Will Kara make a new friend? Or is there something darker, possibly more dangerous in store for her?⁷ Kara is an ongoing watercolor children's comic written and illustrated by Becca Hillburn. Programmable Integrated Photonics José Capmany, Daniel Pérez, 2020-02-21 This book provides the first comprehensive, up-to-date and self-contained introduction to the emergent field of Programmable Integrated Photonics (PIP). It covers both theoretical and practical aspects, ranging from basic technologies

and the building of photonic component blocks, to design alternatives and principles of complex programmable photonic circuits, their limiting factors, techniques for characterization and performance monitoring/control, and their salient applications both in the classical as well as in the quantum information fields. The book concentrates and focuses mainly on the distinctive features of programmable photonics, as compared to more traditional ASPIC approaches. After some years during which the Application Specific Photonic Integrated Circuit (ASPIC) paradigm completely dominated the field of integrated optics, there has been an increasing interest in PIP. The rising interest in PIP is justified by the surge in a number of emerging applications that call for true flexibility and reconfigurability, as well as low-cost, compact, and low-power consuming devices. Programmable Integrated Photonics is a new paradigm that aims at designing common integrated optical hardware configurations, which by suitable programming, can implement a variety of functionalities. These in turn can be exploited as basic operations in many application fields. Programmability enables, by means of external control signals, both chip reconfiguration for multifunction operation, as well as chip stabilization against non-ideal operations due to

fluctuations in environmental conditions and fabrication errors. Programming also allows for the activation of parts of the chip, which are not essential for the implementation of a given functionality, but can be of help in reducing noise levels through the diversion of undesired reflections.

Afraid Sharon McGovern, 2008-09-18 The heartbreaking but hugely inspiring account of a little girl's survival through extreme abuse and her inspiring fight for justice ... At the age of four years old Sharon McGovern knew that her new stepfather was doing something he shouldn't, touching her in the wrong way and threatening her so she wouldn't tell her Mummy. At the age of ten Sharon was raped by this monster, Michael Garvey, in a bed where her older and younger brother were sleeping. It was an act of unspeakable cruelty. And it was the beginning: every night Sharon would hear the floorboards creak; every night Sharon lay awake, praying tonight he would be quick and the nightmare would be over. The abuse Sharon suffered went on for thirteen years. She reached out to a councillor, the very first adult she had ever told of the abuse, and he told her not to tell such lies and never to speak of it again. And she didn't until the day, forty years later, a fellow victim of Garvey - his own younger brother - arrived at her

door to tell her he was going to the police to report his brother for raping him. The report went nowhere and Sharon knew it was up to her to cage this paedophile for good. With unprecedented bravery, Sharon went to the police and faced the terror of her life in the dock. She looked into the whites of his eyes and proved - beyond doubt - that this man was a threat to children everywhere. Garvey was jailed and convicted of seven accounts of rape and numerous indecent assaults. He still remains in prison today.

of suddenly being asked to take over TOP GEAR. HEALTH, LOVE, MARRIAGE, SEX, DEATH and even RELIGION all come under his witty microscope as he poses the conundrum - MIDLIFE: CRISIS vs OPPORTUNITY ? There can only be one winner.
