Applications for Crime Detection, Prevention, and Security Chang-Tsun Li, 2013 The revolutionary way in which modern technologies have enabled us to exchange information with ease has led to the emergence of interdisciplinary research in digital forensics and investigations, which aims to combat the abuses of computer technologies. *Emerging Digital Forensics Applications for Crime Detection, Prevention, and Security* presents various digital crime and forensic disciplines that use electronic devices and software for crime prevention and detection. This book provides theoretical and empirical research articles and case studies for a broad range of academic readers as well as professionals, industry consultants, and practitioners involved in the use, design, and development of techniques related to digital forensics and investigation.

Gardening For Everyone Julia Watkins, 2022-03-08 A guide to creating and growing a backyard garden simply and sustainably—from planning to planting to harvest, with profiles of essential vegetables and herbs, ecological tips, and fun and creative projects Growing food in your backyard (or even on a porch or windowsill!) is one of the simplest and most rewarding ways to nourish yourself, be self-sufficient, and connect with nature in a hands-on way. Here sustainability expert Julia Watkins shares everything you need to know to grow your own vegetables, fruits, and herbs (as well as wildflowers and other beneficial companion plants). The book covers all the nuts and bolts of creating and caring for your garden—planning, building, planting, tending, and harvesting—followed by a deeper dive into the plants themselves: demystifying annuals vs. perennials, cold-weather vs. warm-weather veggies, and profiles of favorite crops. Throughout, Julia offers tips for creating an eco-friendly and sustainable garden (such as vermicomposting, no-till “lasagna” gardening, and attracting pollinators), plus some fun and unexpected hands-on projects like how to build a bean teepee, make wildflower

seed paper, and enjoy refreshing herbal lemonade ice pops.
