The Sukhoi Su-24 Stanislaw Krzysztof Mokwa,2020-02-19 Su-24 (Fencer) is a Soviet jet bomber with variable-geometry wings. The aircraft was supposed to be a response to the American F-111, and therefore it's structurally similar. Su-24 can operate in any weather conditions, also at night. It was designed to carry tactical nuclear weapons. In the 1960s, the military command of the Soviet Union set requirements for a new attack aircraft that would be able to operate despite strong ant-aircraft defense of NATO troops. An aircraft was expected to fly on a very low altitude at a very high speeds. Initially, it was based on Su-7 and Su-15 airframes, but due to the decision to use variable-geometry wing, it was necessary to build a completely new structure. Variable geometry allowed to achieve high speeds while maintaining good takeoff and landing characteristics. This is how Su-24 was born. The first prototype was flown on July 2, 1967 (marked as T6-1), and the second on January 17, 1970 (T6-2I). Variable-geometry wings were only used in the second prototype. In December 1971, the first serial Su-24 was built, but due to the prolonged acceptance tests (lasting until 1974), the aircraft officially did

not become operational until February 1975. Su-24 was named Fencer in the NATO code.

Sukhoi Su-27 Flanker E. Gordon,Yefim Gordon,1999 The Su-27 entered service with the Russian Air Force in the mid-1980s. This comprehensive history is based on documents supplied from Sukhoi, interviews with design and engineering employees of the company, and all available information that has been published on this deadly aircraft. Contains development history, operational service history, technical details, and explanations of each model in the range. Technical drawings, photos, and text combine to make this the ultimate Sukhoi Su-27 reference.

Su-33: Russia's Carrier-Borne Strike Fighter Hugh Harkins,2019-07-07 The intent of this volume is to detail the Sukhoi Su-33 (Su-27K) fourth generation naval strike fighter aircraft design procured for service aboard the Soviet Union (later Russian Federation) Project 1143.5 Aircraft Carrying Heavy

Cruiser, Admiral of the Fleet of the Soviet Union, Kuznetsov. The volume covers the evolution of the T-10K, which was developed for service as the Su-33, and the limited updates introduced. All technical information regarding the aircraft, systems and weapons have been provided by the respective designers/developers, as has most of the graphic material, with technical and graphic input from other entities such as the Ministry of Defence of the Russian Federation. Certain elements of text, where pertinent, are taken from the volume 'Sukhoi Su-27SM(3)/SKM' (Harkins, 2016) and 'Russian/Soviet Aircraft Carrier & Carrier Aviation Design & Evolution Volume 2' (Harkins, 2017). No attempt is made to detail the Su-27KUB experimental design or the Chinese Su-33 copy, the Shenyang J-15, which are outside the scope of the volume, although both are referred to in the addendum.

Sukhoi Su-34 'Fullback': Russia's 21st Century Striker Hugh Harkins, 2013-10-02 Su-34 The Su-34 'Fullback' was developed from the Su-27 'Flanker' interceptor/fighter as a fourth plus generation strike aircraft for service with the Russian Air Force. Conceived in the twilight years of the Soviet Union, the

aircraft weathered the financial crisis that gripped post communist Russia following the collapse of the Soviet Union in the early 1990's, maturing into an advanced strike aircraft, deliveries to the Russian Air Force commencing in late 2006. The aircraft is currently in service with increasing numbers being ordered to replace that countries aging fleet of Su-24M/M2 strike aircraft. It is also planned for the Su-34 to replace the Su-24MR in the tactical reconnaissance role. This volume covers the program from conception to operational service with chapters describing the aircraft, systems and weapons, production, flight testing and initial service. The text is complimented by black and white photographs

The Great Book of Fighters William Green, Gordon Swanborough, 2001 This epic undertaking in

the field of aviation publishing records the history of every fighter aircraft ever flown -- more than 1,200 in all! Whether it's an obscure prototype that never flew in combat or a renowned warbird from World War I, World War II, Korea, Vietnam or the Gulf War, each entry is listed alphabetically by manufacturer's name and accompanied by a selection of photography, exclusive color profile drawings and fabulous cutaways.

Superfighters Mel Williams, 2002 His in-depth look at new-generation fighter programs under development around the world profiles Lockheed Martin's F-22A Raptor and F-35 Joint Strike Fighter, as well as the Eurofighter Typhoon, Saab Gripen, Dassault Rafale and Sukhoi family of Su-27 derivatives, commonly referred to as the Super Flankers. The Gripen, Rafale and some Su-27 subtypes have already entered service. The Eurofighter will be next and the two American fighters are scheduled to join the inventory over the next decade. In full color throughout, this unique new book is the first to cover all of the emerging fighter platforms, and is packed with superb air-to-air photos, specifications and tables, 3-views, technical drawings and magnificent artwork.

The Encyclopedia of Modern Military Aircraft Paul E. Eden,2004

Yakovlev Aircraft Since 1924 Bill Gunston,Yefim Gordon,1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.

Sukhoi Su-27 Flanker E. Gordon,Yefim Gordon,Peter Davison,2006 Recognized as one of the best fighters of the 1990s, the Su-27 Flanker is a single-seat supersonic interceptor that is often declared the finest and most successful fighter of the Cold War era. Designed by Sukhoi OKB, the imposing fighter quickly gained popularity and respect from countries all across the globe. Intended to be a direct competitor to the new generation of American fighters such as the F-15, the Su-27 was designed with outstanding range, heavy armament, and high agility. Excellent performance, handling, and serviceability have made the aircraft popular with its pilots and ground personnel alike. Equipped with an analog fly-by-wire control system, a full avionics suite, and up to 10 air-to-air missiles, the

Flanker also features a rearward-facing radar between the engines, allowing it to fire at targets behind the aircraft. Outfitted with two Lyul'ka AL-31F turbofans, each 12,500 kgp (27,557 lb st) with afterburning, the Su-27's high thrust-to-weight ratio and refined aerodynamics allow superb flight characteristics at high angles of attack. Yefim Gordon and Peter Davison are the authors of several books on Soviet aircraft including the Specialty Press titles Mikoyan Gurevich MiG-29 Fulcrum and Mikoyan Gurevich MiG-15 Fagot. Over 300 photos illustrate the story of the Su-27. Topics covered include design, development, structural detail, international production, trials, upgrades and generations, comparisons, overseas sales, and much more. This book is a must have for all warbird enthusiasts!

Sukhoi S-37 and Mikoyan Mfi Yefim Gordon, 2001 Conceived in the early 1980s to ease the threat posed by the American ATF program, these fighters were developed as the Soviet Union's fifth-generation fighters. This book gives a detailed account of how Russia's two leading fighter aircraft designers competed for the order and how a third contender never made it to the hardware stage. It

deals with the way these aircraft were conceived, designed, built, and flown.

B-1B Mike Spick, 1986-01-01 Traces the development of the controversial B-1 bomber, describes its specifications and capabilities and discusses the aircraft's role in U.S. strategic planning

Sukhoi Su-24 Yefim Gordon, Dmitriy Komissarov, 2015 Developed in the Soviet Union in the 1960s, the Su-24 tactical bomber has become one of the most successful aircraft in its class. Featuring delta wings and auxiliary lift engines meant to improve its field performance, the first prototype turned out to be more of a liability than an asset and the aircraft was redesigned to have variable geometry wings. The Su-24 had its baptism of fire in the Afghan War and was also exported to Iraq, Iran, Algeria, Libya and Syria, seeing action in some of these countries. At home, Russian Air Force Su-24s were heavily involved in the first and second Chechen campaigns and the type has undergone a mid-life update allowing it to carry precision-guided munitions, and is still going strong. Illustrated with over 750 photographs, many previously unpublished, as well as line drawings, color side views, insignia, unit badges and nose art this latest addition to the Famous Russian Aircraft series will be of interest to

aviation enthusiasts and scale modelers alike.

Cockpits of the Cold War Donald Nijboer,2003 This pictorial book looks inside the cockpit of aircraft from 1947 to 1965 from the United States, United Kingdom, Sweden, Canada, France and the Soviet Union. Featured aircraft includes a pilot's perspective on what it was like to fly.

War is Boring David Axe,Matt Bors,2010-08-03 Read David Axe's blogs and other content on the Penguin Community. The war memoir as graphic novel-an utterly unforgettable and highly original look at war in the 21st century. Street battles with spears and arrows in sweltering East Timor. Bone-jarring artillery duels in Afghanistan's mountains. Long patrols on the sandy wastes of southern Iraq. For four years, war was life for David Axe. He was alternately bored out of his mind and completely terrified. It was strangely addictive. As a correspondent for The Washington Times, C-SPAN and BBC Radio, Axe flew from conflict to conflict, reveling in death, danger, and destruction abroad while, back in D.C., his apartment gathered dust, his plants died, and his relationships withered. War reporting was physically, emotionally, and financially draining-and disillusioning. Loosely based on the web comic of

the same name, with extensive new material, War Is Boring takes us to Lebanon and Somalia; to arms bazaars across the United States; to Detroit, as David tries to reconnect with his family-and to Chad, as David attempts to bring attention to the Darfur genocide. Watch a Video

Sukhoi Su-25 Frogfoot Yefim Gordon,2004-09-30 The Sukhoi Su-25 Frogfoot is one of the world's most effective close air support aircraft and is the only true armored attack aircraft still in production. The State trials of the aircraft were completed in December 1980 and it became operational in the following year. During the production run a number of improvements were incorporated, derived from experience gained during operations in the Russian campaign against Afghanistan. Throughout the entire Afghan campaign, Su-25s launched a total of 139 guided missiles of all types against Mujahideen positions. On average each aircraft performed 360 sorties per year, which was considerably higher than any other combat type in Afghanistan. By the end of the war, the number of Su-25s deployed to Afghanistan had reached around 50 and they had carried out a total of 60,000 sorties.
