Classic Speedsters Ronald Sieber,2021-11 Classic Speedsters: The Cars, The Times, and The Characters Who Drove Them chronicles the most significant vehicles ever to have traveled American roads and racetracks. Speedsters were the pizzazz cars of their era. Speedsters were owned by entertainers, captains of industry, the wealthy, and in some cases, the everyday guy or gal. They were often expensive, but always fast and sexy. Speedsters were America's first sports cars.Each

chapter frames the birth and evolution of a company that produced a speedster model in its lineup and includes a biography of a famous owner of the period. This book traces the journey of the speedster concept across several time periods and among twelve automotive companies. It answers three fundamental questions:· Why were these cars so important and influential?· Why did so many prominent people own them?· What message do they have for modern design?

Bury My Heart at Conference Room B Stan Slap,2010-08-12 #3 New York Times Advice/How-To Bestseller #7 Wall Street Journal Nonfiction Bestseller This book is game changing in a way I have never seen in a business book. I learned about myself and gained new insights into the work I've been doing for thirty years. It is a spectacular read. – John Riccitiello, CEO, Electronic Arts This is not a management book. This is a book for managers. Ever have the feeling that no

matter how rewarding your job is that there's an entirely different level of success and fulfillment available to you? Linger in the mist, just out of reach... There is, and Stan Slap is going to help you get it. You hold in your hands the book that entirely redraws the potential of being a manager. It will show you how to gain the one competency most critical to achieving business impact, but it won't stop there. This book will put a whole new level of meaning into your job description. You will never really work for your company until your company really works for you. Bury My Heart at Conference Room B is about igniting the massive power of any manager's emotional commitment to his or her company—worth more than financial, intellectual and physical commitment combined. Sometimes companies get this from their managers in the early garage days or in times of tremendous gain, but it's almost unheard of to get it on a sustained, self-reinforced basis. Of course your company is only going to get it if you're willing to give it. Slap proves that emotional commitment comes from the ability to live your deepest personal values at work and then provides a remarkable process that allows you to use your own values to achieve tremendous success. This is not soft stuff; it is the stuff of hard-core results. Bury My Heart at Conference Room B is the highest-rated management development solution at a number of the world's highest-rated companies—companies that don't include patience on their list of corporate values. It has been exhaustively researched and bench tested with tens of thousands of real managers in more than seventy countries. You'll hear directly from managers about how this legendary method has transformed their careers and their lives. As Big as It Gets Stan Slap is doing nothing less than making the business case for a manager's humanity—for every manager and the companies that depend on them. Bury My Heart at Conference Room B gives managers the urgency to change their world and the energy to do it. It will stir the soul, race the heart, and throb the foot used for

acceleration. Buckle Up. We're Going Off-Road. Slap is smart, provocative, wickedly funny and heartfelt. He fearlessly takes on some of the most cherished myths of management for the illogic they are and celebrates the experience of being a manager in all of its potential and potential weirdness. And he talks to managers like they really talk to themselves.

Packard Beverly Rae Kimes, 2007 Only the legendary Packard could command a book of such scope and expense. This monumental work has required ten years of research, documentation and photography. It represents many more decades of collecting Packard automobiles, facts, photographs, technical data and information to record for all time every aspect, every model, every achievement of the Packard motor car and the men who made its name an emblem and international byword for taste and refinement in automotive design and engineering. Over three years were spent in intensive writing, checking, cross-checking, rewriting, coordinating, editing, and winnowing thousands of rare and unpublished historic photographs. This volume represents the scholarly efforts of sixteen contributors and was written by ten highly qualified authorities on Packard lore. Winner of a Cugnot Award.

Race of the Century Julie M. Fenster, 2006-06-27 Capturing the determination and thrill of an era when technology made anything seem possible, this work tells the story of the death-defying New York-to-Paris Auto Race held in 1908. Photos.

Phil Hill Phil Hill, 2010 America's first World Champion Phil Hill drove an astonishing variety of cars and gave his firsthand impressions in his work for Road & Track magazine. This book gathers some of the best material Hill produced with his great friend and colleague, photographer John Lamm. In addition to providing the lush photography Lamm edited the book and introduces each

story to provide context. Beginning with the world's first car-the 1886 three-wheel Benz-Hill reviews road cars such as the 1915 Packard and Jaguar XK120, and a great range of race cars, from a Bugatti Type 51 and Auto Union D type, to the ill-fated ATS Grand Prix car and Dale Earnhardt's NASCAR Chevrolet Monte Carlo. Equally gifted as a mechanic as well as a driver, Hill's experience combines to provide insights that only he could offer into each car's particular technical innovations and driving characteristics. The book also features examples of Hill's tributes to men in racing, with reminiscences of Juan Fangio and Olivier Gendebien on the occasions of their deaths, and penetrating character sketches of Dan Gurney, Stirling Moss, and Jim Hall. Hill knew and raced with them all. Through the humor and intelligence of Hill's writing we not only learn great deal about cars and drivers, we also learn a lot about Hill himself-what he valued and how he thought- which adds enormously to our enjoyment.

James Melton Margo Melton Nutt,2013-04-12 "America's Favorite Tenor." That was what they called James Melton from the 1920s through the 1950s. He was perhaps the first multi-media performer—in a career that spanned concerts, recordings, movies, the Metropolitan Opera, radio and television. His fame as a singer was equaled by his renown as an antique car collector. In this hobby he was a pioneer in recognizing these vehicles not only as an important part of America's history, but as works of art. His career and his hobby reflected the two great technologies that knit the country together in the first half of the 20th century—radio and the automobile.The James Melton story is the story of an era: from the Roaring Twenties, through the Great Depression, World War II, and post-war prosperity. It is a story filled with interesting characters—his friends and colleagues. He toured the Southwest with Will Rogers to raise money for dustbowl denizens in 1931; he collaborated with George Gershwin in 1934 on a concert tour of 28 cities in 29 days; while in

Hollywood making movies for Warner Bros. he visited San Simeon as the guest of William Randolph Hearst; he helped to raise millions at War Bond rallies with performers like Milton Berle and Irving Berlin; he began his TV career after talking Henry Ford II into a Ford Motor Company-sponsored variety show. He created his own lucky breaks through a combination of hard work, talent and charm. All the while he was collecting antique cars, displaying his collection in two museums and participating in car activities. Even fifty years after his death, the provenance of having been in the Melton collection provides added value to those cars. James Melton's life and career are emblematic of America in the first half of the 20th century—a country possessed by a “can do” attitude—a country that could win two world wars and pull itself out of the Great Depression. The James Melton story also a rags-to-riches-to-rags story of a talented, confident young man who raised himself from obscure beginnings in a tiny Florida town to the height of fame on stage, screen and airwaves—but who could not live without the adulation of an adoring public, and who had nothing to fall back on as he aged and musical tastes changed. The author chose to do a biographical memoir because it allowed her to tell the story from her point of view—anecdotally. It includes her personal exploration of the motivations that shaped her father's life, and her discovery of the resulting pressures that brought him down.

Built for Adventure Clive Cussler, 2011-10-27 A photographic tour through Clive Cussler's outstanding collection of antique automobiles, including those featured in his #1 New York Times bestselling Dirk Pitt series. Through stunning color photographs and warm, informative commentary, fans of Cussler and Pitt can see fifty-six of these automobiles in all their

glory, and learn about the history and acquisition of each classic car. Rolls-Royce Silver Ghost Touring . . . Mercedes-Benz 630K . . . Duesenberg J-140 . . . Cadillac V-16 Roadster . . . Ford Cabriolet Hot Rod . . . Packard V-12 . . . it's a car lover's paradise!

GMC Light-Duty Trucks James K. Wagner, 2007-06-01 Appealing to both historians and enthusiasts GMC Light Duty Trucks is a chronological overview of the popular General Motors vehicles that have been long considered Pontiac's trucks. It begins by tracing their roots to the year 1902 and origins as the long-departed Rapid and Reliance brands. The story continues with the pair joining an emergent General Motors and 1912 consolidation as GMC. A discussion of significant early milestones follows: Model 15 of 1914 the first true GMC; the role of GMC's military vehicles during the First World War; and, the impact of General Motors' acquiring Yellow Cab Manufacturing Company, which it merged with General Motors Truck Company and led to the wide range of GMC

light duties when Yellowcab trucks, the Pontiac Delivery and Chevrolet Commercial Bodies were integrated into the evolving GMC line. Next the important middle years are reviewed, highlighting effects of GM's corporate styling leadership on GMC; the offering expansion of the immediate pre-World War II era that brought several distinctive types to the line-up; the all-new 1939 model light truck engine, cab and bodies; contributions to the Second World War allied military effort; and, the birth of GMC Truck & Coach Division. The major postwar styling and functional redesigns of 1947 and 1955 are covered in detail along with the arrival of civilian 4x4 pickups and, in particular, the ambitious Breakthrough Engineering efforts for 1960, culminating in the V-6 engine program that marked the high tide of GMC uniqueness. The book concludes by summarizing the past three decades when a broadening diversity of added models-sport utilities, diesels, full-size and mini vans, multi-purpose vehicles, and compact and mid-size pickups contributed to a massive growth in customer acceptance.

The 356 Porsche Brett Johnson, 2019-12-24 The 356 Porsche, A Restorer's Guide to Authenticity IV takes a part-by-part, year-by-year approach to what an owner or prospective buyer should look for when evaluating a 356 Porsche. For each year, from 1950 through 1965, the author examines every change, documented or not, of each model - and now including major mechanical components. Included are the most accurate and comprehensive chassis number and color/upholstery listings anywhere.

Recreational Vehicles Andrew Woodmansey, 2022-04-06 Has there ever been a stranger idea in the vehicle world than putting a house on wheels and taking it on holiday? However odd it may seem, it's an idea that has caught on. Today there are 15 million recreational vehicles, or 'RVs', on

the roads of Europe, the USA and Australasia. So how did this fascinating family of vehicles come about? Who were the first recreational nomads, what made them want to take to the road just for pleasure and what did the first RVs look like? The wild ideas of RV pioneers around the world led to both streamlined successes and spectacular failures. This history beautifully illustrates the vehicles and exploits of the early RV mavericks with over 250 period photos of the vehicles, their builders and their owners. It explores the evolution of the RV from its horse-drawn roots through the steam era to the golden age of 1930s caravans and motorhomes. Many rare photos of early RVs were uncovered during the research for this book and are being published for the first time. These photos shed new light on the history of the RV. The RV family is a global one, with six countries in particular having a strong RV heritage - the UK, USA, France, Germany, Australia and New Zealand. In a world first, this history compares the early evolution of RV design and usage in each country. Also featured is an international gallery of RVs adapted for non-recreational purposes. By portraying not just the vehicles but also the trends, people and fashions of the period, this unique RV history reveals the remarkable early days of transport-based tourism and leisure. Andrew Woodmansey's engaging account of the early days of the RV will appeal not only to RV enthusiasts but also to anyone with an interest in how vehicles set us free to roam the world.
