TRADES UNION CONGRESS

1. **The Blue-Coated Worker** Robert Reiner, 1978-09-07 This 1978 book addresses the way in which police unions had become increasingly militant and formed a significant political force, demanding better pay and conditions and a say in social and penal policy. In this study, Robert Reiner considers the development of British police unionization, and the views of the police themselves towards unionism. Dr Reiner is able to relate these two issues to one another particularly insightfully as a result of his interviews with a sample of policemen in a large city force, which illustrate the policeman's world-view. The central contention of the book is that the police occupy a contradictory position in class structure. Economically they are employees who form unions to advance their interests like other workers, but their political role of preserving the social order imposes special inhibitions on the character of their unionism, and can alienate them from other trade unionists.

2. **Transition from Below** Karl Von Holdt, 2003 Drawing on interviews of workers and unionists of the Highveld Steel company, traces the transition from the apartheid regime to post-colonialism and democracy. Focuses on social movement unionism, popular alliances, and ungovernability in the community and the workplace.

3. **Labour in the Global South** International Labour Office, 2012 Labour in the Global South is an exciting contribution to the new field of global labour studies. It identifies in ten clearly written chapters the innovative and creative responses to the challenges facing labour worldwide.? -Edward Webster, University of Kassel, Germany, and University of the Witwatersrand, South Africa.

4. **Striking Back** Jeremy Baskin, 1991

5. **The Management of Labour** Christopher Alec Wright, 1995 This is an account of changes in the policies and practices of Australian employers in the 20th century. It highlights the rich and varied history of Australian employers and the various ways and means by which they have attempted to maximize their control

6. **Dictionary of Policing** Tim Newburn, Peter Neyroud, 2013-06-17 Covers the rapidly developing and increasingly professionalized field of contemporary policing with its new emphasis on skills, standards and knowledge.

7. **HLanganani Basebenzi** , 2005 A history of South Africa's largest union federation, COSATU. Traces the history of the trade union movement in South Africa.

8. **Policing and Boundaries in a Violent Society** Guy Lamb, 2022 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service (SAPS). By means of a historical analysis of South Africa, this book introduces a new concept, 'police frontierism', which illuminates the nature of the relationships between the police, policing and boundaries, and can potentially be used for future case study research. Drawing on a wealth of research, this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa, and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary. Focusing on cases of high-density police operations, public-order policing and the recent policing of the COVID-19 lockdown, this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa. This book will be of interest to scholars and students interested in policing in post-colonial societies characterised by high levels of violence, as well as police work and police militarization--

9. **Commissioner's Letter** United States. Work Projects Administration,

10. **Aspects of Disability Law in Africa** Ilze Grobbelaar-du Plessis, Tobias Hertzog Van Reenen, 2011

11. **My Big Fat Gupta Wedding** Zapiro, 2013 A reflective summary in cartoon form, this 18th annual compilation chronicles South Africa's political events in the year 2013. Packed with biting humor and cutting-edge satire, it showcases South Africa's sharpest cartoonist and provides an insight into the country's political situation. Open and honest, these cartoons ensure that no event passes by without comment or a laugh.

12. **The War Against Ourselves** Jacklyn Cock, 2007 For many people nature means wilderness and wild animals. It is experienced indirectly through magazines and television programs or through visiting the highly managed environments of national parks. Nature, however, is not external, separate from the world of people--we live in nature and interact with it daily. In this book, Jacklyn Cock describes how these intricate and complex interconnections, seen and unseen, are often ignored. Each of the ten chapters examines an aspect of our relationship with nature. The War Against Ourselves compels us to reexamine our relationship with nature, to change our practices and dissolve present binary divisions such as people vs. animals, economic growth vs. environmental protection, nature vs. culture. It demonstrates the need for an inclusive politics which brings together peace, social, and environmental justice activists who believe that another world is both possible and necessary. -- Book cover.

13. **Religious Diversity in the Workplace** Jawad Syed, Alain Klarsfeld, Faith Wambura Ngunjiri, Charmine E. J. H? rtel, 2017-12-28 Employees bring their beliefs and religious values to work, and this can be a source of either positive performance or negative conflict. Social conflicts around religion impact more than societies and communities. They also impact organizations. 'Anti-religion' sentiments tend to be based on the perception that religion can be neatly separated from the 'more acceptable/palatable' spirituality, but this ignores the fact that - for most people - the two are intimately intertwined and inseparable. As religious identity is salient for a majority of the world's population, it is thus an important aspect of organizations - particularly those with a large and diverse body of employees. This handbook provides a timely and necessary analysis of religious diversity in organizations, investigating the role of national context, the intersections of religion with ethnicity and gender, and approaches to diversity management.

14. **Colonels & Cadres** Jacklyn Cock, 1991 Why, given that most people have a strong impulse for self preservation, do individuals fight wars? Jacklyn Cock believes that the answer lies in gender relations, in particular the way in which femininity and masculinity are defined, and the power of the military in society. Nothing throws the question of gender into sharper relief than does war. War does not challenge women to prove that they are women, whereas combat is seen so often as the proof of 'manliness'. In Colonels and Cadres, Jacklyn Cock explores the link between war and gender in a specific society and period - South Africa in the 1980s. She documents interviews with victims of the violence, resisters and militarists - colonels and soldiers in the South African Defence Force (SADF), and cadres in the ANC's Umkhonto we Sizwe (MK). Their fascinating and sometimes horrifying reports provide unsettling insights into the nature of war and its effects on individuals and society, revealing that, although the SADF and MK reflect all the myriad differences between a conventional and a guerrilla army, women in both armies have been the subject of similar processes of incorporation and exclusion. As provocative and well-written as her book Maids and Madams, Jacklyn Cock's Colonels and Cadres is gripping reading, both for the haunting personal accounts and the clearly articulated analysis of the issues involved.

15. **Post in Transformation** Sampie Terreblanche, Solomon Johannes Terreblanche, 2012 At the centre of the analysis is the unmasking of manoeuvres and backroom strategies of manipulation devised by American and British companies with a presence in South Africa, in collaboration with the Mineral Energy Complex (MEC) to circumscribe the ANC's future policies. He recounts some of his personal experiences and also exposes secret negotiations and deal-making which occurred behind the scenes - issues which ordinary South Africans would otherwise never come to know. Terreblanche also evaluates the performance of the ANC-led government since 1994, focusing on South Africa's affirmative action policies--P. [4] of cover.

16. **The General's Son** Miko Peled, 2016 A powerful account, by Israeli peace activist Miko Peled, of his transformation from a young man who'd grown up in the heart of Israel's elite and served proudly in its military into a fearless advocate of nonviolent struggle and equal rights for all Palestinians and Israelis. His journey is mirrored in many ways the transformation his father, a much-decorated Israeli general, had undergone three decades earlier. Alice Walker contributed a foreword to the first edition in which she wrote, There are few books on the Israel/Palestine issue that seem as hopeful to me as this one. In the new Epilogue he takes readers to South Africa, East Asia, several European countries, and the West Bank, Gaza, and Israel itself.

17. **The Wiehahn Commission** University of Cape Town. Southern Africa Labour and Development Research Unit, 1979 Working paper reviewing recommendations and commentary on the Wiehahn Commission concerning labour legislation and labour relations in South Africa R - comprises attitudes of trade unions, industrial enterprise and chamber of commerce, etc., relating to freedom of association, control of unions, vocational training and job reservation for black Africans, etc. ILO mentioned.

18. **Essential Evidence** David Theodor Zeffertt, Andrew Peter Paizes, 2010

19. **South Africa's Police** Gavin Cawthra, 1992

20. **Trade Unionism in South Africa** Trades Union Congress, 1974
