The Day of the Mountain Timothy Neat,Anne Michaels,2016 Since entering his eighth decade Neat has concentrated his wide-ranging creativity on the act of drawing, in sketchbooks. His prime subject is people - the common man, writers, artists, travellers, prisoners: he also addresses war, landscape, and the ancient past with visionary understanding.Of the four hundred drawings being published, only three have been publicly seen. In this book Neat. the artist, can be seen for the first time - championed by the great art critic John Berger and renowned writer Anne Michaels: these drawings are revelatory.This special signed edition, produced to the highest specification, is limited to 150 copies and is guaranteed to appeal to collectors of fine art and belle-lettres in Scotland and across Europe.Neat's books include The Summer Walkers, Part Seen Part Imagined, a two volume biography of Hamish Henderson and, most recently, These Faces, a collection of photographs and drawings (2013).

Border Cantos ,2016 [Richard Misrach] saw the border, [Guillermo Galindo] heard it, and by coming together across that line of artistic practice, they've now created these 'border cantos.' Misrach has been using the canto literary structure, borrowed from Dante and Ezra Pound, as a way of organizing his long-term photographic project, Desert cantos (1979 to present). But here the canto also moves off the page and into sound, opening up into Galindo's practice. In Italian, canto means 'song'; in Spanish, 'singing' and 'chant.' In this sense, all cantos are part eye and part ear, able to be seen and heard at once.--Page 10.

The Dragon's Gift Terese Tse Bartholomew,John Johnston,Honolulu Academy of Arts,2008 The Dragon's Gift offers a rare opportunity to introduce, to the wider international audience, some of the most sacred Buddhist images of Bhutan. From the wealth of material surveyed, the organizers of the exhibition have selected over one hundred objects of superior aesthetic achievement and deep religious significance, the vast majority of which have never before been seen in the West. Nearly all of the works of art presented in this catalogue are from active temples and monasteries and remain in ritual use. Most of the items are painted or textile thangkas or gilt bronze sculptures which date primarily from the 17th to the 19th centuries - a golden age in the Buddhist arts of Bhutan. Ranging from depictions of Tantric deities to individualized portraits of Buddhist masters, the exhibition and catalogue present outstanding works of art with a wide iconographic scope. For the Buddhist people of Bhutan, these sacred items are conceived as supports along the journey to enlightenment, and are of vital spiritual significance. Complementing the presentation of sacred works of art is the documentation of the ancient Cham dances of Bhutan, to which the dance preservation team was given privileged entree. Having documented over three hundred hours of sacred and secular dances, they have made a first assay of one of the few surviving treasures of the trans-Himalayan movement tradition. These differing approaches to the visual and moving arts provide further insight into the unique experience of Buddhism in Bhutan. A brief sampling of the variety of extant dance lineages - some many centuries old - is included on the DVD contained within the catalogue.--Publisher's website.

Cell Lineage Choice During Haematopoiesis: A Commemorative Issue in Honor of Professor Antonius Rolink Rhodri Ceredig,Geoffrey Brown,2018 This special issue of the International Journal of Molecular Sciences contains a collection of articles by colleagues of Antonius (Ton) Gerardus Rolink (19/04/1953-06/08/2017) and honors Ton's life and profound knowledge of and huge contribution to science. Ton participated in an FP7 Marie Curie Initial Training Network called DECIDE, and partners have submitted articles for this Special Issue. Scientists outside this network have also submitted articles. The articles examine various aspects of how the hematopoietic stem-cell gives rise to the different types of blood and immune cells. These include decision-making by the hematopoietic stem cell and the importance of controlling events within cells and the niches the cell resides in. New insights into these processes at the basic scientific level have given rise to an emerging new model for the development of blood cells. In turn, changes to our understanding of this process have led to new and exciting propositions regarding what goes wrong during the early stages of the development of leukemia.
