**Avro Arrow** Arrowheads,2004 The illustrated memoir of the most advanced fighter jet of the 1950s. At its creation in the mid-1950s, the Avro Arrow was a fighter jet without equal. This Cold War aircraft was twenty years ahead of its time. Unfortunately, political realities resulted in the complete termination of the Arrow project. Cancellation of the Arrow called for the destruction of all photos, drawings, models, specifications and tooling. Even the aircraft themselves were disassembled and destroyed. Avro Arrow is a fascinating historical record with an extensive collection of rare and highly prized photos, drawings and diagrams. Using two hundred images, the book traces the story of the Arrow from its inception to roll out and flight test, including advanced proposals for the development of future version. Primary sources include: Taped interviews, test pilots' firsthand impressions, Avro officials and many plant personnel Surviving company records Declassified government documents. Diagrams offer stunning details such as the North American strategic defense zones and interception tactics proposed for bomber attacks. This book concentrates solely on the vision, design and technical excellence of the airplane itself rather than the politics of its demise.

**Energy, Complexity and Wealth Maximization** Robert Ayres,2016-07-14 This book is about the mechanisms of wealth creation, or what we like to think of as evolutionary progress. The massive circular flow of goods and services between producers and consumers is not a perpetual motion machine; it has been dependent for the past 150 years on energy inputs from a finite storage of fossil fuels. In this book, you will learn about the three key requirements for wealth creation, and how this process acts according to physical laws, and usually after some part of the natural wealth of the planet has been exploited in an episode of creative destruction. Knowledge and natural capital, particularly energy, will interact to power the human wealth engine in the future as it has in the past. Will it sputter or continue along the path of evolutionary progress that we have come to expect? Can the new immaterial wealth of information and ideas, which makes up the so-called knowledge economy, replace depleted natural wealth? These questions have no simple answers, but this masterful book will help you to understand the grand challenge of our time. Praise for Energy, Complexity and Wealth Maximization: "... people who run the modern world (politicians, economists and lawyers) have a very poor grasp of how it really works because they do not understand the fundamentals of energy, exergy and entropy ... those decision-makers would greatly benefit from reading this book ..." - Vaclav Smil, Distinguished Professor Emeritus, University of Manitoba "... A grandiose design; impressive, worth reading and reflecting!" - Prof. Dr. Ernst Ulrich von Weizäcker, Founder of Wuppertal Institute; Co-President of the Club of Rome, Former Member of the German Bundestag, co-chair of the UN's Resource Panel "... The book is a must read for concerned citizens and decision makers across the globe." - RK Pachauri, Founder and Executive Vice Chairman, The Energy and Resources Institute (TERI) and ex-chair, International Panel on Climate Change (IPCC)

*Caracalla* Ilkka Syväanne,2017-02-28 This biography of the Roman Emperor Caracalla challenges his tyrannical reputation with a revealing narrative of his social reforms and military campaigns. Caracallahas one of the worst reputations of any Roman Emperor. Many ancient historians were very hostile, and the 18th century English historian Edward Gibbon even dubbed him the common enemy of mankind. Yet his reign was considered by at least one Roman author to be the apogee of the

Roman Empire. He was guilty of many murders and massacres—including that of his own brother, ex-wife and daughter. Yet he instituted the Antonine Constitution, granting citizenship to all free men in the Empire. He was also popular with the army, improving their pay and cultivating the image of sharing their hardships. Historian Ilkka Syvanne explains how the biased ancient sources in combination with the stern looking statues of the emperor have created a distorted image of the man. He then reconstructs a chronology of Caracalla's reign, focusing on his military campaigns and reforms, to offer a balanced view of his legacy. Caracalla offers the first complete overview of the policies, events and conflicts he oversaw and explains how and why these contributed to the military crisis of the third century.

Angels Don't Play this HAARP Nick Begich, Jeane Manning, 2002 The U.S. Government has a new ground based Star Wars weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications systems. Change weather patterns over large areas. Interfere with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then X-ray the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings--Back cover

**Beautifully Unique Sparkleponies** Chris Kluwe, 2013-06-25 Hi. In your hands, right now, you hold the culmination of thousands of years of human intelligence, ingenuity, and brilliance. Now put your goddamn phone down and pay attention to my book. What is in my book, you ask? (I'm really glad you asked, by the way, because now I get to tell you.) Time travel. Gay marriage. Sportsballing. Futuristic goggles that DO NOTHING. Tiny brags from my publisher, stuff like: This is an uproarious, uncensored take on empathy, personal responsibility, and what it means to be human. Excessive brags about myself: An extraordinarily clever, punishingly funny, sharp-tongued blogosphere star, NFL player, husband and father, one-time violin prodigy, voracious lifetime reader, obsessive gamer, and fearless champion of personal freedom. Oh, and also an essay on the Pope's Twitter account. Honestly, if that doesn't draw you in, there's no hope left for humanity. I also give my own funeral eulogy, in case you were hoping I'd go away and die now! So please, join me in the glorious art of windmill tilting by reading this collection of rousing, uncensored personal essays, letters, and stories (I have no idea why that's in quotes). Join the herd of Beautifully Unique Sparkleponies. (You know you want to.)
