Bretherick's Handbook of Reactive Chemical Hazards L. Bretherick,2016-10-27 Bretherick's Handbook of Reactive Chemical Hazards, Fourth Edition, has been prepared and revised to give access to a wide and up-to-date selection of documented information to research students, practicing chemists, safety officers, and others concerned with the safe handling and use of reactive chemicals. This will allow ready assessment of the likely potential for reaction hazards which may be associated with an existing or proposed chemical compound or reaction system. A secondary, longer-term purpose is to present the information in a way which will, as far as possible, bring out the causes of, and interrelationships between, apparently disconnected facts and incidents. This handbook includes all information which had become available to the author by April 1989 on the reactivity hazards of individual elements or compounds, either alone or in combination. It begins with an introductory chapter that provides an overview of the complex subject of reactive chemical hazards, drawing attention to the underlying principles and to some practical aspects of minimizing such hazards. This is followed by two sections: Section 1 provides detailed information on the hazardous properties of individual chemicals, either alone or in combination with other compounds; the entries in Section 2 are of two distinct types. The first type of entry gives general information on the hazardous behavior of some recognizably discrete classes or groups of the 4,600 or so individual compounds for which details are given in Section 1. The second type of entry concerns reactive hazard topics, techniques, or incidents which have a common theme or pattern of behavior involving compounds of several different groups, so that no common structural feature exists for the compounds involved.

Submerged Prehistory Jonathan Benjamin,2011 Major events of human prehistory such as the post-glacial recolonization of Northern Europe and the spread of agriculture through the Mediterranean took place on landscapes that are now, at least partially, underwater. Large parts of this submerged terrain are accessible to divers and can be investigated archaeologically. Prehistoric underwater research has emerged in recent decades as a distinct sub-discipline, developing approaches and methodologies that can be applied in coastal regions worldwide. As a result there is growing awareness of the potential for underwater archaeology to transform our ideas about the course of prehistory. This volume examines existing practice and new developments in the field of submerged prehistoric landscape research. The 25 peer-reviewed contributions from leading authors cover the results of recent research on three continents and the application of methodologies and techniques for site discovery, investigation and interpretation.

Of Bonobos and Men Deni Ellis Béchard,2015 When Deni Béchard learned of the last living bonobos matriarchal great apes that are our closest relatives in the animal kingdom he was astonished. How could we accept the disappearance of this being with so much to tell us about our own past? As he looked more closely though, the challenge of protecting them become discouragingly clear: Their home in the Congo rainforest has been devastated by war and aggressive resource extraction, and the people there are understandably skeptical of foreign intervention. And yet, when he decides to travel into the Congo with the Bonobo Conservation Initiative, he realize through hundreds of interviews, days traveling on motorcycles and canoes, and hours sitting with local guides waiting on apes that poverty does not equate to ignorance, that change requires more than wealth and power, and that only through collaboration can we achieve sustainable species conservation around the world. An adventure travel story as compelling as it is inspiring.

Silvia's Cucina Silvia Colloca,2013 'Italians are passionate and opinionated about their food and I am no exception!' Italian-born food lover, blogger and actress Silvia Colloca offers us her

personal insight into authentic Italian home cooking. Now living in Australia, she is quick to correct the misconception that every dish must be drowned in olive oil or topped with a thick coating of parmesan. On the contrary, Silvia's everyday recipes are simple, light and healthy, and based on fresh, seasonal ingredients. This is the food she grew up with. This is how Italians really eat. Step into Silvia's kitchen and sample such goodies as twice-cooked cinnamon galettes, watermelon rind jam, white wine and fennel crackers, Abruzzese fisherman's stew with garlic toast, ricotta gnocchi with cavolo nero pesto, and strawberry and mascarpone cake. Silvia's warmth, humour and thoughtful instructions show you how easily it can be done in your own kitchen.
