Playing with the Past Matthew Wilhelm Kapell,Andrew B.R. Elliott,2013-10-24 Game Studies is a rapidly growing area of contemporary scholarship, yet volumes in the area have tended to focus on more general issues. With *Playing with the Past*, game studies is taken to the next level by offering a specific and detailed analysis of one area of digital game play -- the representation of history. The collection focuses on the ways in which gamers engage with, play with, recreate, subvert, reverse and direct the historical past, and what effect this has on the ways in which we go about constructing the present or imagining a future. What can World War Two strategy games teach us about the reality of this complex and multifaceted period? Do the possibilities of playing with the past change the way we understand history? If we embody a colonialist's perspective to conquer 'primitive' tribes in *Colonization*, does this privilege a distinct way of viewing history as benevolent intervention over imperialist expansion? The fusion of these two fields allows the editors to pose new questions about the ways in which gamers interact with their game worlds. Drawing these threads together, the collection concludes by asking whether digital games - which represent history or historical change - alter the way we, today, understand history itself.

Framing and Managing Lean Organizations in the New Economy Darina Lepadatu,Thomas Janoski,2020 This book examines the dominance and significance of lean organizing in the international economy. Scholars from each discipline see lean production as positive or negative; the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways. The first part synthesizes academic research from a range of disciplines--including, engineering, sociology, and management--to present the reader with an integrated understanding of the benefits and drawbacks of lean management. The second part links this theory to practice, with a set of case studies from companies like Apple, Google, Nike, Toyota, and Walmart that demonstrate how lean is implemented in a variety of settings. The book concludes with three models, explaining how Toyotism, Nikefication with offshoring, and Waltonism provide full or less complete models of lean production. It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations. With its rich interdisciplinary approach, *Framing and Managing Lean Organizations in the New Economy* will benefit researchers and students across a range of classes from management, sociology, and public policy to engineering.

Bridging Cultures Between Home and School Elise Trumbull,Carrie Rothstein-Fisch,Patricia M. Greenfield,Blanca Quiroz,2001-04 *Bridging Cultures Between Home and School: A Guide for Teachers* is intended to stimulate broad thinking about how to meet the challenges of education in a pluralistic society. It is a powerful resource for in-service and preservice multicultural education and professional development. The Guide presents a framework for understanding differences and conflicts that arise in situations where school culture is more individualistic than the value system of the home. It shares what researchers and teachers of the Bridging Cultures Project have learned from the experimentation of teacher-researchers in their own classrooms of largely immigrant Latino students and explores other research on promoting improved home-school relationships across cultures. The framework leads to specific suggestions for supporting teachers to cross-cultural communication; organization parent-teacher conferences that work; use strategies that increase parent involvement in schooling; increase their skills as researchers; and employ ethnographic techniques to learn about home cultures. Although the research underlying the Bridging Cultures Project and this Guide focuses on immigrant Latino families, since this is the primary population with which the framework was originally used, it is a potent tool for learning about other cultures as well because many face similar discrepancies between their own more collectivistic approaches to childrearing and schooling and the more individualistic approach of the dominant culture.

Asia's New Geopolitics Michael R. Auslin,2020-05-01 The Indo-Pacific is fast becoming the world's dominant region. As it grows in power and wealth, geopolitical competition has reemerged, threatening future stability not merely in Asia but around the globe. China is aggressive and uncooperative, and increasingly expects the world to bend to its wishes. The focus on Sino-US competition for global power has obscured Asia's other great game: the rivalry between Japan and China. A modernizing India risks missing out on the energies and talents of millions of its women, potentially hampering the broader role it can play in the world. And in North Korea, the most frightening question raised by Kim Jong-un's pursuit of the ultimate weapon is also the simplest: can he control his nukes? In *Asia's New Geopolitics: Essays on Reshaping the Indo-Pacific*, Michael R. Auslin examines these and other key issues transforming the Indo-Pacific and the broader world. He also explores the history of American strategy in Asia from the 18th century through today. Taken together, Auslin's essays convey the richness and diversity of the region: with more than three billion people, the Indo-Pacific contains over half of the global population, including the world's two most populous nations: India and China. In a riveting final chapter, Auslin imagines a war between America and China in a bid for regional hegemony and what this conflict might look like.

International Relations and Asia's Southern Tier Gilbert Rozman,Joseph Chinyong Liow,2017-09-18 This book, part of a series, seeks to re-conceptualize Asian geographies; rather than a static East Asia core, this volume analyzes Asia's southern fringe, as symbolized in the trading group ASEAN and its role in Asia's evolving international relations. Community Schools in Action Joy G. Dryfoos,Jane Quinn,Carol Barkin,2005-03-24 Community Schools in Action: Lessons from a Decade of Practice presents the Children's Aid Society's (CAS) approach to creating community schools for the 21st century. CAS began this work in New York City more than a decade ago and today operates thirteen such schools in the low-income neighborhoods of Washington Heights, East Harlem, and the Bronx. Through a technical assistance center operated by CAS, hundreds of other schools across the country and the world are adapting this model. The contributors to the volume supply invaluable information about the selected program components based on their own experiences working with community schools. They describe how and why CAS started its community school initiative and explain how CAS community schools are organized, integrated with the school system, sustained, and evaluated.

Reign of Error Diane Ravitch,2014-08-26 From one of the foremost authorities on education in the United States, former U.S. assistant secretary of education, an incisive, comprehensive look at today’s American school system that argues against those who claim it is broken and beyond repair; an impassioned but reasoned call to stop the privatization movement that is draining students and funding from our public schools. In a chapter-by-chapter breakdown she puts forth a plan for what can be done to preserve and improve our public schools. She makes clear what is right about U.S. education, how policy makers are failing to address the root causes of educational failure, and how we can fix it.

Indo-Pacific Strategies Brendon J. Cannon,Kei Hakata,2022-01-14 This book focuses on the Indo-Pacific region’s growing prominence as the world’s major powers gravitate toward this space to expand their influence. With dynamic shifts taking place in the globe’s most strategically volatile region, Indo-Pacific Strategies aims at clarifying the geopolitics of the Indo-Pacific, expounded both as a strategic concept and nascent region, thus contributing to the burgeoning policy and academic debate. The book offers indispensable insights and appropriate remedies to maintain the rules-based international order as threatened by China’s increasingly assertive and bellicose posturing. It offers up-to-date analyses of Covid-19-related geopolitical trends, the strategies of various Indo-Pacific states against the backdrop of great power competition, the increasingly confrontational stance of Indo-Pacific states against China and the 2020 US election results. This unique book presents deep insights into the roles of Eurasia, small island states, the Middle East and Africa, in addition to Australia, India, Japan and the US, thereby providing much needed comparative studies. It also closely investigates the strategic and tactical operationalization of the Indo-Pacific, making it an essential read for scholars, policymakers, students, and strategists in the field of international politics and Area Studies. Excerpt from the foreword by ABE Shinzō, (former) Prime Minister of Japan I think this book is the timeliest attempt to bring together the wisdom of eleven people to present a multifaceted view of the FOIP [Free and Open Indo-Pacific]. As a reader, I would like to express my gratitude to the editors and contributors for their valuable intellectual contributions. See the preview function on this website to access the full text.
