**MiG-17/19 Aces of the Vietnam War** István Toperczer, 2016-10-18 Packed with new information from Vietnamese archives, this is the first major analysis of the exploits of Vietnamese pilots of the MiG-17/19 fighter jets in the David and Goliath contest with the US.

**MiG-17 and MiG-19 Units of the Vietnam War** István Toperczer, 2012-11-20 The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period.

**USAF F-105 Thunderchief Vs VPAF MiG-17** Peter E. Davies, 2019-07-23 A comparative evaluation of the tactics and technology involved in the battles between the USAF's Republic F-105 Thunderchief fighter-bombers and their VPAF MiG-17 opponents during the Vietnam War. Fully illustrated with stunning artwork, this book shows how the F-105 and the MiG-17, totally different in design and purpose, fought in a series of duels that cost both sides dearly. The F-105D Thunderchief was originally designed as a low-altitude nuclear strike aircraft, but the outbreak of the Vietnam War led to it being used instead as the USAF's primary conventional striker against the exceptionally well-defended targets in North Vietnam and Laos. F-105 crews conducted long-distance missions from bases in Thailand, refueling in flight several times and carrying heavy external bombloads. The MiG-17 was the lightweight, highly maneuverable defending fighter it encountered most often in 1965-68 during Operation Rolling Thunder. A development of the MiG-15, which shocked UN forces during the Korean War, its emphasis was on simplicity and ease of maintenance in potentially primitive conditions.

**Origami Aircraft** Jayson Merrill, 2006-06 Clear instructions and step-by-step diagrams show advanced paperfolders — and enthusiastic beginners — how to construct origami aircraft that actually fly! 16 planes, among them the Bandit, Shadow, Firestorm, and Cyclone, are all made from square sheets of paper and are fully functional. The planes soar, landing gear retracts, cockpits open, and cannons swivel.

**F-86 Sabre vs MiG-15** Douglas C. Dildy, Warren Thompson, 2013-05-20 As the routed North Korean People's Army (NKPA) withdrew into the mountainous reaches of their country and the People's Republic of China (PRC) funneled in its massive infantry formations in preparation for a momentous counter-offensive, both lacked adequate air power to challenge US and UN. Reluctantly, Josef Stalin agreed to provide the requisite air cover, introducing the superior swept-wing MiG-15 to counter the American's straight-wing F-80 jets. This in turn prompted the USAF to deploy its very best – the F-86A Sabre – to counter this threat. Thus began a two-and-a-half-year struggle in the skies known as “MiG Alley.” In this period, the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat. This meticulously researched study not only provides technical descriptions of the two types and their improved variants, complete with a “fighter pilot's assessment” of these aircraft, but also chronicles the entire scope of their aerial duel in “MiG Alley” by employing the recollections of the surviving combatants – including Russian, Chinese, and North Korean pilots – who participated.

**Wrong on Both Sides** Vin Vincent, 1885

**Soviet MiG-15 Aces of the Korean War** Leonid Krylov, Yuriy Tepsurkaev, 2012-12-20 The Soviet Union began assisting the People's Republic of China in its establishment of a modern air force in 1950, when Soviet Air Force regiments were sent to train local pilots. China's involvement in the Korean War in late October 1950 inevitably drew Soviet pilots into the war, with a total of 52 Soviet pilots scoring five or more victories there. The history of these covert actions has been a long-buried secret and this book is the first English publication to detail the only instance when the Cold War became 'hot'. This book uncovers Soviet combat experiences during the Korean War from detailed unit histories and rare first-hand account. With access to extensive Russian archives, the authors offer an enthralling insight into an air war that has been largely covered up and neglected. Illustrated with previously unpublished photographs and detailed full colour profiles, this book is a unique opportunity to read about an often-forgotten aspect of the Cold War.

**Panzerwrecks 19** Lee Archer, Bojan Dimitrijevic, 2015 Panzerwrecks 19: 151 rare and unpublished large format photographs about the German fighting vehicles in Yugoslavia.

**Soviet Cold War Fighters** Alexander Mladenov, 2017-04-20 Beautifully illustrated with many rare and unpublished photographs, Soviet Cold War Fighters looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each - a total of four generations of fighter were developed from the late 1940s to the early 1980s - that witnessed the most iconic and powerful fighters such as the legendary MiG-15, MiG-21, Tu-128, Su-9, MiG-23, MiG-25 reach for the skies, followed by the modern day MiG-29, MiG-31 and Su-27, which strike fear in the West for their phenomenal weaponry and blistering performance. All aircraft are described in detail with facts and figures, including their weapons and instances of combat employment, as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West. Researched and written by Alexander Mladenov, a leading aviation journalist, this is a highly detailed testament to leading Soviet fighter design and development.

**MiG Killers** Donald J McCarthy, 2019-06-16 The story of U.S. Air Force and Navy flight crews who battled the Soviet-built enemy MiGs over Southeast Asia. Describes all 202 MiG kills, with serial number, tail code, operational unit, crewmember names, callsign, weaponry, and tactics for each aircraft credited with a Mig kill from April 1965 to January 1973.

**Act of War** Jack Cheevers, 2014-12-02 WINNER OF THE SAMUEL ELIOT MORISON AWARD FOR NAVAL LITERATURE “I devoured Act of War the way I did Flyboys, Flags of Our Fathers and Lost in Shangri-la.”—Michael Connelly, #1 New York Times Bestselling Author In 1968, the small, dilapidated American spy ship USS Pueblo set out to pinpoint military radar stations along the coast of North Korea. Though packed with advanced electronic-surveillance equipment and classified intelligence documents, its crew, led by ex-submarine officer Pete Bucher, was made up mostly of untested young sailors. On a frigid January morning, the Pueblo was challenged by a North Korean gunboat. When Bucher tried to escape, his ship was quickly surrounded by more boats, shelled and machine-gunned, forced to surrender, and taken prisoner. Less than forty-eight hours before the Pueblo's capture, North Korean commandos had nearly succeeded in assassinating South Korea's president. The two explosive incidents pushed Cold War tensions toward a flashpoint. Based on extensive interviews and numerous government documents released through the Freedom of Information Act, Act of War tells the riveting saga of Bucher and his men as they struggled to survive merciless torture and horrendous living conditions set against the backdrop of an international powder keg.

**Soviet Tactical Aviation** E. Gordon, Yefim Gordon, Dmitriy Komissarov, 2011 At its height during the Cold War, Soviet tactical aviation was a large force of fighter, bomber, and attack air regiments with a high degree of readiness - many units stationed outside the Soviet Union saw actual combat. But, even as progressively more refined jet aircraft came into service - Yak-23, MiG-17 fighters and IL-28 tactical bombers, the attack aviation units still flew outdated IL-10 piston-engined aircraft well into the 1950s. Soviet pilots in combat over the People's Republic of China, North Korea, and Cuba, and their role in Eastern Europe combine with more than 500 color photographs, 50 color profiles, details of units, and insignia to give an in-depth look at this important era.

**Anne Frank's Tales from the Secret Annexe** Anne Frank, 2010 In these tales the reader can observe Anne's writing prowess grow from that of a young girl's into the observations of a perceptive, edgy, witty and compassionate woman--Jacket flaps.

**The Limits to Growth**, 1975

My Years with the IAF Pratap Chandra Lal,1986 This is the first time that an Air Chief is sharing his thoughts and memories with the reading public. His span of service covers a period of thirty-three years: from the end of 1939 to the beginning of 1973. It includes the Burma campaign of World War II, the restricted fighting in Kashmir in 1947 and 1948, the Chinese debacle in 1962 and the two full scale wars with Pakistan in 1965 and 1971. He had 4,274 hrs of flying with the Air Force to his credit and the experience of flying 58 types of aircraft from Wapitis to supersonic jets. In 1965 he was the Vice Chief of Air Staff and in 1971 the Chief. His honesty and forthrightness many readers will find engaging& but perhaps a few who were on the scene then may find them unpalatable. In a way this is the story of aviation in India, in particular of the Indian Air Force. It is a story of a real life adventure the genesis, growth and achievements of the youngest of the three defence services. Sir Winstom Churchill said of the RAF: Never before in the history of human conflict was so much owed by so many to so few. That is true also of the Indian Air Force. Though this does not purport to be a history of the Indian Air Force without it no history would be complete.
