Adonis Garage Rynn Williams, 2005-01-01 Winner of the Prairie Schooner Book Prize in Poetry, Adonis Garage introduces a talent exquisitely keyed to the register of New York City's pulse and to the heartbeat of the day. Raw and graphic, with a brash and beautiful voice, Rynn Williams's poetry immerses us in disillusionment and desire and bears witness to the meaning of survival. ø Judith Ortiz Cofer called Adonis Garage "a book of life written by someone who has lived honestly and passionately, and whose art has been mastered in order to bear witness and find meaning in each day." Rynn Williams's poems are "brutally frank, brutally beautiful, and sexy," said writer and critic Jonathan Holden.

Conservation Biology in Sub-Saharan Africa Richard Primack, Johnny W. Wilson, 2019-09-10 Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting

economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

The Informationist Taylor Stevens, 2013-06-06 A New York Times bestseller, The Informationist introduces Vanessa Michael Munroe, a brilliant new heroine, in a thriller for fans of Lisbeth Salander, Jack Reacher and Jason Bourne. 'One of the best thrillers of the year!' Tess Gerritsen Vanessa Munroe deals in information - covert information. With an extraordinary intellect, a physique that allows her to pass as either male or female, and ruthless martial arts skills, she offers a unique service to anyone - government or individual - who'll pay her. Now a Texas oil billionaire has hired her to find his daughter, who vanished in Africa four years earlier. Where international investigators have tried and failed, Munroe follows a cold trail far into the lawless lands of central Africa. And then things spin out of control. Pulled deep into the mystery of the missing girl, Munroe finds herself cut off from civilisation and left for dead. Her only hope of discovering the truth - and of getting out of Africa alive - is to face up to

the violent past that she's fought so hard to forget.

Daughter of the Forest Juliet Marillier, 2010-04-01 *Daughter of the Forest* is a testimony to an incredible author's talent, a first novel and the beginning of a trilogy like no other: a mixture of history and fantasy, myth and magic, legend and love. Lord Colum of Sevenwaters is blessed with six sons: Liam, a natural leader; Diarmid, with his passion for adventure; twins Cormack and Conor, each with a different calling; rebellious Finbar, grown old before his time by his gift of the Sight; and the young, compassionate Padriac. But it is Sorch, the seventh child and only daughter, who alone is destined to defend her family and protect her land from the Britons and the clan known as Northwoods. For her father has been bewitched, and her brothers bound by a spell that only Sorch can lift. To reclaim the lives of her brothers, Sorch leaves the only safe place she has ever known, and embarks on a journey filled with pain, loss, and terror. When she is kidnapped by enemy forces and taken to a foreign land, it seems that there will be no way for her to break the spell that condemns all that she loves. But magic knows no boundaries, and Sorch will have to choose between the life she has always known and a love that comes only once. Juliet Marillier is a rare talent, a writer who can imbue her characters and her story with such warmth, such heart, that no reader can come away from her work untouched. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Predator: If It Bleeds Andrew Mayne, Mira Grant, Kevin J. Anderson, Jonathan Maberry, 2017-10-17 Over the centuries, extraterrestrial hunters of the Yautja race—also known as the Predators—have encountered (and stalked) humans on Earth and in the depths of space. Offered here are sixteen all-new stories of such hunts, written by many of today's most extraordinary authors: Kevin J. Anderson Jennifer Brozek Larry Correia Mira Grant Tim Lebbon Jonathan Maberry Andrew Mayne Weston Ochse S. D. Perry Steve Perry Jeremy Robinson John Shirley Bryan Thomas Schmidt and Holly Roberds Peter J. Wacks and David Boop Wendy N. Wagner Dayton Ward Inspired by the events of the original Predator movies, graphic novels, and novels, these adventures pit hunter against prey in life-and-death struggles where there can be only one victor.

Prey Steve Perry, Stephani Perry, 1994 Unbeknownst to the colonists on Ryushi, the planet is the setting for hunting games between the Predators and the prey they have bred for this purpose, and Machiko Noguchi and the other ranchers must fight for survival.

Hunter's Planet David Bischoff, 1994 Based on the successful Dark Horse graphic novels, this thrilling tale by the author of several bestselling Star Trek novels reunites two of the silver screen's most deadly aliens. Machiko Noguchi, the woman who survived a terrifying battle between the Aliens and Predators in Prey, returns in an action-packed follow-up.

Conservation Biology for All Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-08 Conservation Biology for All provides cutting-edge but basic conservation

science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Shattered Air Bob Madgic, Adrian Esteban, 2007 On the evening of July 27, 1985, five hikers made a fateful choice to climb Yosemite's fabled Half Dome even as the sky darkened and thunder rolled. By night's end, two would be dead

from a lightning strike, three gravely wounded, and desperate EMTs would be overseeing a harrowing midnight helicopter rescue.

Flesh and Blood Michael Jan Friedman, Robert Greenberg, 2007 Based on the motion picture from Twentieth Century Fox.

Archie Vs. Predator Alex De Campi, 2019-09-03 America's favorite teen faces the galaxy's greatest hunter as the gang from Riverdale fights for their lives against the alien Predator, which sets its sights on them after a disastrous Spring Break vacation in South America--

Adaptation and Natural Selection George Christopher Williams, 2018-10-30 Biological evolution is a fact—but the many conflicting theories of evolution remain controversial even today. When *Adaptation and Natural Selection* was first published in 1966, it struck a powerful blow against those who argued for the concept of group selection—the idea that evolution acts to select entire species rather than individuals. Williams's famous work in favor of simple Darwinism over group selection has become a classic of science literature, valued for its thorough and convincing argument and its relevance to many fields outside of biology. Now with a new foreword by Richard Dawkins, *Adaptation and Natural Selection* is an essential text for understanding the nature of scientific debate.

Aliens vs. Predator: Three World War Randy Stradley, 2012-10-09 A long-lost Predator clan stakes its claim for galactic dominance, intent on exterminating its rival clan, the self-same trophy hunters who have plagued

Earth's history. And if the advanced technology and military precision of this new threat weren't enough, they have an even more terrifying weapon—a horde of Aliens under their malefic control. Earthmen must now side with the warriors who have relentlessly hunted them, but is the enemy of my enemy my friend or just another enemy waiting for its turn to strike? * One of the most popular science-fiction/action franchises, spawning countless films, games, comics, and toys over three decades. * Aliens vs. Predator: Three World War is the biggest action blowout yet, written by original AvP scribe Randy Stradley and illustrated by Rick Leonardi and Mark Pennington. * Collects issues #1-#6 of the miniseries.

Tropical Pinnipeds Juan J. Alava, 2017-07-12 Pinnipeds are a fascinating group of marine mammals that play a crucial role as apex predators and sentinels of the functioning and health of marine ecosystems. They are found in the most extreme environments from the Polar regions to the tropics. Pinnipeds are comprised of about 34 species, and of those at least 25% live permanently in tropical zones. This book reviews and updates current research on the biology, marine ecology, bio-monitoring, and conservation of tropical pinniped populations, including their behavior, anthropogenic stressors, and health. It also looks at challenges to be faced for the conservation of tropical pinnipeds, many of which are threatened species.

Aliens Vs. Predator: Eternal Ian Edginton, Dark Horse Comics, 1999 Aliens are roaming the Tokyo subway system on a future Earth, but when Predators--the

galaxy's most dangerous hunters--descend to stalk them, and a billionaire seeks to glean the secret of eternal life from them, the situation on the ground becomes extremely volatile. Original.
