The Story of a New Name Elena Ferrante,2020-03-03 A novel in the bestselling quartet about two very different women and their complex friendship: “Everyone should read

anything with Ferrante's name on it" (The Boston Globe). The follow-up to *My Brilliant Friend*, *The Story of a New Name* continues the epic New York Times–bestselling literary quartet that has inspired an HBO series, and returns us to the world of Lila and Elena, who grew up together in post-WWII Naples, Italy. In *The Story of a New Name*, Lila has recently married and made her entrée into the family business; Elena, meanwhile, continues her studies and her exploration of the world beyond the neighborhood that she so often finds stifling. Marriage appears to have imprisoned Lila, and the pressure to excel is at times too much for Elena. Yet the two young women share a complex and evolving bond that is central to their emotional lives and a source of strength in the face of life's challenges. In these Neapolitan Novels, Elena Ferrante, "one of the great novelists of our time" (The New York Times), gives us a poignant and universal story about friendship and belonging, a meditation on love and jealousy, freedom and commitment—at once a masterfully plotted page-turner and an intense, generous-hearted family saga. "Imagine if Jane Austen got angry and you'll have some idea of how explosive these works are." —The Australian "Brilliant . . . captivating and insightful . . . the richness of her storytelling is likely to please fans of Sara Gruen and Silvia Avallone." —Booklist (starred review)

Orbital Mechanics for Engineering Students Howard D Curtis, 2009-10-26 Orbital Mechanics for Engineering Students, Second Edition, provides an introduction to the basic concepts of space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the classical two-body problem; derivation of Kepler's equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. NEW: Reorganized and improved discussions of coordinate systems,

new discussion on perturbations and quaternions NEW: Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems

The Sense of an Ending Julian Barnes, 2011-10-05 BOOKER PRIZE WINNER • NATIONAL BESTSELLER • A novel that follows a middle-aged man as he contends with a past he never much thought about—until his closest childhood friends return with a vengeance: one of them from the grave, another maddeningly present. A novel so compelling that it begs to be read in a single sitting, *The Sense of an Ending* has the psychological and emotional depth and sophistication of Henry James at his best, and is a stunning achievement in Julian Barnes's oeuvre. Tony Webster thought he left his past behind as he built a life for himself, and his career has provided him with a secure retirement and an amicable relationship with his ex-wife and daughter, who now has a family of her own. But when he is presented with a mysterious legacy, he is forced to revise his estimation of his own nature and place in the world.

Piety in Pieces Kathryn M. Rudy, 2016-09-26 Medieval manuscripts resisted obsolescence. Made by highly specialised craftspeople (scribes, illuminators, book binders) with labour-intensive processes using exclusive and sometimes exotic materials (parchment made from dozens or hundreds of skins, inks and paints made from prized minerals, animals and plants), books were expensive and built to last. They usually outlived their owners. Rather than discard them when they were superseded, book owners found ways to update, amend and upcycle books or book parts. These activities accelerated in the

fifteenth century. Most manuscripts made before 1390 were bespoke and made for a particular client, but those made after 1390 (especially books of hours) were increasingly made for an open market, in which the producer was not in direct contact with the buyer. Increased efficiency led to more generic products, which owners were motivated to personalise. It also led to more blank parchment in the book, for example, the backs of inserted miniatures and the blank ends of textual components. Book buyers of the late fourteenth and throughout the fifteenth century still held onto the old connotations of manuscripts—that they were custom-made luxury items—even when the production had become impersonal. Owners consequently purchased books made for an open market and then personalised them, filling in the blank spaces, and even adding more components later. This would give them an affordable product, but one that still smacked of luxury and met their individual needs. They kept older books in circulation by amending them, attached items to generic books to make them more relevant and valuable, and added new prayers with escalating indulgences as the culture of salvation shifted. Rudy considers ways in which book owners adjusted the contents of their books from the simplest (add a marginal note, sew in a curtain) to the most complex (take the book apart, embellish the components with painted decoration, add more quires of parchment). By making sometimes extreme adjustments, book owners kept their books fashionable and emotionally relevant. This study explores the intersection of codicology and human desire. Rudy shows how increased modularisation of book making led to more standardisation but also to more opportunities for personalisation. She asks: What properties did parchment manuscripts have that printed books lacked? What are the interrelationships among

technology, efficiency, skill loss and standardisation?

None But the Righteous Chantal James, 2023-01-17 Lyrical, riveting, and haunting from its opening lines, *None But the Righteous* is an extraordinary debut that signals the arrival of an unforgettable new voice in contemporary fiction [A] profound debut novel . . . James captures the simple kindnesses of a cup of coffee or a shared cellphone as though they were religious acts. Where a more ponderous writer might lapse into a lengthy stream of consciousness, James uses short chapters to weave a story of fractured time and uncharted space into the fabric of life after Katrina . . . This is a book of faith aching to be claimed, of a land that dares to be redeemed, of souls searching to be free, of all spirits looking for a home. It's a metaphysical book deeply rooted in ancient legacies of subjugation . . . This is a deeply haunted novel that moves with calm and ruthless determination, like the eye of a hurricane. —The Los Angeles Times In seventeenth-century Peru, St. Martin de Porres was torn from his body after death. His bones were pillaged as relics, and his spirit was said to inhabit those bones. Four centuries later, amid the havoc of Hurricane Katrina, nineteen-year-old Ham escapes New Orleans with his only valued possession: a pendant handed down from his foster mother, Miss Pearl. There's something about the pendant that has always gripped him, and the curiosity of it has grown into a kind of comfort. When Ham finally embarks on a fraught journey back home, he seeks the answer to a question he cannot face: Is Miss Pearl still alive? Ham travels from Atlanta to rural Alabama, and from one young woman to another, as he evades the devastation that awaits him in New Orleans. Catching sight of a freedom he's never known, he must reclaim his body and mind from the spirit who watches over him, guides him, and seizes possession of him.

Wild Swans Jung Chang, 2008-06-20 The story of three generations in twentieth-century China that blends the intimacy of memoir and the panoramic sweep of eyewitness history—a bestselling classic in thirty languages with more than ten million copies sold around the world, now with a new introduction from the author. An engrossing record of Mao's impact on China, an unusual window on the female experience in the modern world, and an inspiring tale of courage and love, Jung Chang describes the extraordinary lives and experiences of her family members: her grandmother, a warlord's concubine; her mother's struggles as a young idealistic Communist; and her parents' experience as members of the Communist elite and their ordeal during the Cultural Revolution. Chang was a Red Guard briefly at the age of fourteen, then worked as a peasant, a "barefoot doctor," a steelworker, and an electrician. As the story of each generation unfolds, Chang captures in gripping, moving—and ultimately uplifting—detail the cycles of violent drama visited on her own family and millions of others caught in the whirlwind of history.

Object-Based Image Analysis Thomas Blaschke, Stefan Lang, Geoffrey Hay, 2008-08-09 This book brings together a collection of invited interdisciplinary perspectives on the recent topic of Object-based Image Analysis (OBIA). Its content is based on select papers from the 1st OBIA International Conference held in Salzburg in July 2006, and is enriched by several invited chapters. All submissions have passed through a blind peer-review process resulting in what we believe is a timely volume of the highest scientific, theoretical and technical standards. The concept of OBIA first gained widespread interest within the GIScience (Geographic Information Science) community circa 2000, with the advent of the first commercial software for what was then termed 'object-oriented image analysis'.

However, it is widely agreed that OBIA builds on older segmentation, edge-detection and classification concepts that have been used in remote sensing image analysis for several decades. Nevertheless, its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis, Geographic Information Systems (GIS) and the synergy between image-objects and their radiometric characteristics and analyses in Earth Observation data (EO).

The Cry of the Owl Patricia Highsmith, 2011-07-12 A man's obsession with a beautiful woman leads to danger in this psychological thriller by the author of *The Talented Mr. Ripley* and *The Price of Salt*. In a small Pennsylvania town, Robert Forrester is recuperating from a nasty divorce and a bout of psychological trouble. One evening, while driving home, he sees a pretty, young woman framed by her bright kitchen window. Soon, he can't keep himself away. But when Robert is inevitably discovered, obsession is turned on its head, and he finds himself unable to shake the young woman, nor entirely sure whether he should. From Patricia Highsmith, once called "the balladeer of stalking" by *The New Yorker*, *The Cry of the Owl* is a modern classic ready to be reborn. Praise for *The Cry of the Owl* "Kafka with a vengeance." —*The Spectator* (London) "Highsmith generates suspense out of a different sort of fear: not the fear of death, which drives most crime-centered entertainment, but the pettier, more intimate dread of humiliation, of being caught on the street with nothing on. . . . There's something else here, hard to identify, pulling us along relentlessly, as thrillers do—an undertow, a surge of third-rail current." —*The New Yorker* "The Cry of the Owl is a deceptively easy stroll toward personal chaos and destruction. It is thoroughly chilling because nothing seems farfetched. Odd, yes, but believable. . . . The Cry

of the Owl is creepy and unsettling, a taut psychological thriller.” —Linnea Lannon, Detroit Free Press “One of her lesser-known works . . . and one of her most unsettling. Which is saying plenty. . . . The crime writer Elmore Leonard has written a host of novels with the same basic plot: Plans go wrong. The story message driving all of Highsmith’s work is similarly simple and clear: We live on thin ice. Highsmith revolts some readers, yet hypnotizes many others. She’s sui generis, a writer of almost occult power.” —Richard Rayner, Los Angeles Times

Advanced Deep Learning Strategies for the Analysis of Remote Sensing Images Yakoub Bazi, Edoardo Pasolli, 2021-06-15 The rapid growth of the world population has resulted in an exponential expansion of both urban and agricultural areas. Identifying and managing such earthly changes in an automatic way poses a worth-addressing challenge, in which remote sensing technology can have a fundamental role to answer—at least partially—such demands. The recent advent of cutting-edge processing facilities has fostered the adoption of deep learning architectures owing to their generalization capabilities. In this respect, it seems evident that the pace of deep learning in the remote sensing domain remains somewhat lagging behind that of its computer vision counterpart. This is due to the scarce availability of ground truth information in comparison with other computer vision domains. In this book, we aim at advancing the state of the art in linking deep learning methodologies with remote sensing image processing by collecting 20 contributions from different worldwide scientists and laboratories. The book presents a wide range of methodological advancements in the deep learning field that come with different applications in the remote sensing landscape such as wildfire and postdisaster damage

detection, urban forest mapping, vine disease and pavement marking detection, desert road mapping, road and building outline extraction, vehicle and vessel detection, water identification, and text-to-image matching.
