History of Basketball IntroBooks, 2018-02-19 In the history of mankind, sports occupy a very centre place in defining the era and cultures of a concerned time period. In ancient times, several sports sprouted up that have still existed, and some still keep themselves active. The Olympics has been with us for the last 3 millennia ever since Greeks ran the plain farms to engage the invading Persians, what we call as the battle of Marathon from which 'marathon' itself got invented. In fact, nearly every sport we see today has had some kind of old connection with it. Soccer is a medieval era sport, cricket got invented during Victorian times, baseball after the civil war in America ended and not to forget, golf that has possible Roman origins. Considering the importance of all sorts of sports that have existed since antiquity, one such game that deserves our attention is none other than basketball. Basketball can very much be easily compared with its contemporary sport of soccer in regards to its following in the international arena and the nature of the game that is very similar to football. And yet, basketball remains one of the most overlooked sports in our modern times, in spite of its huge following. Official data suggests not less than 250 million people playing basketball every day spread across five continents. If that wasn't enough then the official data by NBA and its partners nearly doubles that figure if thousands of schools, colleges and institutes that hold their own championships the world over are included in the aggregate.

Hidden Agendas Jane Kelsey, 2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in

this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Social Ecology Helmut Haberl, Marina Fischer-Kowalski, Fridolin Krausmann, Verena Winiwarter, 2016-07-01 This book presents the current state of the art in Social Ecology as practiced by the Vienna School of Social Ecology, globally one of the main research groups in this field. As a significant contribution to the growing literature on interdisciplinary sustainability studies, the book introduces the purpose and nature of Social Ecology and then places the "Vienna School" within the broader context of socioecological and other interdisciplinary environmental approaches. The conceptual and methodological foundations of Social Ecology are discussed in detail, allowing the reader to obtain a broad overview of current socioecological thinking. Issues covered include socio-metabolic transitions, socioecological approaches to land use, the relation between actor-centered and system approaches, a socioecological theory of labor and the importance of legacies, as conceived in Environmental History and in Long-Term Socio-Ecological Research. To underpin this overview empirically, the strengths of socioecological research are elucidated in cases of cutting-edge research, introducing a variety of themes the Vienna School has been tackling empirically over the past years. Given how the field is presented – reflecting research carried out on different scales, reaching from local to global as well as from past to present and future – and due to the way the book is structured, it is suitable for classroom use, as a primer, and also as an overview of how Social Ecology evolved, right up to its current research frontiers.
