Working Better with Age OECD,2018 Currently, Japan has the highest old-age dependency ratio of all OECD countries, with a ratio in 2017 of over 50 persons aged 65 and above for every 100 persons aged 20 to 64. This ratio is projected to rise to 79 per hundred in 2050. The rapid population ageing in Japan is a major challenge for achieving further increases in living standards and ensuring the financial sustainability of public social expenditure. However, with the right policies in place, there is an opportunity to cope with this challenge by extending working lives and making better use of older workers' knowledge and skills. This report investigates policy issues and discusses actions to retain and incentivise the elderly to work more by further reforming retirement policies and seniority-wages, investing in skills to improve productivity and keeping up with labour market changes through training policy, and ensuring good working conditions for better health with tackling long-hours working culture.

The Next Jihad Rev. Johnnie Moore,Rabbi Abraham Cooper,2020-10-13 The Next Jihad draws from the on-the-ground experience and personal testimonials of two of the world's leading advocates for religious freedom and human rights—one Jewish and one Christian—as they explain what's happening to Christians across Africa, why it matters, and what must be done now. Although news of Christians being killed overseas hits major media outlets from time

to time, the news quickly fades away while our fellow believers continue to suffer. Johnnie Moore, as he has done before, wants to awaken the church and American politicians to the daily horrors happening to Christians, focusing this time on Africa. While the world has been fixated on jihadist threats in the Middle East, terrorists from Nigeria to Kenya have had free reign to massacre on a scale far beyond that of the terrorists in Iraq and Syria. Whole villages have been razed, mothers and children have been grotesquely killed, and an unabashed effort at ethnic cleansing has been embarked upon with unrelenting resolve. Their intention is to rid Africa of its Christians, either by forced conversion to Islam or by destruction and murder.

How to Talk about Videogames Ian Bogost, 2015-11-15 Videogames! Aren't they the medium of the twenty-first century? The new cinema? The apotheosis of art and entertainment, the realization of Wagnerian gesamtkunstwerk? The final victory of interaction over passivity? No, probably not. Games are part art and part appliance, part tableau and part toaster. In *How to Talk about Videogames*, leading critic Ian Bogost explores this paradox more thoroughly than any other author to date. Delving into popular, familiar games like Flappy Bird, Mirror's Edge, Mario Kart, Scribblenauts, Ms. Pac-Man, FarmVille, Candy Crush Saga, Bully, Medal of Honor, Madden NFL, and more, Bogost posits that videogames are as much like appliances as they are like art and media. We don't watch or read games like we do films and novels and paintings, nor do we perform them like we might dance or play football or Frisbee. Rather, we do something in-between with games. Games are devices we operate, so game critique is both serious cultural currency and self-parody. It is about figuring out what it means that a game works the way it does and then treating the way it works as if it were reasonable, when we know it isn't. Noting that the term games criticism once struck him as preposterous, Bogost observes that the idea, taken too seriously, risks balkanizing games writing from the rest of culture, severing it from the "rivers and fields" that sustain it. As essential as it is, he calls for its pursuit to unfold in this spirit: "God save us from a future of games critics, gnawing on scraps like the zombies that fester in our objects of study."
