Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Demonstratives Holger Diessel,1999 All languages have demonstratives, but their form, meaning and use vary tremendously across the languages of the world. This book presents the first large-scale analysis of demonstratives from a cross-linguistic and diachronic perspective. It is based on a representative sample of 85 languages. The first part of the book analyzes demonstratives from a synchronic point of view, examining their morphological structures, semantic features, syntactic functions, and pragmatic uses in spoken and written discourse. The second part concentrates on diachronic issues, in particular on the development of demonstratives into grammatical markers. Across languages demonstratives provide a frequent historical source for definite articles, relative and third person pronouns, nonverbal copulas, sentence connectives, directional preverbs, focus markers, expletives, and many other grammatical markers. The book describes the different mechanisms by which demonstratives grammaticalize and argues that the evolution of grammatical markers from demonstratives is crucially distinct from other cases of grammaticalization.

The Ugly Duckling (Illustrated) Hans Christian Andersen,2018-10-14 Rare edition with unique illustrations. Hans Christian Andersen was a Danish author best known for writing children's stories including *The Little Mermaid* and *The Ugly Duckling*. But he didn't just write short stories, and his intended audience wasn't restricted to children. In addition to his fairy tales, Andersen wrote poems, plays, novels, travel books, essays, and more. He hungered for recognition at home (Denmark) and abroad-and he got it! Eventually. Today, his stories can be read in over one hundred languages. But no matter what language they're in, Andersen's tales have got something for everyone. In them, you'll find beauty, tragedy, nature, religion, artfulness, deception, betrayal, love, death, judgment, penance, and-occasionally-a happy ending. They're complex tales, but since Andersen himself was pretty complex, we like to think that art imitates life. Or something like that. *The Ugly Duckling* is a literary fairy tale by Danish poet and author Hans Christian Andersen. The story tells of a homely little bird born in a barnyard who suffers abuse from the others around him until, much to his delight (and to the surprise of others), he matures into a beautiful swan, the most beautiful bird of all. The story is beloved around the world as a tale about personal transformation for the better.

Art in the Streets Jeffrey Deitch,Roger Gastman,Aaron Rose,2011 A catalog of an exhibition that surveys the history of international graffiti and street art.

Sun of Suns Karl Schroeder,2007-07-31 It is the distant future. The world known as Virga is a fullerene balloon three thousand kilometers in diameter, filled with air, water, and aimlessly floating chunks of rock. The humans who live in this vast environment must build their own fusion suns and towns that are in the shape of enormous wood and rope wheels that are spun for gravity. Young, fit, bitter, and friendless, Hayden Griffin is a very dangerous man. He's come to the city of Rush in the nation of Slipstream with one thing in mind: to take murderous revenge for the deaths of his parents six years ago. His target is Admiral Chaison Fanning, head of the fleet of Slipstream, which conquered Hayden's nation of Aerie years ago. And the fact that Hayden's spent his adolescence living with pirates doesn't bode well for Fanning's chances.

The Return of the Mother Andrew Harvey,2013-08-20 Adapted from a series of lectures on the historical basis and current resurgence of the sacred feminine, given by Andrew Harvey at the California Institute of Integral Studies in Spring 1994, *The Return of the Mother* is a profound journey into the heart of the Divine Mother. In this comprehensive and groundbreaking work, mystical scholar Andrew Harvey unearths traces of the sacred feminine in major world religions—Hinduism, Islam (Sufism), Buddhism, Taoism, and Christianity—and in aboriginal and indigenous wisdom traditions. Harvey presents a scathing critique of the patriarchal distortions in religious history and doctrine that have obscured full knowledge of the Divine Mother, and shows how to reintegrate this vital aspect into the spiritual consciousness of humankind. *The Return of the Mother* offers a radical new perspective, balancing the historical overemphasis on transcendence by honoring the immanence of the divine in passionate engagement in the world. Only by cultivating a direct, respectful relationship with the transformative power of the sacred feminine can we alter our disastrous attitude of dissociation from nature, the body, sexuality, and the details of human life, and generate the energy and compassion needed to reverse the course of destruction we have set the planet—and all of life—hurtling toward. In lively question-and-answer sections, Harvey further illuminates these vital issues and takes a strong stand against our dependence on “gurus” and “masters,” proposing instead an egalitarian model of spiritual community based on intimate groups of mutually supportive guides and friends. *The Return of the Mother* is an eloquent and passionate call for all of us to rediscover and reclaim an authentic and empowering relationship to the divine, and recreate a sacred life-in-the-world.

The Really Inconvenient Truths Iain Murray,2008-04-22 Al Gore is bad for the planet... Talk about really inconvenient truths--that's one of the many you'll find in Iain Murray's rollicking exposé of environmental blowhards who waste more energy, endanger more species, and actually kill more people (yes, that's right) than the environmental villains they finger. Did you know that estrogen from birth control and morning after pills is causing male fish across America to develop female sex organs? Funny how pro-choice and environmentalist liberals never talk about that. Or how about this: the Live Earth concert to save the planet released more CO2 into the atmosphere than a fleet of 2,000 Humvees emit in a year? We hear a lot about AIDS in Africa, but the number one killer of children in much of Africa is malaria--and guess who was responsible for banning the pesticide that used to have malaria under control? Iain Murray, a sprightly conservative environmental analyst with a long record of skewering liberal hypocrisy, has dug up seven of the all-time great environmental catastrophes caused by the Left and exposed them in *The Really Inconvenient Truths*.

Fresh Air Smells Funny Rik Reinking,2008 An outstanding collection which explores the common urban space between street art and graffiti and the highly individualised ways in which both have developed in recent years. The diverse artworks include a vast array of influences: sculpture, painting and drawing as well as everyday objects and stencils. The works draw attention to social conditions, and re-hash the experience of public space - sometimes with humour, sometimes with confrontational politics.

Attack of the 50 Foot Blockchain David Gerard,2017-07-24 An experimental new Internet-based form of money is created that anyone can generate at home; people build frightening firetrap computers full of video cards, putting out so much heat that one operator is hospitalised with heatstroke and brain damage. A young physics student starts a revolutionary new marketplace immune to State coercion; he ends up ordering hits on people because they might threaten his great experiment, and is jailed for life without parole. Fully automated contractual systems are proposed to make business and the law work better; the contracts people actually write are unregulated penny stock offerings whose fine print literally states that you are buying nothing of any value. The biggest crowdfunding in history attracts \$150 million on the promise that it will embody “the steadfast iron will of unstoppable code”; upon release it is immediately hacked, and \$50 million is stolen. How did we get here? David Gerard covers the origins and history of Bitcoin to the present day, the other cryptocurrencies it spawned including Ethereum, the ICO craze and the 2017 crypto bubble, and the attempts to apply blockchains and smart contracts to business. Plus a case study on blockchains in the music industry. Bitcoin and blockchains are not a technology story, but a psychology story. Remember: if it sounds too good to be true, it almost certainly is. “A sober riposte to all the upbeat forecasts about cryptocurrency” — New York Review of Books “A very convincing takedown of the whole phenomenon” — BBC News

Cross the Streets Paulo Lucas Von Vacano,2017 An iconic collection of street art and street photography as exhibited in Rome, the Eternal City.

Spatial Language Kenny R. Coventry,P. Olivier,2013-03-14 People constantly talk to each other about experience or knowledge resulting from spatial perception; they describe the size, shape, orientation and position of objects using a wide range of spatial expressions. The semantic treatment of such expressions presents particular challenges for natural language processing. The meaning representation used must be capable of distinguishing between fine-grained sense differences and ambiguities grounded in our experience and perceptual structure. While there have been many different approaches to the representation and processing of spatial expressions, most computational characterisations have been restricted to particularly narrow problem domains. The chapters in the present volume reflect a commitment to the development of cognitively informed computational treatments of spatial language and spatial representation. Therefore the chapters present computational work, empirical work, or a combination of both. The book will appeal to all those interested in spatial language and spatial representation, whether they work in artificial intelligence, cognitive science, cognitive psychology or linguistics.

The Noun Phrase Jan Rijkhoff,2004 Jan Rijkhoff investigates noun phrases--linguistic constructions with the noun as central element--in a representative sample of the world's 6000 languages and proposes a semantic model to describe their underlying structure. Assuming no knowledge of any formal or functional theory of grammar, he shows that the noun phrase word order patterns of any language can be derived from three universal ordering principles and furthermore that these principles are elaborations of a general ordering strategy, by which elements that belong together semantically tend to occur together syntactically.
