Bolt Action: Campaign: Market Garden Warlord Games,2018-02-22 Market Garden was a bold plan, designed to capture the Rhine crossings along the Dutch–German border and establish a foothold for an advance into Germany. A massive combined arms operation involving airborne landings and an armoured thrust, it was one of the most dramatic and controversial operations of the war. This new Campaign Book for Bolt Action allows players to command the forces facing each other across the Rhine, fighting key battles and attempting to change the course of history. New, linked scenarios, rules, troop types and Theatre Selectors provide plenty of options for novice and veteran players alike.

Tiger I Dennis Oliver,2018-04-30 A fully illustrated guide to the German Tiger I tank and its operations in the field by the renowned expert on WWII armored vehicles. At Hitler's insistence, the first Tiger I tanks drove into action in Tunisia in December 1942. Despite their lack of reliability and the small number deployed, they quickly gained a fierce reputation. With its heavy armor and 88mm gun, the Tiger I outclassed all the Allied tanks then in service. Beyond their deployment in North Africa, they also operated in Sicily and Italy between 1943 and 1945. In his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tank and the German army units that first took them into combat. Perfect for model enthusiasts, Tiger I showcases available model kits and aftermarket products. It also includes a gallery of beautifully constructed and painted models in various scales. Technical details, as well as modifications introduced during production and in the field, are also examined providing everything the modeler needs to recreate an accurate representation of the tanks.

The Guns of Normandy George Blackburn,2012-03-26 In the weeks after D-Day, the level of artillery action in Normandy was unprecedented. In what was a relatively small area, both sides bombarded each other relentlessly for three months, each trying to overwhelm the other by sheer fire power. The Guns of Normandy puts the reader in the front lines of this horrific battle. In the most graphic and authentic detail, it brings to life every aspect of a soldier's existence, from the mortal terror of impending destruction, to the unending fatigue, to the giddy exhilaration at finding oneself still, inexplicably, alive. The story of this crucial battle opens in England, as the 4th Field Regiment receives news that something big is happening in France and that after long years of training they are finally going into action. The troop ships set out from besieged London and arrive at the D-Day beaches in the appalling aftermath of the landing. What follows is the most harrowing and realistic account of what

it is like to be in action, as the very lead man in the attack: an artillery observer calling in fire on enemy positions. The story unfolds in the present tense, giving the uncomfortably real sense that “You are here.” The conditions under which the troops had to exist were horrific. There was near-constant terror of being hit by incoming shells; prolonged lack of sleep; boredom; weakness from dysentery; sudden and gruesome deaths of close friends; and severe physical privation and mental anguish. And in the face of all this, men were called upon to perform heroic acts of bravery and they did. Blackburn provides genuine insight to the nature of military service for the average Canadian soldier in the Second World War – something that is all too often lacking in the accounts of armchair historians and television journalists. The result is a classic account of war at the sharp end. From the Hardcover edition.

Helicopters of the Third Reich Steve Coates, Jean-Christophe Carbonel, 2002 This is the first major study of Germany's wartime helicopters in the English language and is the result of 15 years research. The book includes more than 350 stunning and rare photographs, most appearing in print for the first time. Alongside the narrative, the book includes first hand accounts and the illustrations are supplemented by superb technical drawings.

The Vintage Years of Airfix Box Art Roy Cross,2009-08-01 Airfix has been commercially producing plastic kits since 1952 and its models have been made by successive generations of young boys and men alike. In the 1960s, a talented graphic artist called Roy Cross was commissioned to paint some of the box art for Airfix, and for a ten-year-period he provided many of the glorious paintings seen on the boxes, setting new standards for realism and accuracy. Many are still being used today, a full four decades later. Inside the pages of this book are some of Roy's best artworks, shown here in full format and in superb detail, with many reproduced here in book form for the very first time. As well as his vintage box art, Roy has included many sketches and alternative versions of his Airfix box art. After

Roy left Airfix in 1974, the company went through a turbulent time. The present owners are Hornby, who have ambitious plans for Airfix and the other brands it acquired including Scalextric and Corgi. The decade that Roy Cross worked for Airfix, though, could be classed as their vintage era, with some of their finest models being produced then in their millions, ready for eager youngsters to build up into detailed miniature models of their favorite aircraft, ships and locomotives.

Glittering Misery Patricia Y. Stallard,1992 Truly a pathbreaking book, in military history, western woman's history, & children's history, Glittering Misery remains the standard work on nineteenth-century military dependents. Is This Tomorrow ,2016 Originally published in the midst of the cold war, Is This Tomorrow is a classic example of red scare propaganda.
