Listening to Images Tina M. Campt,2017-03-17 In *Listening to Images* Tina M. Campt explores a way of listening closely to photography, engaging with lost archives of historically dismissed photographs of black subjects taken throughout the black diaspora. Engaging with photographs through sound, Campt looks beyond what one usually sees and attunes her senses to the other affective frequencies through which these photographs register. She hears in these photos—which range from late nineteenth-century ethnographic photographs of rural African women and photographs taken in an early twentieth-century Cape Town prison to postwar passport photographs in Birmingham, England and 1960s mug shots of the Freedom Riders—a quiet intensity and quotidian practices of refusal. Originally intended to dehumanize, police, and restrict their subjects, these photographs convey the softly buzzing tension of colonialism, the low hum of resistance and subversion, and the anticipation and performance of a future that has yet to happen. Engaging with discourses of fugitivity, black futurity, and black feminist theory, Campt takes these tools of colonialism and repurposes them, hearing and sharing their moments of refusal, rupture, and imagination.

What in the World is Music? Alison E. Arnold,Jonathan C. Kramer,2023-09-13 *What in the World is Music? Second Edition* is an undergraduate, interactive e-textbook that explores the shared ways people engage with music and how humans organize and experience sound. It adopts a global approach, featuring more than 300 streaming videos and 50 streaming audio tracks of music from around the world. Drawing from both musicological and ethnomusicological modes of inquiry, the authors explain the nature and meaning of music as a universal human practice, making no distinction between Western and non-Western repertoires while providing students with strong points of connection to the ways it affects their own lives. The *What in the World is Music?* curriculum is divided into five parts, with a fully integrated multimedia program linked directly to the chapters: *The Foundations of Music I* proposes a working definition of music and considers inquiry-guided approaches to its study: Why do humans have innate musical perception? How does this ability manifest itself in the human voice? A catalog of musical instruments showcases global diversity and human ingenuity. *The Foundations of Music II* continues the inquiry-guided approach, recognizing the principles by which musical sound is organized while discussing elements such as rhythm, melody, harmony, texture, form, genre, and style. Where did music come from? What is it for? *Music and Identity* examines how music operates in shaping, negotiating, and expressing human identity and is organized around three broad conceptual frames: the group, hybridity, and conflict. *Music and the Sacred* addresses how music is used in religious practices throughout the world: chanting sacred texts and singing devotional verses, inspiring religious experience such as ecstasy and trance, and marking and shaping ritual space and time. *Music and Social Life* analyzes the uses of music in storytelling, theater, and film. It delves into the contributions of sound technologies, while looking at the many ways music enhances nightlife, public ceremonies, and festivals.

Untangled Web David T Graham,Jane McNeil,Lloyd Pettiford,2014-09-15 The internet and world wide web are revolutionizing many aspects of our lives, and have become an accepted part of socioeconomic experience in developed countries. For entertainment, shopping, banking, establishing friendships, seeking information, and so on, the web is the first port of call for an increasing number of people. A few in education have been quick to see the potential of the web as a platform for delivering a variety of teaching and learning materials. Many more, however, would like to make use of the web, but lack either the time or the skills, or both. *Untangled Web* provides a guide for those wishing to develop their own teaching and learning resources on the web, whether for local, open or distance learning. By using this book, potential web educators can acquire some of these basic skills and save time by drawing on the experiences of the authors and avoiding the pitfalls and problems that they have encountered. The authors have gained considerable expertise in devising, designing, constructing, testing, adapting and evaluating their own web-based instruction packages which have been developed over a number of years and involve a variety of subject areas. *Untangled web* is therefore very much focused on practical experience, and while it is primarily aimed at teachers in further and higher education, schoolteachers interested in using the web as a teaching and learning medium will find it useful. *Untangled Web* has been written by an experienced team from the Department of International Studies at the Nottingham Trent University. David Graham teaches geography and information

technology; Jane McNeil is Faculty webmaster and teaches medieval history and information technology; Lloyd Pettiford teaches international relations. Innovative guide to using the web in teaching and learning, providing practical advice for lecturers and teachers on using the web as more than just a support tool
