a tumblr book Allison McCracken,Alexander Cho,Louisa Stein,Indira N Hoch,2020-10-26 This book takes an extensive look at the many different types of users and cultures that comprise the popular social media platform Tumblr. Though it does not receive nearly as much attention as other social media such as Twitter or Facebook, Tumblr and its users have been hugely influential in creating and shifting popular culture, especially progressive youth culture, with the New York Times referring to 2014 as the dawning of the “age of Tumblr activism.” Perfect for those unfamiliar with the platform as well as those who grew up on it, this volume contains essays and artwork that span many different topics: fandom; platform structure and design; race, gender and sexuality, including queer and trans identities; aesthetics; disability and mental health; and social media privacy and ethics. An entire generation of young people that is now beginning to influence mass culture and politics came of age on Tumblr, and this volume is an indispensable guide to the many ways this platform works.

Performing Jane Sarah Glosson,2020-06-10 Jane Austen has resonated with readers across generations like no other writer. More than two hundred years after the publication of her most celebrated novel, *Pride and Prejudice*, people around the world continue to honor “dear Jane.” In *Performing Jane*, Sarah Glosson explores this vibrant fandom, examining a long history of Austen fans engaging with her work, from wearing hand-sewn bonnets and period-appropriate corsets to creating spirited fanfiction and comical gifsets. Sophisticated and engaging, this study demonstrates that Austen fans of today have a great deal in common with those who loved the English novelist long before the term “fan” came into use. *Performing Jane* analyzes three ways fans engage with Austen and her work: collecting material related to the writer, whether in physical scrapbooks or on social-media platforms; creating and consuming imitative works, including fanfiction and modernized adaptations such as *The Lizzie Bennet Diaries*; and making pilgrimages to Steventon, Hampshire, Chawton Cottage, and even to annual meetings of Jane Austen societies. Key to Glosson’s exploration of Austen fans is the notion that all of these activities, whether occurring in private or in public, are fundamentally performative. And in counterbalance to studies that center on fans with a tendency to transform and disrupt the original text, this study provides much-needed understanding of a fandom that predominantly reaffirms Austen’s works. Because Austen’s writing has bridged the realms of both literary and popular culture, this fandom serves as an excellent case study to understand the ways in which we draw distinctions between fandom and other forms of intensive engagement and, more importantly, to appreciate how fluid those distinctions can be. *Performing Jane* embraces a holistic view of the long history of Austen fandom, relying on archival research, literary and visual analyses, and ethnographic study. This groundbreaking book not only demonstrates the ways in which fan practices, today and in the past, are performative, but also provides fresh perspectives into fandom and contributes to our understanding of the ways readers engage with literature.

James Acaster's Guide to Quitting Social Media James Acaster,2022-08-18 THE SUNDAY TIMES BESTSELLER This is a self-help book like no other. Because you are not helping yourself, James Acaster is helping you. In 2019, James quit all forms of social media - covering his phone in tar and

driving it to a lock-up in Rhyl, before setting up home in a castle he'd built himself called Castle Anti-Net. But when the withdrawal symptoms hit him, he realised in order to stay clean he'd have to replace everything social media gave him with three-dimensional, real-life activities. Employing the help of a mysterious, wealthy benefactor named Clancy Dellahue, and an ever-growing gang of misfits (aka the Tangfastic Crew), James found ways to replace his online friends (he joined the scouts) and spy on his exes (climbing ropes, zip lines, fake moustache) as well as anonymously bullying strangers, seeing photos of everyone's dogs, getting public figures fired, arguing with everybody about everything, and so much more. His life is amazing and yours could be too if you buy JAMES ACASTER'S GUIDE TO QUITTING SOCIAL MEDIA, BEING THE BEST YOU YOU CAN BE AND SAVING YOURSELF FROM LONELINESS VOL. 1.

Practical Ajax Projects with Java Technology Frank Zammetti, 2006-12-15 This book will save Java developers countless hours of development time by providing seven complete Ajax applications to learn from and adapt for use in their own projects. The applications include an online calendaring/scheduling system, a FlickrTM-style photo gallery application, and an Ajax role-playing game. The book also details the set-up of a perfect Java/Ajax development environment in which to construct the applications; Java technologies covered include Apache, Ant, Ajax Tags, Struts, Prototype, DWR, Dojo, and more. This is the first book of its kind, aimed at Java/Ajax developers.

Compact Cinematics Pepita Hesselberth, Maria Poulaki, 2017-01-26 Compact Cinematics challenges the dominant understanding of cinema to focus on the various compact, short, miniature, pocket-sized forms of cinematics that have existed from even before its standardization in theatrical form, and in recent years have multiplied and proliferated, taking up an increasingly important part of our everyday multimedia environment. Short films or micro-narratives, cinematic pieces or units re-assembled into image archives and looping themes, challenge the concepts that have traditionally been used to understand cinematic experience, like linear causality, sequentiality, and closure, and call attention to complex and modular forms of cinematic expression and perception. Such forms, in turn, seem to meet the requirements of digital convergence, which has pushed the development of more compact and mobile hardware for the display and use of audiovisual content on laptops, smartphones, and tablets. Meanwhile, contemporary economies of digital content acquisition, filing, and sharing equally require the shrinking of cinematic content for it to be recorded, played, projected, distributed, and installed with ease and speed. In this process, cinematic experience is shortened and condensed as well, so as to fit the late-capitalist attention economy. The essays in this volume ask what this changed technical, socio-economic and political situation entails for the aesthetics and experience of contemporary cinematics, and call attention to different concepts, theories and tools at our disposal to analyze these changes.

Transmedia/Genre Matthew Freeman, Anthony N. Smith, 2023-02-05 This book brings genre back to the forefront of the current transmedia trend. Genres are perhaps the most innately transmedial of media constructs, formed as they are from all kinds of industrial, technological and discursive phenomena. Yet, few have considered how genre works in a multiplatform context. This book does precisely that, making a uniquely transmedial contribution to the study of genre in the age of media convergence. The book interrogates how industrial, technological and participatory transformations of digital platforms and emerging technologies reshape workings of genre. The authors consider franchises such as Star Wars, streaming platforms such as Netflix, catch-up services such as ITV Hub, creative technologies such as virtual reality, and beyond. In setting the stage for the revival of genre theory in contemporary transmedia scholarship, this book pushes forward understandings of multiplatform media and the emerging form and function of genre across contemporary culture.

Open Source GIS Markus Neteler, Helena Mitsova, 2013-04-18 Open Source GIS: A GRASS GIS Approach was written for experienced GIS users, who want to learn GRASS, as well as for the Open

Source software users who are GIS newcomers. Following the Open Source model of GRASS, the book includes links to sites where the GRASS system and on-line reference manuals can be downloaded and additional applications can be viewed. The project's website can be reached at <http://grass.itc.it> and a number of mirror sites worldwide. Open Source GIS: A GRASS GIS Approach, provides basic information about the use of GRASS from setting up the spatial database, through working with raster, vector and site data, to image processing and hands-on applications. This book also contains a brief introduction to programming within GRASS encouraging the new GRASS development. The power of computing within Open Source environment is illustrated by examples of the GRASS usage with other Open Source software tools, such as GSTAT, R statistical language, and linking GRASS to MapServer. Open Source GIS: A GRASS GIS Approach is designed to meet the needs of a professional audience composed of researchers and practitioners in industry and graduate level students in Computer Science and Geoscience.

Cinéma&Cie. International Film Studies Journal. Aa. Vv.,2016-10-11T00:00:00+02:00 For a long time, comparisons of cinema and photography have been predominantly a question of contrast, both of their forms and their ways of seeing. This special issue of Cinéma & Cie reverses the perspective, by addressing some of the fundamental spaces of convergence and coexistence between the two languages. While they have always been somewhat present in the history of the two arts (not only in chronophotography, but also astronomic photography, photographic series, and still photography), the photocinematic forms have become particularly relevant in the archaeology of post-media culture that has characterised much scholarship lately. What tools should we employ to study these confluences today? Is it possible to perceive overlapping images also in strictly cinematic or photographic works? From this perspective, the special issue deals with borderline authors, such as Jeff Wall; post-filmic aesthetics, such as the cinematic tableau vivant and innovative examples of contemporary, experimental audiovisual production.

Fashion and Film Peter Bug,2019-09-17 This book aims to explore various aspects of the use of moving images in fashion retail and fashion apparel companies in-store or online. The use of moving images is growing in numbers and in relevance for consumers. Films can be used in various forms by fashion businesses in traditional media like cinema or TV and in modern forms like in social media or moving images in high street stores. The book provides a data-oriented analysis of the state-of-the-art with certain future outlooks. Additional areas of covering fashion in moving images, such as 'fashion company identity films' or 'fashion and music videos' are covered in order to get a more complete analysis from a consumer influenced perspective.

Chinese Documentaries Yingchi Chu,2007-06-20 In China, unlike in Western cinema, documentary film, rather than fiction film, has been the dominant mode since 1949. In recent years, documentary TV programmes have experienced a meteoric rise. Arguing that there is a gradual process of 'democratization' in the media, in which documentaries play a significant role, this book discusses various types of Chinese documentaries, under both the planned and the market economy. It especially explores the relationship between documentaries and society, showing how, under the market economy, although the government continues to use the genre as propaganda to promote its ideologies and policies, documentaries are being used as a medium where public concerns and alternative voices can be heard.

Sensations of History James J. Hodge,2019-10-01 A phenomenological investigation into new media artwork and its relationship to history What does it mean to live in an era of emerging digital technologies? Are computers really as antihistorical as they often seem? Drawing on phenomenology's investigation of time and history, Sensations of History uses encounters with new media art to inject more life into these questions, making profound contributions to our understanding of the digital age in the larger scope of history. Sensations of History combines close textual analysis of experimental new media artworks with in-depth discussions of key texts from the philosophical tradition of phenomenology. Through this inquiry, author James J. Hodge argues for the immense significance of new media art in examining just what historical experience means in a

digital age. His beautiful, aphoristic style demystifies complex theories and ideas, making perplexing issues feel both graspable and intimate. Highlighting underappreciated, vibrant work in the fields of digital art and video, *Sensations of History* explores artists like Paul Chan, Phil Solomon, John F. Simon, and Barbara Lattanzi. Hodge's provocative interpretations, which bring these artists into dialogue with well-known works, are perfect for scholars of cinema, media studies, art history, and literary studies. Ultimately, *Sensations of History* presents the compelling case that we are not witnessing the end of history—we are instead seeing its rejuvenation in a surprising variety of new media art.

Securing Information and Communications Systems Steven Furnell, 2008 This one-stop reference gives you the latest expertise on everything from access control and network security, to smart cards and privacy. Representing a total blueprint to security design and operations, this book brings all modern considerations into focus. It maps out user authentication methods that feature the latest biometric techniques, followed by authorization and access controls including DAC, MAC, and ABAC and how these controls are best applied in today's relational and multilevel secure database systems.

Vidding Francesca Coppa, 2022-02-23 Vidding is a well-established remix practice where fans edit an existing film, music video, TV show, or other performance and set it to music of their choosing. Vids emerged forty years ago as a complicated technological feat involving capturing footage from TV with a VCR and syncing with music—and their makers and consumers were almost exclusively women, many of them queer women. The technological challenges of doing this kind of work in the 1970s and 1980s when vidding began gave rise to a rich culture of collective work, as well as conventions of creators who gathered to share new work and new techniques. While the rise of personal digital technology eventually democratized the tools vidders use, the collective aspect of the culture grew even stronger with the advent of YouTube, Vimeo, and other channels for sharing work. *Vidding: A History* emphasizes vidding as a critical, feminist form of fan practice. Working outward from interviews, VHS liner notes, convention programs, and mailing list archives, Coppa offers a rich history of vidding communities as they evolved from the 1970s through to the present. Built with the classroom in mind, the open-access electronic version of this book includes over one-hundred vids and an appendix that includes additional close readings of vids.

Deep Mediations Karen Redrobe, Jeff Scheible, 2021-03-09 The preoccupation with “depth” and its relevance to cinema and media studies For decades the concept of depth has been central to critical thinking in numerous humanities-based disciplines, legitimizing certain modes of inquiry over others. *Deep Mediations* examines why and how this is, as scholars today navigate the legacy of depth models of thought and vision, particularly in light of the “surface turn” and as these models impinge on the realms of cinema and media studies. The collection's eighteen essays seek to understand the decisive but evolving fixation on depth by considering the term's use across a range of conversations as well as its status in relation to critical methodologies and the current mediascape. Engaging contemporary debates about new computing technologies, the environment, history, identity, affect, audio/visual culture, and the limits and politics of human perception, *Deep Mediations* is a timely interrogation of depth's ongoing importance within the humanities.
