Savoia-Marchetti S.79 Sparviero Torpedo-Bomber Units Marco

Mattioli,2014-10-20 Italy's most successful wartime bomber, the S.79 saw combat with the Regia Aeronautica in France, Yugoslavia, Greece, North Africa, East Africa and in the Mediterranean. Initially developed as a transport, the aircraft evolved into a dedicated medium bomber during the Spanish Civil War in 1936. The manufacturer then produced the S.79-II torpedo-bomber which entered service in 1939 – which primarily saw service against the Royal Navy in the Mediterranean. Illustrated with 30 full colour profiles of the main units that saw action with either the Regia Aeronautica or the ANR, this title is the first of two volumes to cover the development history and wartime performance of the S.79.

Italian Aces of World War 2 Giorgio Apostolo,2012-12-20 Flying aircraft such as the Macchi 200-202, Fiat G.50 and biplane Fiat CR.42, the Italian fighter pilots were recognised by their Allied counterparts as brave opponents blessed with sound flying abilities, but employing under-gunned and underpowered equipment. Following the Italian surrender in September 1943, a number of aces continued to take the fight to the Allies as part of the Luftwaffe-run ANR, which was equipped with far more potent equipment such as the Bf 109G, Macchi 205V and Fiat G.55. Flying these types, the handful of ANR squadrons continued to oppose Allied bombing raids on northern Italy until VE-Day.

Eagles Over Husky Alexander Fitzgerald-Black,2018-02-15 In the summer of 1943, the United Nations began Operation HUSKY, the invasion of Sicily. The Eagles over HUSKY - the airmen of the Allied air forces - played a crucial role in the assault. The Luftwaffe and Regia Aeronautica provided a significant part of the Axis force meant to defend the island and throw the Allies back into the sea. The Allied air forces foiled this effort and inflicted losses on a German Air Force badly needed on other fronts. Raids on mainland Italian railway transport crippled Axis resupply efforts. The same strikes brought pressure on the Italian state to denounce Fascism and join the Allied side. Army commanders relied heavily on tactical air power to destroy Axis forces in Sicily. The result was a strategic victory which forced Nazi Germany to stand alone in defense of southern Europe. Most histories of the campaign focus on the escape of German forces across the Strait of Messina. Eagles over Husky challenges the notion that the Allied militaries bungled total victory in Sicily. It assesses one of the greatest air battles of the Second World War. This is a topic that has been relatively unexamined by historians of the campaign, who tend to focus on army matters. Eagles over Husky tells the integrated story of the air war waged during the Battle of Sicily. The author draws upon experiences, perspectives, and sources from both Allied and Axis camps to inform the analysis and enhance the narrative.

The Vintage Years of Airfix Box Art Roy Cross,2009-08-01 Airfix has been commercially producing plastic kits since 1952 and its models have been made by successive generations of young boys and men alike. In the 1960s, a talented graphic artist called Roy Cross was commissioned to paint some of the box art for Airfix, and for a ten-year-period he provided many of the glorious paintings seen on the boxes, setting new standards for realism and

accuracy. Many are still being used today, a full four decades later. Inside the pages of this book are some of Roy's best artworks, shown here in full format and in superb detail, with many reproduced here in book form for the very first time. As well as his vintage box art, Roy has included many sketches and alternative versions of his Airfix box art. After Roy left Airfix in 1974, the company went through a turbulent time. The present owners are Hornby, who have ambitious plans for Airfix and the other brands it acquired including Scalextric and Corgi. The decade that Roy Cross worked for Airfix, though, could be classed as their vintage era, with some of their finest models being produced then in their millions, ready for eager youngsters to build up into detailed miniature models of their favorite aircraft, ships and locomotives.

Flying Colours William Green, Gordon Swanborough, 1997 Military aircraft have been variously daubed, cunningly camouflaged, boastfully personalized or otherwise extravagantly coloured since they first took to the air over 80 years ago. *Flying Colours* is a survey of this fascinating scene.

Fiat CR.32 Aces of the Spanish Civil War Alfredo Logoluso, 2013-02-20 The CR.32 Falco was a handsome and highly manoeuvrable biplane fighter. During General Franco's fight with the Republicans for the control of Spain from 1936 – 39, no fewer than 477 CR.32s were involved, with an astounding 709 confirmed aerial victories, and an additional 320 kills claimed, for just 62 losses. As these statistics reveal, the CR.32 was the unrivalled master of the skies over Spain. By the war's end, the five leading aces of the conflict were all Spanish CR.32 pilots. Their exploits, and those of the other leading CR.32 aces, are examined for the first time in English in this exciting volume.

Courage Alone Chris Dunning, 2009 Derided by Allied propaganda which made it out to be an air force equipped solely with elderly biplanes, ineffective in attack or always in retreat, the Regia Aeronautica was overshadowed by its more ruthless Axis partner, the Luftwaffe. Using research from a mass of original documentation, including personal accounts and combat diaries, the author takes an objective view and shows that the men who flew the Macchis, Fiats, and Savoias were no less skilled or determined than their opponents. The book discusses area commands, theaters, squadron allocations, anti-shipping operations, aircrew, and details of the top fighter aces. Comprehensive tables provide information on aircraft equipment, squadron allocation, and unit histories. With drawings from original aircraft handbooks, almost 250 photographs, more than 100 color profiles, and unit badges, *Courage Alone* provides a detailed reference source for historians, modelers, and enthusiasts alike.

Fw 200 Condor Units of World War 2 Chris Goss, 2016-08-25 The Fw 200 Condor first made an appearance over Norway in April 1940, flying with the unit that eventually become synonymous with it – Kampfgeschwader 40. As the war in the west progressed, and German forces advanced, French airfields opened up, allowing the Condor to fly around the UK and out into the Atlantic, where it rapidly established itself as one of the key menaces to Allied shipping. Able to attack shipping directly, or able to guide U-Boats to their prey the Condor scored its first major success when it crippled the liner *Empress of Great Britain*. But the tables were to turn on the 'Scourge of the Atlantic' as mechanical failures induced by their harsh operating environment and changes in Allied tactics began to take a toll. Vulnerable to aerial attack,

the deployment of Allied carriers and their associated fighters combined with the introduction of more long range maritime patrol aircraft exposed the Condor's deficiencies. Packed with rare first-hand accounts, profile artwork and photographs, this is the history of one of the unsung types to take to the skies during World War 2.

Eastern Inferno Christine Alexander, Mason Kunze, 2010-11-30 "Remarkable personal journals . . . revealing the combat experience of the German-Russian War as seldom seen before . . . a harrowing yet poignant story" (Military Times). Hans Roth was a member of the anti-tank panzerjager battalion, 299th Infantry Division, attached to the Sixth Army, as the invasion of Russia began. As events transpired, he recorded the tension as the Germans deployed on the Soviet frontier in June 1941. Then, a firestorm broke loose as the Wehrmacht tore across the front, forging into the primitive vastness of the East. During the Kiev encirclement, Roth's unit was under constant attack as the Soviets desperately tried to break through the German ring. At one point, after the enemy had finally been beaten, a friend serving with the SS led him to a site—possibly Babi Yar—where he witnessed civilians being massacred. After suffering through a brutal winter against apparently endless Russian reserves, his division went on the offensive again when the Germans drove toward Stalingrad. In these journals, attacks and counterattacks are described in you-are-there detail. Roth wrote privately, as if to keep himself sane, knowing his honest accounts of the horrors in the East could never pass Wehrmacht censors. When the Soviet counteroffensive of winter 1942 begins, his unit is stationed alongside the Italian 8th Army, and his observations of its collapse, as opposed to the reaction of the German troops sent to stiffen its front, are of special fascination. Roth's three journals were discovered many years after his disappearance, tucked away in the home of his brother. After his brother's death, his family discovered them and sent them to Rosel, Roth's wife. In time, Rosel handed down the journals to Erika, Roth's only daughter, who had emigrated to America. Roth was likely working on a fourth journal before he was reported missing in action in July 1944. Although his ultimate fate remains unknown, what he did leave behind, now finally revealed, is an incredible firsthand account of the horrific war the Germans waged in Russia.

The American St. Nick Peter Lion, 2003 American soldiers are more than combatants on a battlefield, they are also representatives of America and her people. On an overcast day in 1944, two soldiers from the 28th Infantry Division gave a remarkable Christmas gift to the people of Wiltz, Luxembourg - a gift that changed the people of Wiltz forever.

The Illustrated Directory of Fighting Aircraft of World War II Bill Gunston, 1999-01 Specs for more than 160 aircraft, with illustrations and period photos to detail paint schemes. Ideal for scale and R/C modelers.

Douglas TBD Devastator David Doyle, 2017-10-18 The Douglas Devastator was the US Navy's first all-metal combat aircraft, the Navy's first airplane with a fully enclosed cockpit, the first aircraft to have hydraulically folding wings, and the first US Navy torpedo bomber to see combat. Although facing staggering losses in the early stages of the war in the Pacific, the brave men flying the Devastator from the decks of such famed ships as Enterprise, Hornet, Yorktown, and Lexington held the line against the enemy. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of

this iconic aircraft are revealed. This clarity, and the large size of many of the photos, coupled with descriptive and informative captions, puts the reader in the skies with this historic aircraft.

Fiat CR.42 Aces of World War 2 Håkan Gustavsson, Ludovico Slongo, 2013-02-20 The Fiat CR.42, a logical development of the Fiat CR.32, was the last single-seat fighter biplane to be produced. It entered service with the Italian Regia Aeronautica in May 1939 before being exported to Belgium, Hungary and Sweden. Its combat debut came when the Belgian air force threw its fleet into action during the German invasion of the Low Countries on 10th May 1940. Despite being quickly overwhelmed, the Belgian pilots managed to make a number of aerial claims. The CR.42 became heavily involved in the fighting in North Africa and although it was gradually replaced by more modern fighters, it continued in a point defence and ground support role until the end of the war. Drawing on research from a range of sources, this book examines the extensive employment of the Italian fighter plane during the course of World War II.

War Paint Brian Lehman, 2019-07-24 WAR PAINT is a quirky thriller and a naval warfare story like no other from the Vietnam War. It is April 1972 and the fading war has suddenly reawakened with the Easter Offensive, a massive invasion by North Vietnam into South Vietnam. United States troop strength in the war has fallen to new lows and twenty-year-old surfer Jeffs Ryder is a new member of the crew of a destroyer known as the Rat at the very time that the United States Navy has become the tip of the spear in repelling this aggression. He and his fiancée Cathy's lives are turned upside down as his ship and many others are sent to the war. Unknown to Jeffs and the crew of the destroyer, their most dangerous enemy is not the one they expect. A secret group committed to the destruction of the ship, and an unbalanced navy fleet commander have joined forces in a conspiracy to send the Rat on a perilous mission and a confrontation with patrol boats carrying ship killing missiles.

Allied Armored Fighting Vehicles George Bradford, 2009-08-12 Filled with 1:72-scale drawings of armored vehicles from the U.S., Britain, Canada, and Russia.

Essays on the History of Mechanical Engineering Francesco Sorce, Giuseppe Genchi, 2015-11-24 This book treats several subjects from the History of Mechanism and Machine Science, and also contains an illustrative presentation of the Museum of Engines and Mechanisms of the University of Palermo, Italy, which houses a collection of various pieces of machinery from the last 150 years. The various sections deal with some eminent scientists of the past, with the history of industrial installations, machinery and transport, with the human inventiveness for mechanical and scientific devices, and with robots and human-driven automata. All chapters have been written by experts in their fields. The volume shows a wide-ranging panorama on the historical progress of scientific and technical knowledge in the past centuries. It will stimulate new research and ideas for those involved in the history of Science and Technology.

Wings on My Sleeve Eric Brown, 2008-09-18 The autobiography of one of the greatest pilots in history. In 1939 Eric Brown was on a University of Edinburgh exchange course in Germany, and the first he knew of the war was when the Gestapo came to arrest him. They released him, not realising he was a pilot in the RAF volunteer reserve: and the rest is history. Eric Brown

joined the Fleet Air Arm and went on to be the greatest test pilot in history, flying more different aircraft types than anyone else. During his lifetime he made a record-breaking 2,407 aircraft carrier landings and survived eleven plane crashes. One of Britain's few German-speaking airmen, he went to Germany in 1945 to test the Nazi jets, interviewing (among others) Hermann Goering and Hanna Reitsch. He flew the suicidally dangerous Me 163 rocket plane, and tested the first British jets. *WINGS ON MY SLEEVE* is 'Winkle' Brown's incredible story.

Italian Battleships of World War II Mark Stille, 2011-08-20 Italy's navy, the Regia Marina was the fourth-largest naval force in the world at the outbreak of World War II, and yet is often overlooked and largely discounted as ineffective. In general the fleet was made up of obsolete vessels, lacked radar functionality, and had a reputation for indiscipline and poorly trained crews. The complex and bureaucratic command system imposed on the fleet further hampered its effectiveness. In this book, Mark Stille details why the Italian battleships were able to maintain a solid reputation, examining their impressive designs and the courage and determination of the fleet at Calabria, Sirte, Cape Spartiveto and Cape Matapan, all illustrated with stunning photographs from the Italian Navy's own archives.
