This guide tosses that notion into the trash bin. She covers GIFs, JPEGs, and PNGs, raster and vector graphics, CSS, Ajax effects, the canvas objects, SVG, geographical applications, and more -- everything that designers (and non-designers) use to literally paint the Web. More importantly, Shelley's own love of web graphics shines through in every example. Not only can you master the many different techniques, you also can have fun doing it. Topics in Painting the Web include: GIF, JPEG, PNG, lossy versus lossless compression, color management, and optimization Photo workflow, from camera to web page, including a review of photo editors, workflow tools, and RAW photo utilities Tricks for best displaying your photos online Non-photographic raster images (icons and logos), with step-by-step tutorials for creating popular Web 2.0 effects like reflection, shiny buttons, inlays, and shadows Vector graphics An SVG tutorial, with examples of all the major components Tips and tricks for using CSS Interactive effects with Ajax such as accordions and fades The canvas object implemented in most browsers Geographical applications such as Google Maps and Yahoo Maps, with programming and non-programming examples Visual effects such as forms and data displays in table or graphics Web design for the non-designer Graphics are not essential to the web experience, but they do make the difference between a site that's functional and one that's lively, compelling, and exciting. Whether you want to spruce up a website, use photos to annotate your stories, create hot graphics, or provide compelling displays for your data, this is the book for you.
