## **Reinforced Concrete Beams, Columns and Frames**

Jostein Hellesland, Noël Challamel, Charles Casandjian, Christophe Lanos, 2013-02-13 This book is focused on the theoretical and practical design of reinforced concrete beams, columns and frame structures. It is based on an analytical approach of designing normal reinforced concrete structural elements that are compatible with most international design rules, including for instance the European design rules – Eurocode 2 – for reinforced concrete structures. The book tries to distinguish between what belongs to the structural design philosophy of such structural elements (related to strength of materials arguments) and what belongs to the design rule aspects associated with specific characteristic data (for the material or loading parameters). A previous book, entitled Reinforced Concrete Beams, Columns and Frames – Mechanics and Design, deals with the fundamental aspects of the mechanics and design of reinforced concrete in general, both related to the Serviceability Limit State (SLS) and the Ultimate Limit State (ULS), whereas the current book deals with more advanced ULS aspects, along with instability and second-order analysis aspects. Some recent research results including the use of non-local mechanics are also presented. This book is aimed at Masters-level students, engineers, researchers and teachers in the field of reinforced concrete design. Most of the books in this area are very practical or code-oriented, whereas this book is more theoretically based, using rigorous mathematics and mechanics tools. Contents 1. Advanced Design at Ultimate Limit State (ULS). 2. Slender Compression Members – Mechanics and Design. 3. Approximate Analysis Methods. Appendix 1. Cardano's Method. Appendix 2. Steel Reinforcement Table. About the Authors Jostein Hellesland has been Professor of Structural Mechanics at the University of Oslo, Norway since January 1988. His contribution to the field of stability has been recognized and magnified by many high-quality papers in famous

international journals such as Engineering Structures, Thin-Walled Structures, Journal of Constructional Steel Research and Journal of Structural Engineering. Noël Challamel is Professor in Civil Engineering at UBS, University of South Brittany in France and chairman of the EMI-ASCE Stability committee. His contributions mainly concern the dynamics, stability and inelastic behavior of structural components, with special emphasis on Continuum Damage Mechanics (more than 70 publications in International peer-reviewed journals). Charles Casandjian was formerly Associate Professor at INSA (French National Institute of Applied Sciences), Rennes, France and the chairman of the course on reinforced concrete design. He has published work on the mechanics of concrete and is also involved in creating a web experience for teaching reinforced concrete design – BA-CORTEX. Christophe Lanos is Professor in Civil Engineering at the University of Rennes 1 in France. He has mainly published work on the mechanics of concrete, as well as other related subjects. He is also involved in creating a web experience for teaching reinforced concrete design – BA-CORTEX.

Iris Biometrics Christian Rathgeb, Andreas Uhl, Peter Wild, 2012-11-08 Iris Biometrics: From Segmentation to Template Security provides critical analysis, challenges and solutions on recent iris biometric research topics, including image segmentation, image compression, watermarking, advanced comparators, template protection and more. Open source software is also provided on a dedicated website which includes feature extraction, segmentation and matching schemes applied in this book to foster scientific exchange. Current state-of-the-art approaches accompanied by comprehensive experimental evaluations are presented as well. This book has been designed as a secondary text book or reference for researchers and advanced-level students in computer science and electrical engineering. Professionals working in this related field will also find this book useful as a reference.

*Microsoft Visio 2002* Eric R. Infanti, 2001 Annotation A reference designed to quickly explain in ten minutes or less the most common beginning and intermediate level tasks a Visio user would need to create better looking and more communicative diagrams to augment their Word docs and PowerPoint presentations. This book offers straightforward, practical answers for fast results. Each 10-minute lesson allows the user to quickly learn the fundamentals necessary to accomplish their goals. Covers the most commonly referenced topics. Because most people don't have the luxury of sitting down uninterrupted for hours at a time to learn Visio, this 10 Minute Guide focuses on the most often used features, covering them in lessons designed to take 10 minutes or less to complete. Without jargon, this guide teaches the user how to use Visio by providing straightforward, easy-to-follow explanations and lists of numbered steps. Eric Infanti is the Director of Training and Performance at GreenTree International. He has trained, put on seminars and developed curriculum at institutions such as Sacred Heart University and Manchester, Tunis, Capital, and Middlesex Community-Technical colleges. Eric has been a user of Visio since its launch back in the early 90's in his IT realm with Dime Financial Corporation as well as usage of it during his Marine Corps tour. Since then, Eric has supported, coached, and trained hundreds of people across Connecticut, and is now training nationally with Microsoft?. Soon Eric begins the infrastructure for delivering Visio courses online as well. Some of his current clients are The META Group, The Hartford Insurance Group, and ABB to name a few.

Above the Abyss Ulrich A. Wien, 2024-04-22 The book focuses on the threat to free self-development and the effort to ward off a perceived threat of extinction as well as the development of self-preservation forces. The challenges for ethnic and religious minorities in the 19th-21st centuries are explained and unfolded against the historical background that serves as a frame of

reference. The royal privileges granted in medieval Hungary were abolished in the mid-19th century. The German-speaking people's church (Saxones) in Transylvania founded on this had to reorient itself, although a pioneer region of religious freedom had established itself behind the "Ottoman Curtain". Since the reception of the Reformation, the "Saxones" had been Protestant. At the end of the 19th century, after the Austro-Hungarian Compromise, this minority realised the concept of cultural Protestantism in its purest form: ethnicity and religion were understood to be congruent. Homogeneity of society was the ideal, and affiliation with the German Empire was intensified. Economy, science, culture, language as well as school and church were understood as a unity; segregation and emigration were frowned upon. This concept fell into crisis due to various developments, including economic ones – especially after the annexation of Romania in 1918. National Socialism was widely adopted, along with anti-Semitism. For exponents of the church leadership, the Confessio Augustana only served as a label. On the one hand, external pressure under communist rule brought about a (only conditionally possible) retraditionalisation, on the other hand, it led to the bleeding out of the congregations due to increased emigration. Free development has only started again since the political upheaval in 1989. The church, which has become small, conveys important impulses and serves as a bridge to ecumenism.

### **Intelligent Decision Support Systems for Smart City**

**Applications** Loveleen Gaur, Vernika Agarwal, Prasenjit Chatterjee, 2023-02-01 INTELLIGENT DECISION SUPPORT SYSTEMS FOR SMART CITY APPLICATIONS This book provides smart city frameworks to address new difficulties by adding new features and allowing the city environment to react to collected data and information to increase the efficiency and sustainability of services for inhabitants. Making a smart city is an emerging strategy to mitigate the problems generated by urban population

growth and rapid urbanization. This book aims to provide a better understanding of the concept of smart cities and the application of an intelligent decision support system. Based on the analysis of existing information there are eight critical factors of smart city initiatives: management and organization, technology, governance, policy context, people and communities, economy, built infrastructure, and natural environment. This book will focus on the application of the decision support system in managing these eight crucial aspects of smart cities. The intent in writing this book was also to provide a source that covers the stage-by-stage integration of the four key areas involving planning, physical infrastructure, ICT infrastructure, and deploying the smart solutions necessary for city transformation. With this as the motivation, "Decision Support Systems for Smart City Applications" provides the application of an intelligent decision support system for effectively and efficiently managing the transformation process, which can aid various supply chain stakeholders, academic researchers, and related professionals in building smart cities. Various chapters of this book are expected to support practicing managers during the implementation of smart solutions for city transformation. Audience This book is aimed at both academics and practitioners alike in the fields of intelligent computing, decision support systems, the manufacturing industry, supply chain managers, stakeholders, policymakers, and other technical and administrative personnel.

### **Document-Based Assessment Activities** Cynthia

Boyle, Blane Conklin, Kathleen Vest, 2009-07-15 Take students beyond textbook history to explore various people and events from ancient Egypt through the 20th Century using primary sources. Students will develop critical-thinking and essay writing skills as they analyze the various documents including photographs, posters, letters, maps, and more. Multiple social studies topics are included for grades K-3, 4-8, and 9-12. This resource includes engaging digital resources and is aligned to

College and Career Readiness and other state standards.

**Solutions Manual to accompany Ordinary Differential Equations** Michael D. Greenberg, 2014-08-28 Features a balance between theory, proofs, and examples and provides applications across diverse fields of study Ordinary Differential Equations presents a thorough discussion of first-order differential equations and progresses to equations of higher order.

**After Effects Most Wanted** Lee Reynolds, Mark Towse, Joost Korngold, Chris James Hewitt, Simon Tzysko, Christian Darkin, 2013-11-11 So you've got a copy of After Effects and an idea of what this professional motion graphics and effects tools can do...but what can you really do with After Effects? How far can you push it? What are the best effects that you can create? What are the essential skills and techniques that you need to really make your creations stand out? After Effects Most Wanted answers these questions in a refreshing and practical way. Looking at a wide variety of projects, the original artists tell you why, and exactly how they created their masterpieces. The authors, all professionals who use After Effects to make a living, share with you the secrets of their successes and extend beyond that to give you the reasons why they did things the way that they did. Moreover, the accompanying CD has their creations available at your fingertips and the simple, step-by-step instructions in the book show you how they created these pieces. The projects covered are diverse, from a thought-provoking work by renowned and controversial artist Simon Tsyko, a work featured by Adobe in their motion gallery, to a television commercial for McDonald's and Coca-Cola by Peter Reynolds. Other authors include: Joost Korngold ([www.renascent.nl](http://www.renascent.nl)) and Chris James Hewitt, whose Relocation Ne is the featured work on the BD4D (By Designers For Designers) web site, Christian Darkin, a digital video journalist and author, and Mark Towse, who offers two pieces, one for TV and one for the cinema. Without long, redundant discussions of tools and application packages, After Effects Most

Wanted is a book that delivers the techniques, skills, and effects that will let you bring your creations to life.

**Reliability of Engineering Systems and Technological Risk** Vladimir Rykov, 2016-08-16 This book is based on a lecture course to students specializing in the safety of technological processes and production. The author focuses on three main problems in technological risks and safety: elements of reliability theory, the basic notions, models and methods of general risk theory and some aspects of insurance in the context of risk management. Although the material in this book is aimed at those working towards a bachelor's degree in engineering, it may also be of interest to postgraduate students and specialists dealing with problems related to reliability and risks.

**Medicine in a Minute** Amar Vaswani, Hwan Juet Khaw, 2018-12-21 Winner of the Young Authors Award at the BMA book awards 2019! AND Highly Commended in the Medicine category! Here's what the BMA reviewers said: I would unreservedly recommend this book to any medical student and indeed anyone else who wanted to learn more about internal medicine including junior doctors, nurses, physicians' assistants. I would have loved a book like this when I was a medical student. Medicine in a Minute is a new full-colour text covering the fundamentals of undergraduate medicine in one book. Medical students no longer have the time or inclination to read the huge texts that used to dominate this market - they need a concise

book that covers the core information they have to know, and in a user-friendly format: Medicine in a Minute is this book! The book is edited and written by two of the authors behind the bestselling Cardiology in a Heartbeat and features several common design elements and features. It has quickly found favour with medical students and is consistently one of the bestselling medical student texts. The book is divided into body systems and then each section within the particular body system follows a consistent pattern: Definition Epidemiology Risk factors Differential diagnosis Aetiology Pathophysiology Clinical features Investigations Management Medicine in a Minute is a student-friendly, concise text that you will want close to hand throughout your studies.

Origin & Ancestors Families Karle & Kaiser of the German-Russian Volga Colonies Darrel Philip Kaiser, 2006-04 Join me in this book as I stumble my way across das Mutterland to learn all I can about my maternal and paternal surnames, Karle & Kaiser, and my other forty-five ancestral surnames (Adolf, Andreas, Arp, Arnst, Becker, Bopp, Burbach, Dagenheim, Foht, Freund, Geringer, Grun, Hart, Heiland, Hermann, Hess, Heylmann, Hieronymus, Horn, Ikstadt, Kohler, Kramer, Lieders, Maurer, Michel, Neumann, Nicolausen, Nillmayer, Popp, Roth, Rudolph, Schaeffer, Scherer, Schiller, Schmiedt, Schneider, Schutz, Simon, Steitz, Trieber, Trippel, Vogt, Werner, Will, Zeichmann). Read how the Black Death, and the 30 Years and 7 Years Wars plagued them. Learn of the Catherine the Great Scam and its effect on the Volga Germans. Share their fear as the Russians close in. Travel with them to their new homeland in the Americas. Traces the origins of Karle & Kaiser from about 50,000BC. Covers DNA tracking, pre-German history, religion, the Volga life and villages, and escape to the Americas. Over 560 pages, 200 pictures, 80 maps.

Database Management System - Concepts And Architectures  
Prof. E. Vijayakumar, Dr. Bharat Batham, Dr. P M Yohan, Dr. SK

Althaf Hussain Basha,2023-02-27 The book starts with an introduction that covers the fundamentals, including Database User's Database Languages, & Administrators, Database Design, as well as Data Storage, and Querying. The conceptual design, the logical design, and the physical design are the three stages that are covered in this book, which follow the conventional approach for the construction of databases. Understanding the process of researching databases and constructing databases may be made easier with the help of this technique, which is logical and organized. The content that is provided in this book has a strong focus on applications, practical problems, and implementation, in addition to providing a full discussion of the most important theoretical principles in a way that is easy to understand. While the supplied algorithms and ideas are not specifically bound to any one database management system, annotations and variants that are tailored to the various database management systems are included. This information is presented in a broader context. The principles are explained using language that is simple to comprehend, and there is an adequate number of examples provided. A comprehensive analysis of recent developments in database systems is presented here. Students are given an overview of many different kinds of database management systems, including PL/SQL, Oracle, and Microsoft Access, during a short introduction to each of these.

*Damage Mechanics in Metal Forming* Khemais

Saanouni,2013-02-04 The aim of this book is to summarize the current most effective methods for modeling, simulating, and optimizing metal forming processes, and to present the main features of new, innovative methods currently being developed which will no doubt be the industrial tools of tomorrow. It discusses damage (or defect) prediction in virtual metal forming, using advanced multiphysical and multiscale fully coupled constitutive equations. Theoretical formulation, numerical aspects as well as application to various sheet and bulk metal forming are

presented in detail. Virtual metal forming is nowadays inescapable when looking to optimize numerically various metal forming processes in order to design advanced mechanical components. To do this, highly predictive constitutive equations accounting for the full coupling between various physical phenomena at various scales under large deformation including the ductile damage occurrence are required. In addition, fully 3D adaptive numerical methods related to time and space discretization are required in order to solve accurately the associated initial and boundary value problems. This book focuses on these two main and complementary aspects with application to a wide range of metal forming and machining processes. Contents 1. Elements of Continuum Mechanics and Thermodynamics. 2. Thermomechanically-Consistent Modeling of the Metals Behavior with Ductile Damage. 3. Numerical Methods for Solving Metal Forming Problems. 4. Application to Virtual Metal Forming.

Loop-shaping Robust Control Philippe Feyel, 2013-06-12 The loop-shaping approach consists of obtaining a specification in relation to the open loop of the control from specifications regarding various closed loop transfers, because it is easier to work on a single transfer (in addition to the open loop) than on a multitude of transfers (various loopings such as set point/error, disturbance/error, disturbance/control, etc.). The simplicity and flexibility of the approach make it very well adapted to the industrial context. This book presents the loop-shaping approach in its entirety, starting with the declension of high-level specifications into a loop-shaping specification. It then shows how it is possible to fully integrate this approach for the calculation of robust and efficient correctors with the help of existing techniques, which have already been industrially tried and tested, such as H-infinity synthesis. The concept of a gap metric (or distance between models) is also presented along with its connection with the prime factors of a set of systems shaping a ball of models, as well as its connections with robust synthesis by

loop-shaping, in order to calculate efficient and robust correctors. As H-infinity loop-shaping is often demanding in terms of the order of correctors, the author also looks at loop-shaping synthesis under an ordering constraint. Two further promising lines of research are presented, one using stochastic optimization, and the other non-smooth optimization. Finally, the book introduces the concept of correction with two degrees of freedom via the formalism of prime factorization. Avenues for future work are also opened up by the author as he discusses the main drawbacks to loop-shaping synthesis, and how these issues can be solved using modern optimization techniques in an increasingly competitive industrial context, in accordance with ever more complex sets of functional specifications, associated with increasingly broad conditions of usage.

Beyond EHR Jeffery P. Daigrepont, EFPM,

CAPPM,2020-11-29 Today, it is not uncommon for practices and hospitals to be on their second or third EHR and/or contemplating a transition from the traditional on-premise model to a cloud-based system. As a follow-up to Complete Guide and Toolkit to Successful EHR Adoption (©2011 HIMSS), this book builds on the best practices of the first edition, fast-forwarding to the latest innovations that are currently leveraged and adopted by providers and hospitals. We examine the role that artificial intelligence (AI) is now playing in and around EHR technology. We also address the advances in analytics and deep learning (also

known as deep structured or hierarchical learning) and explain this topic in practical ways for even the most novice reader to comprehend and apply. The challenges of EHR to EHR migrations and data conversions will also be covered, including the use of the unethical practice of data blocking used as a tactic by some vendors to hold data hostage. Further, we explore innovations related to interoperability, cloud computing, cyber security, and electronic patient/consumer engagement. Finally, this book will deal with what to do with aging technology and databases, which is an issue rarely considered in any of the early publications on healthcare technology. What is the proper way to retire a legacy system, and what are the legal obligations of data archiving? Though a lot has changed since the 2011 edition, many of the fundamentals remain the same and will serve as a foundation for the next generation of EHR adopters and/or those moving on to their second, third, fourth, and beyond EHRs.

Handbook of Materials for Percussion Musical Instruments

Voichita Bucur, 2022-07-07 This book describes the properties of materials used for making percussion instruments for classical music played by a symphony orchestra in which the instruments could be played as a soloist instrument or as a group or several groups of instruments, as they are included into a musical work. A chapter is devoted to the bells. The scope of this book is primarily confined to percussion instruments of symphony orchestras taking into account the centuries of musical art and tradition. This book bridges the gap in the technical literature on describing the properties of materials for percussion instruments—timpani, other drums, marimba, xylophone, vibraphone, gong, cymbal, triangle, celesta, castanets.

*The Contest for Rule in Eighteenth-Century Iran* Charles Melville, 2022-07-14 This volume explores the troubled eighteenth century in Iran, between the collapse of the Safavids and the establishment of the new Qajar dynasty in the early decades of the nineteenth century. Despite the striking military successes of

Nader Shah, to defeat the Afghan invaders, drive back the Ottomans in the west, and launch campaigns into India and Central Asia, Iran steadily lost territory in the Caucasus and the east, where Persian arms failed to recover lands lost to the Afghans and the Ozbeks. The chapters of this book cover the continuity and change over this transitional period from a range of perspectives including political history, historiography, art and material culture. They illuminate the changes in Iran's internal conditions, including the legitimising legacy of the Safavid period in court chronicles, the rise of Nader Shah and his influence on the idea of Iran, as well as the art of successive dynasties competing for power and prestige. The volume also addresses Iran's changed international situation by examining relations with Russia, Britain and India, the result of which would contribute to its re-emergence with a curtailed presence in the new world order of European dominance.
