KAWS Germano Celant, 2020 This catalogue documents the first exhibition in the Middle East by KAWS (Brian Donnelly, born 1974, USA). The solo show explores his career and vast oeuvre and features paintings and sculptures made over the past 20 years. KAWS' imagery has long possessed a sophisticated, dark humour, revealing the interplay between art and consumerism, referencing both art history and pop culture. Donnelly began his career in street art in the 1990s, becoming synonymous with the name KAWS, a tag that became a staple in his 'subvertissements' (modifications of commercial works). In addition to more than 40 major pieces exhibited in the Garage Gallery, examples of commercial collaborations designed by KAWS, among them sneakers, skateboards, and toys are on view in a separate archive above Cafe 999. A massive 5-meter-tall sculpture, Companion (Passing through) (2013), in the Fire Station courtyard and an inflatable 40-metre public artwork at the Dhow Harbour, Holiday (2019), also serve to highlight the exhibition. Exhibition: Fire Station, Doha, Qatar (25.10.2019-25.01.2020)

King of the Bench: No Fear! Steve Moore, 2017-03-28 From the nationally syndicated cartoonist of "In the Bleachers" comes a new, highly illustrated middle grade series about Steve, who plays the same position in every sport: bench-warmer. Perfect for fans of Diary of a Wimpy Kid and Timmy Failure, King of the Bench is an ode to teammates, underdogs, and bench-warmers everywhere. Steve is King of the Bench. No brag. It's just a fact. But this year, Steve and his friends are excited to try out for the Spiro T. Agnew Middle School baseball team. The only problem is, after watching another player get beamed by a fastball, Steve has developed a serious case of bean-o-phobia--the fear of getting hit by a pitch. If Steve ever wants to get off the bench and get in the game, he's going to have to muster up some courage, and fast. Oh, and if you're wondering why Steve would write a book and tell total strangers all about the humiliating phobia that almost ruined his first year on the baseball team? Duh. It's pretty much a rule that you spill your guts when you write a book about yourself.

Symzonia John Cleves Symmes,2020-09-03 Symzonia is a hollow Earth story of the extreme. The way the planet is can best be compared to a ball of yarn – a shell with large holes at both the top and bottom that the sea opens into. The inside is occupied by other people, one of them being Symzonians.

Black God, Vol. 14 Dall-Young Lim,2011-10-25 With Mana on board, Keita is outnumbered five girls to one guy in the modest Tokyo apartment. Although Mana has been welcomed in as part of the family, her disdain for humans and mototsumitama who ally with them is more than evident. Can Mana set aside her resentment to help Kuro and Keita find and defeat the elusive Ghost?

The Anime Machine Thomas Lamarre,2013-11-30 Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP's manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the “animetic machine” encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized

world around us.
