Microplastic in the Environment: Pattern and Process Michael S. Bank, 2021-10-09 This open access book examines global plastic pollution, an issue that has become a critical societal challenge with implications for environmental and public health. This volume provides a comprehensive, holistic analysis on the plastic cycle and its subsequent effects on biota, food security, and human exposure. Importantly, global environmental change and its associated, systems-level processes, including atmospheric deposition, ecosystem complexity, UV exposure, wind patterns, water stratification, ocean circulation, etc., are all important direct and indirect factors governing the fate, transport and biotic and abiotic processing of plastic particles across ecosystem types. Furthermore, the distribution of plastic in the ocean is not independent of terrestrial ecosystem dynamics, since much of the plastic in marine ecosystems originates from land and should therefore be evaluated in the context of the larger plastic cycle. Changes in species size, distribution, habitat, and food web complexity, due to global environmental change, will likely alter trophic transfer dynamics and the ecological effects of nano- and microplastics. The fate and transport dynamics of plastic particles are influenced by their size, form, shape, polymer type, additives, and overall ecosystem conditions. In addition to the risks that plastics pose to the total environment, the potential impacts on human health and exposure routes, including seafood consumption, and air and drinking water need to be assessed in a comprehensive and quantitative manner. Here I present a holistic and interdisciplinary book volume designed to advance the understanding of plastic cycling in the environment with an emphasis on sources, fate and transport, ecotoxicology, climate change effects, food security, microbiology, sustainability, human exposure and public policy.

In sixteen chapters, the volume explores a broad range of topics pertaining to bioequivalence, including its origin and principles, statistical considerations, food effect studies, conditions for waivers of bioequivalence studies, Biopharmaceutics Classification Systems, Biopharmaceutics Drug Disposition Classification System, bioequivalence modeling/simulation and best practices in bioanalysis. It also discusses bioequivalence studies with pharmacodynamic and clinical endpoints as well as bioequivalence approaches for highly variable drugs, narrow therapeutic index drugs, liposomes, locally acting gastrointestinal drug products, topical products and nasal and inhalation products. FDA Bioequivalence Standards is written by FDA regulatory scientists who develop regulatory policies and conduct regulatory assessment of bioequivalence. Tournament of Lawyers Marc Galanter, Thomas Palay, 1994-01-15 Tournament of Lawyers traces in detail the rise of one hundred of the nation's top firms in order to diagnose the health of the business of American law. Galanter and Palay demonstrate that much of the large firm's organizational success stems from its ability to blend the talents of experienced partners with those of energetic junior lawyers driven by a powerful incentive—the race to win the promotion-to-partner tournament. This calmly reasoned study reveals, however, that the very causes of the spiraling growth of the large law firm may lead to its undoing. Galanter and Palay pose questions and offer some answers which are certain to change the way big firm practice is regarded. To describe their work as challenging is something of an understatement: they at times delight, stimulate, frustrate and even depress the reader, but they never disappoint. Tournament of Lawyers is essential to the understanding of the business of the big law firms.—Jean and Colin Fergus, New York Law Journal

Postharvest Physiology and Storage of Tropical and Subtropical Fruits S. K. Mitra, 1997 Tropical and subtropical fruits are becoming more important food items in countries where they are produced and also in an increasing number of importing countries in non-tropical zones. For many of the countries where they are grown these crops represent one of the primary ways of earning valuable foreign exchange. In the last few years, fruit production in most tropical and subtropical countries of the world has increased substantially, and most of the fruits grown in these regions now have established and growing markets in North America and Europe. The transport of tropical and subtropical fruits from areas of production to markets in temperate zones raises particular postharvest storage issues, while postharvest losses in the tropics themselves can be considerable. Whilst there are several texts addressing the postharvest needs of temperate fruits, there has not until now been a comprehensive volume dealing with tropical and subtropical fruits. This volume is the first book to deal with the postharvest storage, physiology and conservation of all of the economically important tropical and subtropical fruits. Contributors include leading research workers from throughout the world, including Europe, North, Central and South America, Australia, New Zealand, East and Southeast Asia and the Middle East. The resultant work represents a substantial contribution to this important and fast developing area. The book is essential reading for all horticultural researchers and students working with these crops and for growers, exporters and importers within the industries concerned with tropical and subtropical fruits.

Politics By Other Means Richard Abel, 2015-12-22 Politics by Other Means explores the fundamental question of how law can constrain political power by offering a pathbreaking account of the triumphant final decade of the struggle against apartheid. Richard Abel presents case studies of ten major legal campaigns including: challenges to pass laws; black trade union demands for recognition; state terror; censorship; resistance to the independent homelands; and treason trials.

Anatomy of a Miracle Patti Waldmeir, 1998 The late 1980s were a dismal time inside South Africa. Mandela's African National Congress was banned. Thousands of ANC supporters were jailed without charge. Government hit squads assassinated and terrorized opponents of white rule. Ordinary South Africans, black and white, lived in a perpetual state of dread. Journalist Patti Waldmeir evokes this era of uncertainty in Anatomy of a Miracle, her comprehensive new book about the stunning and-historically speaking-swift transformation of South Africa from white minority oligarchy to black-ruled democracy. Much that Waldmeir documents in this carefully researched and elegantly written book has been well reported in the press and in previous books. But what distinguishes her work is a reporter's attention to detail and a historian's sense of sweep and relevance. . . . Waldmeir has written a deeply reasoned book, but one that also acknowledges the power of human will and the tug of shared destiny.—Philadelphia Inquirer

Tomorrow Is Another Country Allister Sparks, Allister Sparks, 2012-01-31 Tomorrow is Another Country celebrates the miraculous social, moral and political transformation in South Africa signaled by the death of apartheid. For the first time, the true events which shaped history are revealed in this fascinating account. A drama hidden behind official world coverage, which stretches back to the four years before Nelson Mandela was released from jail in February 1990. Allister Sparks, South Africa's award-winning journalist, tells an extraordinary story of secret meetings between leading government parties, their political prisoners and the outlawed opposition - a dangerous, bloody political conflict which led to the historic election of 1994.

The Sussex Plan Dominique Soulier, 2013-11-19 The Sussex Plan was a French-American-British tripartite mission desired by the staff of General Eisenhower in anticipation of the Normandy landings. Among them, 120 French men and women were recruited to carry out a bold plan to parachute in early February 1944, teams of two plainclothes officers (an observer and a radio) behind enemy lines to complete the liberation of France. Their mission: infiltrate and collect information around the clock about the state of affairs of the German order of battle.

Creativity and Intelligence Jacob W. Getzels, Phillip W. Jackson, 2011-03-10 Creativity is one of the most highly valued of human qualities. It is also one of the most elusive to systematic inquiry. Questions without end have been asked and re-asked. What is the nature of the creative process? Can creative potential be identified before creative achievement? What is the effect of family environment on creative development? What is the relationship between creativity and personality? Between creativity and intelligence? We ourselves begin with the last question, hoping that in the course of seeking an answer we shall throw light on the other

issues. The concept of intelligence and the consequent intelligence measure have been used to define individual differences in cognition as if the concept and the measure encompassed the totality of the human mind and imagination. In school, and more recently in other areas requiring intellectual accomplishment, the IQ (or some cognate of it) has become the critical metric on which individuals are evaluated and sorted, given preferment or denied it. Individual differences in potential for productive thinking have been made synonymous with individual differences in performance on one or another of the numerous intelligence tests. We began our studies with few preconceptions and few presuppositions. We did not begin (as is our more usual preference) with an explicitly stated theoretical framework and a set of formal hypotheses. Instead, we permitted the behavior of the children and our own interests, whatever their conceptual foundation, to lead us from problem to problem and from question to question. That this procedure enabled us sometimes to come upon fascinating new vistas in the behavior of children seemed worth the cost of being often lost in phenomena without relevant explicit concepts to guide our observations.
