The Craftsman Richard Sennett,2009-02-05 Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Tales and Tombstones of Sunset Cemetery June Hadden Hobbs,Joe DePriest,Hal Bryant,2021-11-18 This book relates the stories and describes the memorials of the people buried in Shelby, North Carolina's historic Sunset Cemetery, a microcosm of the Southeastern United States. The authors, an academic and a journalist, detail the lives and memories of people who are buried here, from Civil War soldiers to those who created the Jim Crow South and promoted the narrative of the Lost Cause. Featured are authors W.J. Cash and Thomas Dixon, whose racist novel was the basis for *The Birth of a Nation*. Drawn from historical research and local memory, it includes the tales of musicians Don Gibson and Bobby Pepper Head London, as well as a paratrooper who died in the Battle of the Bulge and other ordinary folks who rest in the cemetery. A bigger responsibility is to give a voice to the silenced, enslaved people of color buried in unmarked graves. Cemeteries are sacred places where artistry and memory meet--to understand, we need both the tales and the tombstones.

The Da Vinci Globe Stefaan Missinne, 2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds: a distinct globe with mysterious images, such as old ships, sailors, a volcano, a hybrid monster, pentimenti, waving patterns, conic individualised mountains, curving rivers, vigorous coastal lines, chiaroscuro and an unresolved triangular anagram, which remains an enigma. The globe is hand-engraved in great detail on ostrich egg shells from Pavia by a left-handed Renaissance genius of unquestionable quality. It shows secret knowledge of the map world from the time of Columbus, Cabral, Amerigo Vespucci and Leonardo da Vinci. Central and North America are covered by a vast ocean. The da Vinci globe originates from Florence and dates from 1504. It marks the first time ever that the names of countries such as Brazil, Germania, Arabia and Judea have appeared on a globe. A Leonardo drawing for this globe, showing the coast of the New World and Africa has been discovered in the British Library. This book brings the reader through a fabulous journey of scholars, maps, riddles, rebuses, iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe. It details 500 years of mystery, fine scholarship and expert forensic testing at numerous material science laboratories the world over. The da Vinci globe now takes its rightful place, surpassing the Lenox globe, its copper-cast identical twin, as the most mysterious globe of our time. As such, this monograph is an essential text in Leonardo studies and in the history of cartography.

The Naming of America Martin Waldseemüller, 2008 This new book features a facsimile of the 1507 World Map by Martin Waldseemüller - the first map ever to display the name America - and tells the fascinating story behind its creation in 16th-century France and rediscovery 300 years later in the library of Wolfegg Castle, Germany, in 1901. It also includes a completely new translation and commentary to Martin Waldseemüller and Matthias Ringmann's seminal cartographic text, the *Cosmographiae Introductio*, which originally accompanied the World Map. John Hessler considers answers to some of the key questions raised by the map's representation of the New World, including How was it possible for a small group of cartographers to have produced a view of the world so radical for its time and so close to the one we recognize today?; and What evidence did they possess to show the existence of the Pacific Ocean when neither Vasco Nunez de Balboa nor Ferdinand Magellan had yet reached it'. There are no easy answers, and yet, as this fascinating book reveals, this group of unknowns created some of the most important maps in the history of cartography, and afford us a glimpse into an age when accepted scientific and geographic principles fell away, spawning the birth of modernity.
