**Jonathan's Journey** Jayaraman Krishnan,2018-01-02 "A book that will change your imagination." - Murali Sunderarajan, mywritingworld.com "This book explains the practical implication of ethics, moral reasoning, and how people get trapped in a cognitive tunnel." - Chandrasekar Chatterjee, former professor at Paris Univesity "He who can no longer pause to wonder and stand in awe is as good as dead; his eyes are closed." These words of Albert Einstein sound true of most of us. Most of us are alive but are as good as dead. Jonathan is not. His guru, the old man is not,. Jonathan's Journey is all about pausing to wonder about this enigmatic and ever elusive universe. While science has answers, Jonathan has more and more questions. The answers he gets from his guru and his own research leaves him spellbound.

*Chinese Perspectives on the International Rule of Law* Matthieu Burnay,2018-07-27 This insightful book investigates the historical, political, and legal foundations of the Chinese perspectives on the rule of law and the international rule of law. Building upon an understanding of the rule of law as an 'essentially contested concept', this book analyses the interactions between the development of the rule of law within China and the Chinese contribution to the international rule of law, more particularly in the areas of global trade and security governance.

**The Cambridge Handbook of Disaster Risk Reduction and International Law** Katja L. H. Samuel,Marie Aronsson-Storrier,Kirsten Nakjavani Bookmiller,2019-02-28 The number, intensity, and impact of diverse forms of 'natural' and 'human-made' disasters are increasing. In response, the international community has shifted its primary focus away from disaster response to prevention and improved preparedness. The current globally agreed upon roadmap is the ambitious Sendai Framework for Disaster Risk Reduction 2015–2030, central to which is the better understanding of disaster risk management and mitigation. Sendai also urges innovative implementation, especially multi-sectoral and multi-hazard coherence. Yet the law sector itself remains relatively under-developed, including a paucity of supporting 'DRR law' scholarship and minimal cross-sectoral engagement. Commonly, this is attributable to limited understanding by other sectors about law's dynamic potential as a tool of disaster risk mitigation, despite the availability of many risk-related norms across a broad spectrum of legal regimes. This unique, timely Handbook brings together global and multi-sector perspectives on one of the most pressing policy issues of our time.

Each of the 128 articles is accompanied by an overview of the drafting history as well as a bibliography of academic literature relevant to the provision. Written by a single author, the Commentary avoids duplication and inconsistency, providing a comprehensive presentation to assist those who must understand, interpret, and apply the complex provisions of the Rome Statute.This volume has been well-received in the academic community and has become a trusted reference for those who work at the Court, even judges. Nanotechnology, Lessons from Nature Deb Newberry,2022-06-01 As long as humans have existed on the planet, they have looked at the world around them and wondered about much of what they saw. This book covers 21 different phenomena that have been observed in nature and puzzled about for decades.Only recently, with the development of the microscopes and other tools that allow us to study, evaluate, and test these observed phenomena at the molecular and atomic scale, have researchers been able to understand the science behind these observations. From the strength of a marine sponge found at the depths of the oceans, to the insect-hydroplaning surface of the edge of a plant, to the intricacies of the eyes of a moth, nanotechnology has allowed science to define and understand these amazing capabilities. In many cases, this new understanding has been applied to products and applications that benefit humans and the environment. For each of the five ecosystems– the ocean, insects, flora, fauna, and humans–the observations, study and understanding, and applications will be covered. The relationship between the more easily observed macro level and understanding what is found at the nanoscale will also be discussed.
