Nefertiti, the Spidernaut Darcy Pattison, 2017-12-13 Read Along or Enhanced eBook: Most spiders spin a web and passively wait for prey to come to them. Jumping spiders, by contrast, actively hunt by jumping to catch their food. What if a jumping spider was sent to the International Space Station? When it jumped, it would simply float. No one knew if the spider could hunt in a weightless environment. This nonfiction picture book for elementary kids chronicles the amazing voyage of Nefertiti, the Spidernaut to the International Space Station and back. She's a *Phiddipus johnsonii*, or Johnson jumping spider, native to western United States. Her colorful anatomy—red, black and

teal—made for stunning photography and video. In 2012, Nefertitti clocked a record-breaking 100 days in space, during which time she circled Earth about 1584 times, traveling about 41,580,000 miles.

Riding Through It Nikki Porter, 2021-11-26 *Riding Through It* is a collection of stories written by

equestrian women who have shown up openly and honestly. We describe ourselves as horse people and sometimes we describe ourselves as crazy too. Perhaps that goes hand in hand with deciding to love something so deeply. That love has the potential to make or break us- depending on how open we are to learning the lessons horses teach us. We are proud to be among the world's horse people, and the stories we share with you on these pages will show you why, strengthen your pride as a horse person, or maybe even make you wish you were one too. In this book, you will read stories of loss, heartbreak, grief, fear, pain, and rock bottom, but because of horses, you will also see them transform into stories of hope, resilience, love, awareness, self-acceptance, confidence, compassion, and awakenings. No two stories are alike. Each writer and the experiences they share with us are as unique as they are, but there is a thread that weaves each story together and connects every equestrian in the world: Horses test and transform us.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of

land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
