17th International Conference on Information Technology-New Generations (ITNG 2020) Shahram Latifi,2020-05-11 This volume presents the 17th International Conference on Information Technology-New Generations (ITNG), and chronicles an annual event on state of the art technologies for digital information and communications. The application of advanced information technology to such domains as astronomy, biology, education, geosciences, security, and healthcare are among the themes explored by the ITNG proceedings. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help information flow to end users are of special interest. Specific topics include Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing. The conference features keynote speakers; a best student contribution award, poster award, and service award; a technical open panel, and workshops/exhibits from industry, government, and academia.

A Biographical Dictionary of Later Han to the Three Kingdoms (23-220 AD) Rafe de Crespigny,2006-12-01 This publication is the long-awaited complement to Michael Loewe's acclaimed Biographical Dictionary of the Qin, Former Han and Xin Periods (2000). With more than 8,000 entries, based upon historical records and surviving inscriptions, the comprehensive Biographical Dictionary of Later Han to the Three Kingdoms (23-220 AD) now provides information on men and women of the Chinese world who lived at the time of Later (or Eastern) Han, from Liu Xiu, founding Emperor Guangwu (reg. 24-57), to the celebrated warlord Cao Cao (155-220) at the end of the dynasty. The entries, including surnames, personal names, styles and dates, are accompanied by maps, genealogical tables and indexes, with lists of books and special accounts of women. These features, together with the convenient surveys of the history and the administrative structure of the dynasty, will make Rafe de Crespigny's work an indispensable tool for any further serious study of a significant but comparatively neglected period of imperial China.

Digital Twin Driven Smart Design Fei Tao,Ang Liu,Tianliang Hu,A.Y.C. Nee,2020-05-22 Digital Twin Driven Smart Design draws on the latest industry practice and research to establish a basis for the implementation of digital twin technology in product design. Coverage of relevant design theory and methodology is followed by detailed discussions of key enabling technologies that are supported by cutting-edge case studies of implementation. This groundbreaking book explores how digital twin technology can bring improvements to different kinds of product design process, including functional, lean and green. Drawing on the work of researchers at the forefront of this technology, this book is the ideal guide for anyone interested in digital manufacturing or computer-aided design. Provides detailed case studies that explore key applications of digital twin technology in design practice Introduces the concept of using digital twins to create the virtual commissioning of design projects Presents a framework to help engineers incorporate digital twins into their product design process

Art and Sustainability Sacha Kagan,2011 Kagan starts his analysis pointing at the Western development model and the modern worldview that lie at the heart of unsustainability. He characterizes the modern worldview as based in the classical scientific method and as atomistic, materialistic, individualistic and Eurocentric. Kagan's assumption is that in order to change our actual culture of unsustainability in a sustainable one, we will have to look for an alternative worldview and go beyond utilitarian rationality that is so very common in our contemporary cultures and in most analyses of sustainability. We will have to engage ourselves in a really fundamental rethinking of our culture and our ways of thinking, knowing and seeing ourselves and the world. With an overview of ecological art over the past 40 years and a discussion of art and social change, the book assesses the potential role of art in a much needed transformation process. Review in: International journal of cutural policy.19(2013)1(141-143).

Advanced Materials in Drug Release and Drug Delivery Systems Katarzyna Winnicka,2021-09-03 Development of new drug molecules is costly and requires longitudinal, wide-ranging studies; therefore, designing advanced pharmaceutical formulations for existing and well-known drugs seems to be an attractive device for the pharmaceutical industry. Properly formulated drug delivery systems can improve pharmacological activity, efficacy and safety of the active substances. Advanced materials applied as pharmaceutical excipients in designing drug delivery systems can help solve problems concerning the required drug release-with the defined dissolution rate and at the determined site. Novel drug carriers enable more effective drug delivery, with improved safety and with fewer side effects. Investigations concerning advanced materials represent a rapidly growing research field in material/polymer science, chemical engineering and pharmaceutical technology. Exploring novel materials or modifying and combining existing ones is now a crucial trend in pharmaceutical technology. Eleven articles included in the the Special Issue “Advanced Materials in Drug Release and Drug Delivery Systems” present the most recent insights into the utilization of different materials with promising potential in drug delivery and into different formulation approaches that can be used in the design of pharmaceutical formulations.

Join Mattel and Dark Horse in this comprehensive retrospective chronicling He-Man's decades-long epic journey from toy, to television, to film, to a true pop culture phenomenon!

Lithuania 1940 Alfred Erich Senn,2007-01-01 In June 1940, as Nazi troops marched into Paris, the Soviet Red Army marched into Lithuania, Latvia, and Estonia; seven weeks later, the USSR Supreme Soviet ratified the Soviet takeover of these states. For half a century, Soviet historians insisted that the three republics had voluntarily requested incorporation into the Soviet Union. Now it has become possible to examine the events of that tumultuous time more carefully. Alfred Erich Senn, the author of books on the formation of the Lithuanian state in 1918-1920 and on the reestablishment of that independence in 1988-1991, has produced a fascinating account of the Soviet takeover, juxtaposing a picture of the disintegration and collapse of the old regime with the Soviets' imposition of a new order. Discussing the historiography and the living memory of the events, he uses the image of a “shell game” that focused attention on the work of a supposedly “non-communist” government while in the hothouse conditions of military occupation Moscow undermined the state's independent institutions and introduced a revolution from above.

Good Video Games + Good Learning James Paul Gee,2013 The chapters in this book argue that good games teach through well-designed problem-solving experiences. In the end, the book offers a model of collaborative, interactive, and embodied learning centered on problem solving, a model that can be enhanced by games, but which can be

accomplished in many different ways with or without games.

The New Literacies Elizabeth A. Baker,2010-04-13 With contributions from leading scholars, this compelling volume offers fresh insights into literacy teaching and learning—and the changing nature of literacy itself—in today's K-12 classrooms. The focus is on varied technologies and literacies such as social networking sites, text messaging, and online communities. Cutting-edge approaches to integrating technology into traditional, print-centered reading and writing instruction are described. Also discussed are ways to teach the new skills and strategies that students need to engage effectively with digital texts. The book is unique in examining new literacies through multiple theoretical lenses, including behavioral, semiotic, cognitive, sociocultural, critical, and feminist perspectives.

Coordination Chemistry in Non-Aqueous Solutions Victor Gutmann,2012-12-06 Considerable attention has been focussed on non-aqueous chemistry in the last decade and this situation has arisen no doubt from a realization of the vast application of this branch of chemistry. Within this field much energetic work has been channelled into the determination of the coordination chemistry of transition metals in these solvent systems. Elaborate experimental techniques have been developed to discover, in particular, the magnetic and spectral properties of complex compounds, and the theoretical background of such systems has been expanded to corroborate, as far as possible, the experimental results. This text has, however, a different bias from many books currently available on this branch of chemistry, and is designed to be a survey of known facts on many of the non-aqueous solvents currently in use mainly in the field of halogen chemistry, together with a discussion of these facts in the light of accepted principles. As such, it is hoped to close a gap in the literature of which many workers and advanced students in this field will be aware. The treatment is meant to be selective rather than completely comprehensive and must inevitably reflect some of the special interests of the author.

Digital Twin Driven Smart Manufacturing Fei Tao,Meng Zhang,A.Y.C. Nee,2019-02-07 Digital Twin Driven Smart Manufacturing examines the background, latest research, and application models for digital twin technology, and shows how it can be central to a smart manufacturing process. The interest in digital twin in manufacturing is driven by a need for excellent product reliability, and an overall trend towards intelligent, and connected manufacturing systems. This book provides an ideal entry point to this subject for readers in industry and academia, as it answers the questions: (a) What is a digital twin? (b) How to construct a digital twin? (c) How to use a digital twin to improve manufacturing efficiency? (d) What are the essential activities in the implementation of a digital twin? (e) What are the most important obstacles to overcome for the successful deployment of a digital twin? (f) What are the relations between digital twin and New Technologies? (g) How to combine digital twin with the New Technologies to achieve high efficiency and smartness in manufacturing? This book focuses on these problems as it aims to help readers make the best use of digital twin technology towards smart manufacturing. Analyzes the differences, synergies and possibilities for integration between digital twin technology and other technologies, such as big data, service and Internet of Things Discuss new requirements for a traditional three-dimension digital twin and proposes a methodology for a five-dimension version Investigates new models for optimized manufacturing, prognostics and health management, and cyber-physical fusion based on the digital twin

Minority Integration in Central Eastern Europe Timofey Agarin,Malte Brosig,2009 The book presents a timely examination on a range of issues present in the discussions on the integration of ethnic minorities in Central Eastern Europe: norm setting, equality promotion, multiculturalism, nation-building, social cohesion, and ethnic diversity. It insightfully illustrates these debates by assessing them diachronically rather than cross-nationally from the legal, political and anthropological perspective. The contributors unpack concepts related to minority integration, discuss progress in policy-implementation and scrutinize the outcomes of minority integration in seven countries from the region. The volume is divided into three sections taking a multi-variant perspective on minority integration and equality. The volume starts with an analysis of international organizations setting standards and promoting minority rights norms on ethnic diversity and equal treatment. The second and third sections address state policies that provide fora for minority groups to participate in policy-making as well as the role of society and its various actors their development and enactment of integration concepts. The volume aims to assess the future of ethnic diversity and equality in societies across Central Eastern European states.

Sd 3 Kingdom Zhangfei.jpg: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. Sd 3 Kingdom Zhangfei.jpg : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Sd 3 Kingdom Zhangfei.jpg : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Sd 3 Kingdom Zhangfei.jpg : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you wondering until the very end. The novel is

a warning tale about the dangers of obsession and the power of evil.
