Concepts of Biology Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07
Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

From Dissertation to Book William Germano, 2008-04-15 All new Phd's hope that their dissertations can become books. But a dissertation is written for a committee and a book for the larger world. William Germano's *From Dissertation to Book* is the essential guide for academic writers who want to revise a doctoral thesis for publication. The author of *Getting It Published*, Germano draws upon his extensive experience in academic publishing to provide writers with a state-of-the-art view of how to turn a dissertation into a manuscript that publishers will notice. Acknowledging first that not all theses can become books, Germano shows how some dissertations might have a better life as one or more journal articles or as chapters in a newly conceived book. But even dissertations strong enough to be published as books first need to become book manuscripts, and at the heart of *From Dissertation to Book* is the idea that revising the dissertation is a fundamental process of adapting from one genre of writing to another. Germano offers clear guidance on how to do just this. Writers will find advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. With crisp directives, engaging examples, and a sympathetic eye for the foibles of academic writing, *From Dissertation to Book* reveals to recent PhD's the process of careful and thoughtful revision—a truly invaluable skill as they grow into their new roles as professional writers.

The Spirit of Green William D. Nordhaus, 2021-05-18 From a Nobel Prize-winning pioneer in environmental economics, an innovative account of how and why “green thinking” could cure many of the world's most serious problems—from global warming to pandemics Solving the world's biggest problems—from climate catastrophe and pandemics to wildfires and corporate malfeasance—requires, more than anything else, coming up with new ways to manage the powerful interactions that surround us. For carbon emissions and other environmental damage, this means ensuring that those responsible pay their full costs rather than continuing to pass them along to others, including future generations. In The Spirit of Green, Nobel Prize-winning economist William Nordhaus describes a new way of green thinking that would help us overcome our biggest challenges without sacrificing economic prosperity, in large part by accounting for the spillover costs of economic collisions. In a discussion that ranges from the history of the environmental movement to the Green New Deal, Nordhaus explains how the spirit of green thinking provides a compelling and hopeful new perspective on modern life. At

the heart of green thinking is a recognition that the globalized world is shaped not by isolated individuals but rather by innumerable interactions inside and outside the economy. He shows how rethinking economic efficiency, sustainability, politics, profits, taxes, individual ethics, corporate social responsibility, finance, and more would improve the effectiveness and equity of our society. And he offers specific solutions—on how to price carbon, how to pursue low-carbon technologies, how to design an efficient tax system, and how to foster international cooperation through climate clubs. The result is a groundbreaking new vision of how we can have our environment and our economy too.

Revolutionary Brothers Tom Chaffin, 2019-11-26 In a narrative both panoramic and intimate, Tom Chaffin captures the four-decade friendship of Thomas Jefferson and the Marquis de Lafayette. Thomas Jefferson and the Marquis de Lafayette shared a singularly extraordinary friendship, one involved in the making of two revolutions—and two nations. Jefferson first met Lafayette in 1781, when the young French-born general was dispatched to Virginia to assist Jefferson, then the state’s governor, in fighting off the British. The charismatic Lafayette, hungry for glory, could not have seemed more different from Jefferson, the reserved statesman. But when Jefferson, a newly-appointed diplomat, moved to Paris three years later, speaking little French and in need of a partner, their friendship began in earnest. As Lafayette opened doors in Paris and Versailles for Jefferson, so too did the Virginian stand by Lafayette as the Frenchman became inexorably drawn into the maelstrom of his country's revolution. Jefferson counseled Lafayette as he drafted The Declaration of the Rights of Man and remained a firm supporter of the French Revolution, even after he returned to America in 1789. By 1792, however, the upheaval had rendered Lafayette a man without a country, locked away in a succession of Austrian and Prussian prisons. The burden fell on Jefferson, along with Lafayette's other friends, to win his release. The two would not see each other again until 1824, in a powerful and emotional reunion at Jefferson’s Monticello. Steeped in primary sources, *Revolutionary Brothers* casts fresh light on this remarkable, often complicated, friendship of two extraordinary men.

Teddy: Her Book Anna Chapin Ray, 1898 The five McAlisters were gathered in the dining-room, one rainy night in late August. In view of the respective dimensions of the family circle and the family income, servants were few in the McAlister household, and division of labor was the order of the day. Old

Susan had cleared away the table and brought in the lamp; then she retired to the kitchen, leaving the young people to themselves. Hope was darning stockings. She had one of Hubert's socks drawn on over her hand, which showed, white and dainty, through the great, ragged hole. Hubert sat near her with little Allyn on his knee, tiding over a crisis in the young man's temper by showing him pictures in the dilapidated Mother Goose which had done duty for successive McAlisters, from seventeen-year-old Hope down. Stop kicking brother, he commanded, as Allyn lifted up his voice and his heels in vigorous protest against things in general, and the approach of the sandman in particular. Listen, Allyn, - 'There was a little man, And he had a little gun, And his bullets were made of lead, lead, lead.'
