Sites from World Heritage Properties (Natural), UNESCO Global Geoparks, and National Parks of Japan representing key facets of this heritage are analyzed in depth, and the text is supplemented with color photographs and useful information for potential travelers. The volume is divided into thematic sections that help understand the diversity of Japan's natural heritage, with supplementary information on conservation, tourism trends, local culture and lifestyles. In addition, chapters analyzing nature's mechanisms that engender diverse heritage landscapes and conservation/sustainable management schemes make this volume a valuable resource for both general readers and those with more specialized interests.

Anthropogenic Tropical Forests Noboru Ishikawa, Ryoji Soda, 2019-11-06 The studies in this volume provide an ethnography of a plantation frontier in central Sarawak, Malaysian Borneo. Drawing on the expertise of both natural scientists and social scientists, the key focus is the process of commodification of nature that has turned the local landscape into anthropogenic tropical forests. Analysing the transformation of the space of mixed landscapes and multiethnic communities—driven by trade in forest products, logging and the cultivation of oil palm—the contributors explore the changing nature of the environment, multispecies interactions, and the metabolism between capitalism and nature. The project involved the collaboration of researchers specialising in anthropology, geography, Southeast Asian history, global history, area studies, political ecology, environmental economics, plant ecology, animal ecology, forest ecology, hydrology, ichthyology, geomorphology and life-cycle assessment. Collectively, the transdisciplinary research addresses a number of vital questions. How are material cycles and food webs altered as a result of large-scale land-use change? How have new commodity chains emerged while older ones have disappeared? What changes are associated with such shifts? What are the relationships among these three elements—commodity chains, material cycles and food webs? Attempts to answer these questions led the team to go beyond the dichotomy of society and nature as well as human and non-human. Rather, the research highlights complex relational entanglements of the two worlds, abruptly and forcibly connected by human-induced changes in an emergent and compelling resource frontier in maritime Southeast Asia. Chapters 'Commodification of Nature on the Plantation Frontier' and 'Into a New Epoch: The Plantationocene' are available open access under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License via link.springer.com.

Multiethnic Japan John Lie, 2009-07 Multiethnic Japan challenges the received view of Japanese society as ethnically homogeneous. Employing a wide array of arguments and evidence—historical and comparative, interviews and observations, high literature and popular culture—John Lie recasts modern Japan as a thoroughly multiethnic society. Lie casts light on a wide range of minority groups in modern Japanese society, including the Ainu, Burakumin (descendants of premodern outcasts), Chinese, Koreans, and Okinawans. In so doing, he depicts the trajectory of modern Japanese identity. Surprisingly, Lie argues that the belief in a monoethnic Japan is a post-World War II phenomenon, and he explores the formation of the monoethnic ideology. He also makes a general argument about the nature of national identity, delving into the mechanisms of social classification, signification, and identification.

The Ethics of Affect Patrick W. Galbraith, 2021-09-20 Based on ongoing fieldwork in the Akihabara neighborhood of Tokyo, specifically a targeted subproject from 2014 to 2015, this book explores how and to what effect lines are drawn by producers, players and critics of bishōjo games. Focusing on interactions with manga/anime-style characters, these adult computer games often feature explicit sex acts. Noting that the bishōjo, or cute girl characters, in these games can appear quite young, legal actions have been taken in a number of countries to categorize and prohibit the content as child abuse material. In response to the risk of manga/anime images encouraging underage sexualization, lawmakers are moved to regulate them in the same way as photographs or film; triggered by images, the line between fiction and reality is erased, or redrawn to collapse forms together. While Japanese politicians continue to debate a similar course, sustained engagement with bishōjo game producers, players and critics sheds light on alternative movement. Manga/anime-style characters trigger an affective response in interactions with their creators and users, who draw and negotiate lines between fiction and reality. Interacting with characters and one another, bishōjo gamers draw lines between what is fictional and what is real, even as the characters are real in their own right and relations with them are extended beyond games; some even see the characters as significant others and refer to them using intimate terms of commitment such as my wife. This book argues for understanding the everyday practice of insisting on lines, or drawing a line between humans and nonhumans and orienting oneself toward the drawn lines of the latter, as demonstrating an emergent form of ethics. Occurring individually and socially in both private and public spaces, the response to fictional characters not only discourages harming human beings, but also supports life in more-than-human worlds. For many in contemporary Japan and beyond, interactions and relations with fictional and real others are nothing short of lifelines.

Handbook of East and Southeast Asian Archaeology Junko Habu, Peter V. Lape, John W. Olsen, 2017-12-08 The Handbook of East and Southeast Asian Archaeology focuses on the material culture and lifeways of the peoples of prehistoric and early historic East and Southeast Asia; their origins, behavior and identities as well as their biological, linguistic and cultural differences and commonalities. Emphasis is placed upon the interpretation of material culture to illuminate and explain social processes and relationships as well as behavior, technology, patterns and mechanisms of long-term change and chronology, in addition to the intellectual history of archaeology as a discipline in this diverse region. The Handbook augments archaeologically-focused chapters contributed by regional scholars by providing histories of research and intellectual traditions, and by maintaining a broadly comparative perspective. Archaeologically-derived data are emphasized with text-based documentary information, provided to complement interpretations of material culture. The Handbook is not restricted to art historical or purely descriptive perspectives; its geographical coverage includes the modern nation-states of China, Mongolia, Far Eastern Russia, North and South Korea, Japan, Taiwan, Vietnam, Cambodia, Laos, Thailand, Burma, Malaysia, Indonesia, the Philippines and East Timor.

Stranger on the Shore Josh Lanyon, 2014-05-05 When a journalist gains access to a wealthy family's secrets, he encounters shocking revelations—and an irresistibly handsome lawyer—in this M/M romance. Twenty years ago, little Brian Arlington was kidnapped from his family's Long Island estate and was never seen again. The trail went cold, but investigative journalist Griff Hadley has always thought there was more to the story—much more. So when the Arlingtons' patriarch invites him to stay at their estate to research his true crime book, Griff can't say no. But not everyone is happy about Griff's presence. Relatives and staff alike regard him coldly, including Pierce Mather, the Arlingtons' attractive lawyer, who is more than a little wary of Griff's motives. When a stranger shows up claiming to be the long-lost Brian, Griff and Pierce are united in their suspicions. Startled to have found an ally in the buttoned-up lawyer, Griff soon realizes it's hard to keep a professional distance. Even in the midst of a groundbreaking investigation, even in the face of a shocking family secret . . .

Biofuels and Sustainability Kazuhiko Takeuchi, Hideaki Shiroyama, Osamu Saito, Masahiro Matsuura, 2018-07-13 This open access book presents a comprehensive analysis of biofuel use strategies from an interdisciplinary perspective using sustainability science. This interdisciplinary perspective (social science-natural science) means that the strategies and policy options proposed will have significant impacts on the economy and society alike. Biofuels are expected to contribute to reducing greenhouse gas emissions, revitalizing economies in agricultural communities and alleviating poverty. However, despite these anticipated benefits, international organizations such as the FAO, OECD and UN have published reports expressing concerns that biofuel promotion may lead to deforestation, water pollution and water shortages. The impacts of biofuel use are extensive, cross-sectoral and complex, and as such, comprehensive analyses are required in order to assess the extent to which biofuels can contribute to sustainable societies. Applying interdisciplinary sustainability science concepts and methodologies, the book helps to enhance the establishment of a sustainable society as well as the development of appropriate responses to a global need for urgent action on current issues related to biofuels.

Noir Urbanisms Gyan Prakash, 2010-09-27 Dystopic imagery has figured prominently in modern depictions of the urban landscape. The city is often portrayed as a terrifying world of darkness, crisis, and catastrophe. *Noir Urbanisms* traces the history of the modern city through its critical representations in art, cinema, print journalism, literature, sociology, and architecture. It focuses on visual forms of dystopic representation—because the history of the modern city is inseparable from the production and circulation of images—and examines their strengths and limits as urban criticism. Contributors explore dystopic images of the modern city in Germany, Mexico, Japan, India, South Africa, China, and the United States. Their topics include Weimar representations of urban dystopia in Fritz Lang's 1927 film *Metropolis*; 1960s modernist architecture in Mexico City; Hollywood film noir of the 1940s and 1950s; the recurring fictional destruction of Tokyo in postwar Japan's sci-fi doom culture; the urban fringe in Bombay cinema; fictional explorations of urban dystopia in postapartheid Johannesburg; and Delhi's out-of-control and media-saturated urbanism in the 1980s and 1990s. What emerges in *Noir Urbanisms* is the unsettling and disorienting alchemy between dark representations and the modern urban experience. In addition to the editor, the contributors are David R. Ambaras, James Donald, Rubén Gallo, Anton Kaes, Ranjani Mazumdar, Jennifer Robinson, Mark Shiel, Ravi Sundaram, William M. Tsutsui, and Li Zhang.

The Revenge of the 47 Ronin Stephen Turnbull, 2011-08-20 When Lord Kira brought about the death of Lord Asano, he made Asano's loyal samurai into ronin – masterless warriors. These men secretly plotted their revenge and one snowy winter's night, launched an ambitious raid against their enemy's mansion in Edo. What ensued was the fiercest sword battle to have been seen in Japan for over a century. The gates were stormed, Lord Kira was captured and executed, and his washed head placed on Lord Asano's tomb. This title details the background, planning, and execution of this incredible raid, looking at the equipment used by the ronin, the tactics they employed in storming the building, and the dramatic events that followed, as the surviving ronin committed mass suicide – a final act of loyalty and defiance that sealed their legend.

The Myanmar Economy Konosuke Odaka, 2015-11-11 With motivated human resources and a rich natural bounty, Myanmar is expected to take off with sustained growth and eventually attain a unique welfare state. On the basis of the authors' field surveys and innumerable dialogues with public officials, private professionals, scholars, and others, in addition to intensive desk studies since around 2000, the present volume lays out the essential ingredients for drawing a roadmap to realise the above-mentioned objective. That goal is, specifically, financial development, adequate social capital, indigenous modern manufactures and closer international tie-ups, among others, but above all, sound agrarian development. An effort has been made to place the required ingredients in their historical contexts, as historical experiences constitute an important sociopolitical condition in which development takes place. Myanmar nationals and readers concerned with the country's economic

progress are encouraged to give serious, sustained thought to coming up with a socially supportable roadmap for the country's development path. The present volume provides valuable hints for that purpose.

Social Movements and Political Activism in Contemporary Japan David Chiavacci, Julia Obinger, 2018-02-21 This book explores social movements and political activism in contemporary Japan, arguing that the 2011 Fukushima nuclear accident marks a decisive moment, which has led to an unprecedented resurgence in social and protest movements and inaugurated a new era of civic engagement. Offering fresh perspectives on both older and more current forms of activism in Japan, together with studies of specific movements that developed after Fukushima, this volume tackles questions of emerging and persistent structural challenges that activists face in contemporary Japan. With attention to the question of where the new sense of contention in Japan has emerged from and how the newly developing movements have been shaped by the neo-conservative policies of the Japanese government, the authors ask how the Japanese experience adds to our understanding of how social movements work, and whether it might challenge prevailing theoretical frameworks.

Playing with the Past Matthew Wilhelm Kapell, Andrew B.R. Elliott, 2013-10-24 Game Studies is a rapidly growing area of contemporary scholarship, yet volumes in the area have tended to focus on more general issues. With *Playing with the Past*, game studies is taken to the next level by offering a specific and detailed analysis of one area of digital game play -- the representation of history. The collection focuses on the ways in which gamers engage with, play with, recreate, subvert, reverse and direct the historical past, and what effect this has on the ways in which we go about constructing the present or imagining a future. What can World War Two strategy games teach us about the reality of this complex and multifaceted period? Do the possibilities of playing with the past change the way we understand history? If we embody a colonialist's perspective to conquer 'primitive' tribes in Colonization, does this privilege a distinct way of viewing history as benevolent intervention over imperialist expansion? The fusion of these two fields allows the editors to pose new questions about the ways in which gamers interact with their game worlds. Drawing these threads together, the collection concludes by asking whether digital games - which represent history or historical change - alter the way we, today, understand history itself.
