A Fire Story Brian Fies, 2019-03-05 The award-winning author and illustrator presents a personal account of the Northern California wildfires of 2017 in this moving graphic memoir. On October 9th, 2017, wildfires burned through Northern California, resulting in forty-four fatalities and the destruction of thousands of homes. In *A Fire Story*, Brian Fies shares an unflinching account of this tragedy as he and his wife experienced it—including losing their house and every possession that didn't fit in their car. As the fires continued to burn through the area, Brian pulled together *A Fire Story* and posted it online. It immediately went viral. He later expanded the webcomic to include environmental insight and the fire stories of his neighbors. *A Fire Story* is a candid testimony of the wildfires that left homes destroyed, families broken, and a community determined to rebuild. This updated and expanded edition includes thirty-two pages of all-new material, extending the story past the events of the hardcover edition to include updates on the rebuilding, wrestling with insurance, wrangling with contractors, the management of sometimes volatile emotions, and the threats of yet another wildfire.

It also touches on the legal problems that will be encountered with the implementation of the new technologies and new laws that will need to be enacted and new organizations that will need to be formed to deal with these changes. This proposition for a space economy is not science fiction, but well within the remit of current or under development technologies. Numerous technologies are described and put together to form a coherent and feasible road map that, if implemented, could lead humankind towards a brighter future.
