Essence of Sunyoga Sunyogi Umasankar, 2020-10-07 The technique of looking with open eyes towards the sun as a form of meditation has long been a mystery, kept in secret, so the strong energies we can harness would not be abused. For a long time there have been rumors and eyewitness accounts of many high saints and initiates living in seclusion in remote places, such as the Himalayas, who have practiced some form of Sun Meditation. Great men like Socrates, Ramakrishna, and Jesus are all believed to have benefited from this practice. We have now crossed a point where the common man is also trusted with this powerful technique. Essence of Sunyoga is a manual dedicated to all humans. Sunyoga is much more than just looking towards the Sun, as it encompasses the entire Vedic knowledge. This manual shows us the path, how we can use all the balancing elements of Creation, to quickly and safely prepare ourselves, from the very bottom of our awareness all the way up to the highest level of Enlightenment. We will acquire superhuman strength to face any life difficulty without suffering, gaining the ability to live without food and water and become untouchable from our darkest enemies. This invaluable treatise on Sunyoga is a huge contribution to humanity... - D. R. Kaarthikeyan, Former Director of Central Bureau of Investigation, Former Director General of National Human Rights Commission, Director General of Central Reserve Police Force, and Champion of Human Rights, Values and Responsibilities, New Delhi, India Through Sunyoga, the photos directly interact with the physical body like a two-way bio-internet, establishing direct communication with the Body-Universe system, taking the seeker to a higher realm of realization. - Dr. Vikas Kumar, Distinguished Scientist and Ex-Director, DRDO, Ministry of Defence, Hyderabad, India

A Quantum City Ludger Hovestadt, Vera Bühlmann, 2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the “lowest common denominator”? The “city as a species”, the “primal genetic material of the city”: this is the subject of A Quantum City. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. A Quantum City offers an inspiring view of the city that is in us and around us.

Books I–III Ludger Hovestadt, 2022-12-19 Treatise on digital architecture Hovestadt’s treatise strictly follows the model of the famous treatises by Vitruvius (De architectura) and Alberti (De re aedificatoria), based on the supposition that we find ourselves in a comparable situation today. Vitruvius and Alberti expressed the meaning of architecture in their eras: Roman antiquity and the Renaissance. Hovestadt has done the same for the present day, incorporating considerations of physics, mathematics, technology, literature, and philosophy. Books I to III deal with the role of the architect and the objectivity of architecture. Books IV to VI address the modalities of speaking about and encoding architecture: the secret, the public, and the private. Books VII to X are dedicated to actual digital mechanisms: artificial intelligence, natural communication, gnomonics, and cultural heritage. An architectural treatise for our age in 10 books Inspired by the works of Vitruvius and Alberti Published in three volumes in the Applied Virtuality Book Series

The Two Lives of Cheng Maolan Thierry Montmerle, Yi Zhou, Yves Gomas, 2022-06-15 This book presents the exceptional biography of the 20th century Chinese astronomer Cheng Maolan, who came to France in 1926 on a China-France cooperation program to do his PhD with the idea of returning to China after a few years. Instead, he lived two lives. He first stayed in France and studied astronomy in Lyon, the “Silk city”, where he suffered the hardships of the German occupation, but also witnessed the construction of the Haute-Provence Observatory. After the war, he started a promising career at Lyon Observatory. However, in 1957 he decided to live a second life, by returning to the motherland, which had in the meantime become the People's Republic of China. There, he suffered the hardships of the Cultural Revolution, but he managed to play a pivotal role in establishing the Beijing Observatory as its director. In particular, he prepared the ground for the Xinglong 2-m telescope, which saw its first light in 1989, ten years after his death. Cheng Maolan is now considered a Chinese hero: an Astronomy and Technology Museum was built and named after him in 2018, in his native city of Boye, Hebei Province, China, featuring a tall, white statue in front of the building.
