User-centered Web Development Jonathan Lazar,2001 Frequently, Web sites are designed without considering the needs of the users. As a result, the Web site often fails to fulfill its intended purpose. User-Centered Web Development guides readers through the process of designing Web-based resources based on the needs of the user. This text will take the reader from the initial idea of developing a Web site, through determining the mission of the Web site, collecting the requirements, designing the pages, performing usability testing, and implementing and managing a Web site. Further, large case studies will assist readers in comprehending how these user-centered design concepts can be applied to real-world settings. The author has shown how to implement his design concepts in three case studies spread throughout the book, a non-profit, an educational Web site and Eastman Kodak.

The Metaphorical Use of Language in Deuterocanonical and Cognate Literature Markus Witte,Sven Behnke,2015-01-01 Metaphors are a vital linguistic component of religious speech and serve as a cultural indicator of how groups understand themselves and the world. The essays compiled in this volume analyze the use, function, and structure of metaphors in Jewish writings from the Hellenistic-Roman period (including the works of Philo and the texts of Qumran), as well as in apocryphal early Christian texts and inscriptions.

McClish,2014-08-21 Praise for the First Edition . . . the book is a valuable addition to the literature in the field, serving as a much-needed guide for both clinicians and advanced students.—Zentralblatt MATH A new edition of the cutting-edge guide to diagnostic tests in medical research In recent years, a considerable amount of research has focused on evolving methods for designing and analyzing diagnostic accuracy studies. Statistical Methods in Diagnostic Medicine, Second Edition continues to provide a comprehensive approach to the topic, guiding readers through the necessary practices for understanding these studies and generalizing the results to patient populations. Following a basic introduction to measuring test accuracy and study design, the authors successfully define various measures of diagnostic accuracy, describe strategies for designing diagnostic accuracy studies, and present key statistical methods for estimating and comparing test accuracy. Topics new to the Second Edition include: Methods for tests designed to detect and locate lesions Recommendations for covariate-adjustment Methods for estimating and comparing predictive values and sample size calculations Correcting techniques for verification and imperfect standard biases Sample size calculation for multiple reader studies when pilot data are available Updated meta-analysis methods, now incorporating random effects Three case studies thoroughly showcase some of the questions and statistical issues that arise in diagnostic medicine, with all associated data provided in detailed appendices. A related web site features Fortran, SAS®, and R software packages so that readers can conduct their own analyses. Statistical Methods in Diagnostic Medicine, Second Edition is an excellent supplement for biostatistics courses at the graduate level. It also serves as a valuable reference for clinicians and researchers working in the fields of medicine, epidemiology, and biostatistics.

From Memory to Marble Elizabeth Rankin,Rolf Michael Schneider,2020-02-10 For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: From Memory to Marble is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as From Memory to Marble, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of From Memory to Marble to a range of interested readers. For more material you can browse at Stanford's database Voortrekker Monumentality: a digital archive.

Hörmander Spaces, Interpolation, and Elliptic Problems Vladimir A. Mikhailets, Aleksandr A. Murach, 2014-07-14 The monograph gives a detailed exposition of the theory of general elliptic operators (scalar and matrix) and elliptic boundary value problems in Hilbert scales of Hörmander function spaces. This theory was constructed by the authors in a number of papers published in 2005–2009. It is distinguished by a systematic use of the method of interpolation with a functional parameter of abstract Hilbert spaces and Sobolev inner product spaces. This method, the theory and their applications are expounded for the first time in the monographic literature. The monograph is written in detail and in a reader-friendly style. The complete proofs of theorems are given. This monograph is intended for a wide range of mathematicians whose research interests concern with mathematical analysis and differential equations.

Elementary Particle Physics Yorikiyo Nagashima, 2013-02-08 This second volume of Elementary Particle Physics, Foundations of the Standard Model, concentrates on the main aspects of the Standard Model by addressing developments from its establishments to recent progress and some future prospects. Two subjects are clearly separated which cover dynamics of the electroweak and strong interactions, but basso continuo throughout the book is a bridge between theory and experiments. All the basic formulas are derived from the first principle, and corrections to meet the experimental accuracy are explained. This volume is a logical step up from volume I but can also be considered and used as an independent monograph for high energy and theoretical physicists, as well as astronomers, graduate students and lecturers in physics.

Fusion Plasma Physics Weston M. Stacey, 2012-11-09 This revised and enlarged second edition of the popular textbook and reference contains comprehensive treatments of both the established foundations of magnetic fusion plasma physics and of the newly developing areas of active research. It concludes with a look ahead to fusion power reactors of the future. The well-established topics of fusion plasma physics -- basic plasma phenomena, Coulomb scattering, drifts of charged particles in magnetic and electric fields, plasma confinement by magnetic fields, kinetic and fluid collective plasma theories, plasma equilibria and flux surface geometry, plasma waves and instabilities, classical and neoclassical transport, plasma-materials interactions, radiation, etc. -- are fully developed from first principles through to the computational models employed in modern plasma physics. The new and emerging topics of fusion plasma physics research -- fluctuation-driven plasma transport and gyrokinetic/gyrofluid computational methodology, the physics of the divertor, neutral atom recycling and transport, impurity ion transport, the physics of the plasma edge (diffusive and non-diffusive transport, MARFes, ELMs, the L-H transition, thermal-radiative instabilities, shear suppression of transport, velocity spin-up), etc. -- are comprehensively developed and related to the experimental evidence. Operational limits on the performance of future fusion reactors are developed from plasma physics and engineering constraints, and conceptual designs of future fusion power reactors are discussed.

Happenstance Lester Fisher, 2021-09-07 A bastard boomer negotiates the maze of postwar America. Wrenched from his working single mother, and brought to Camp Pondosa by his grandfather who was Woods Manager for McCloud Rv. Lumber Co. After his WAC mother became X-ray tech at the McCloud hospital, and acquired a husband, the new family moved to R. A. Long's "planned city" of Longview, Washington. A shocking change for a country-bumpkin kid. He attended Catholic School in this pretentious mill town with its socially stratified culture of mill workers, overlords and timber barons. Catholic indoctrination led to the Franciscan Seminary. He survived into his 6th year at the college of San Luis Rey, CA, when love won out. This young man left the pursuit of the priestly vocation to pursue the woman he had dated since his fifteenth year. First collegiate in his family, he and his girl entered the daunting halls of ivy at University of Washington. Engaged to his high school sweetheart, graduation approached in the turbulent years of 1969.

A youth’s options were few during the Vietnam War. Having taken his Naval Officer Candidate School exam, he also applied for Peace Corps. The NOCS did not reply, but the Peace Corps invited him to Kenya. Parting with his xenophobic fiancé, he served in the idyllic Hills of Taita where began a romantic involvement with a Taita woman ... and her 3 children. Their happy two years together ended when he was exiled from Taita by his military induction notice. By happenstance, Richard Nixon had changed the course of his life. One young man’s account chronicles the most turbulent growth in United States history. These were expansions in technology, global influence, wealth, power, popular unrest, and human rights. These changed America from a isolationist, racist enclave, to the present confusing, liberating, imperialistic and ideologically-divided envy of the world.
