Fokker D.VII Tomasz J. Kowalski,Szymon Grzwocz,Damian Majzak,2018-02 World War I was the time of dynamic development of aviation. Aircraft created during that period and pilots who fought in them, became legends that have fascinated generations of pilots and aviation enthusiasts. Legends of Aviation in 3D is a publishing series with a goal to present legendary aircraft from the pioneer era of military aviation in an innovative way. Thanks to color 3D renderings we can almost touch the Fokker D.VII, see its details, get to know its meticulous airframe structure and understand the phenomenon of this legendary aircraft. With the virtual Fokker D.VII, Marek Ryś inspires us to explore the history of the aircraft afresh. The modern 3D images impressively harmonize with the old photographs. Tomasz Kowalski tells us the story of pilots flying the new Fokker biplanes and takes us to the dark and romantic period of the Great War when knights of the sky were born and killed. We are convinced that Tomasz Kowalski and Marek Ryś's publication is a valuable addition to literature concerning the legendary Fokker D.VII and simultaneously a successful and exceptional attempt to present the earliest history of aviation in an original way. We have made all efforts to make the layout and quality of the series fulfill the needs of our readers.

The Royal Aircraft Factory Paul R. Hare,2021-12-02 The story of the Royal Aircraft Factory at Farnborough, forerunner of the World's premier aeronautical research establishment wherein were designed a diversity of aircraft including many of those that equipped the RFC, RNAS and RAF during the First World War. Originally established to build observation balloons for the Victorian British Army, the Factory later expanded to employ over 3500 people by mid-1916, at which time it became the subject of a political controversy that ended in a judicial enquiry. In 1918 its title was changed to the Royal Aircraft Establishment, not only to avoid a clash of initials with the newly formed Royal Air Force but to better define its changing role. Each of the many designs for airships and aeroplanes that were produced by the Factory between 1908 and 1918 is described in detail, illustrated by photographs, and with three-view drawings provided for the more prominent designs.

The US Air Service in World War 1 Maurer Maurer,1978

The Global Commercial Aviation Industry Sören Eriksson,Harm-Jan Steenhuis,2015-07-16 This book provides a state-of-the-art overview of the changes and development of the civil international aircraft/aviation industry. It offers a fully up-to-date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives, which include economic, geographical, political and technological points of view. The aircraft industry is characterized by very complex, high technology products produced in relatively small quantities. The high-technology requirements necessitate a high level of R&D. In no other industry is it more of inter-dependence and cross-fertilisation of advanced technology. Consequently, most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft, transformation of the aviation industry in Central and Eastern Europe, including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on

the aircraft industry and its development in different regions.

Sagittarius Rising Cecil Lewis,2014-05-27 A memoir by a WWI fighter pilot, with the adventurous spirit of War Horse and the charm of The Little Prince A singular, lyrical book, Sagittarius Rising is at once an exuberant memoir from the Lost Generation and a riveting tale of the early days of flight during World War I. Cecil Lewis lied his way into the British Army's Royal Flying Corps at age sixteen and was ordered to a squadron on the Western Front only a year later. At the time, flying was so new that designers hadn't even decided on basic mechanics such as how many wings a plane should have. Despite this, Lewis mastered virtually every kind of single-engine plane in the RFC, going on to excel in active duty and even to dogfight the Red Baron—and live to tell the tale. Full of infectious charm and written with the prose and pacing of a novel, Sagittarius Rising beautifully recounts Lewis's harrowing exploits in the sky alongside his wild times of partying and chasing girls while on leave in London. His coming-of-age story is unlike any other WWI memoir you've read before. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world.
