Maakies Tony Millionaire, 2001 The very first Maakies compilation of every strip appearing from its inception in 1994 through to 1996. Millionaire focuses on the adventures of an alcoholic and suicidal crow, mixed with shockingly elegant depictions of nautical adventures. It's all uncannily crafted with Millionaire's breathtaking line, which eerily reproduces the feel and spirit of earlier classic newspaper strips. Designed by Millionaire and Chip Kidd, whose art direction and packaging of Batman The Complete History ensured his place as one of the all time greatest book designers.

Interdisciplinary Research : Case Studies from Health and Social Science Frank Kessel, Patricia Rosenfield Carnegie Corporation of New York, Norman Anderson American Psychological Association, 2008-03-11 Interdisciplinary research now receives a great deal of attention because of the rich, creative contributions it often generates. But a host of factors--institutional, interpersonal and intellectual--also make a daunting challenge of conducting research outside one's usual domain. This newly updated and revised edition of Interdisciplinary Research is a substantive and practical guide to the most effective

avenues for collaborative and integrative research in the social, behavioral, and bio-medical sciences. It provides answers to questions such as what is the best way to conduct interdisciplinary research on topics related to human health, behavior, and development? Which are the most successful interdisciplinary research programs in these areas? How do you identify appropriate collaborators? How do you find dedicated funding streams? How do you overcome peer-review and publishing challenges? This is the only book that provides answers directly from researchers who have carried out successful interdisciplinary programs. The editors give a concise account of the lessons that can be taken from the book, and then present a series of case studies that reveal the most successful interdisciplinary research programs. These programs provide a variety of models of how best to undertake interdisciplinary research. Each of the chapter authors has carried out innovative, collaborative programs, and all give compelling accounts of the benefits of interdisciplinary research and the central strategies required to achieve them.

Strange Enemies Aparecida Vilaça, 2010-05-19 In 1956, in the Brazilian state of

Rondônia, a group of Wari' Indians had their first peaceful contact with whites: Protestant missionaries and officers from the national Indian Protection Service. On returning to their villages, the Wari' announced, "We touched their bodies!" Meanwhile the whites reported to their own people that "the region's most warlike tribe has entered the pacification phase!" Initially published in Brazil, *Strange Enemies* is an ethnographic narrative of the first encounters between these peoples with radically different worldviews. During the 1940s and 1950s, white rubber tappers invading the Wari' lands raided the native villages, shooting and killing their victims as they slept. These massacres prompted the Wari' to initiate a period of intense retaliatory warfare. The national government and religious organizations subsequently intervened, seeking to "pacify" the Indians. Aparecida Vilaça was able to interview both Wari' and non-Wari' participants in these encounters, and here she shares their firsthand narratives of the dramatic events. Taking the Wari' perspective as its starting point, *Strange Enemies* combines a detailed examination of these cross-cultural encounters with analyses of classic ethnological themes such as kinship, shamanism, cannibalism, warfare, and mythology.

Isadora Moon Goes on a Field Trip Harriet Muncaster, 2019-03-19 Fans of Vampirina and the Princess in Black series will love Isadora Moon: half-fairy, half-vampire, totally unique--and totally unafraid to be different! Isadora is the only half-fairy, half-vampire in her human school. She knows what it's like to be different. But that's okay because everyone at her school is a little different from everyone else! When Isadora's classmates are frightened by a field trip to a spooky old castle (what if they see a ghost?!), it's up to Isadora to remind them that things that are different aren't necessarily scary.

Lang, 2011 Fish and other sea creatures pose a special challenge to origami designers: Two renowned paperfolders explain how to represent their fins, scales, gills, antennae, and other distinctive characteristics with 24 models ranging from intermediate to very complex. The Orient Under the Caliphs Alfred Freiherr von Kremer, 1920 Von Kremer's ulturgeaehichte des Orients will be welcome to all English-knowing lovers of Islamic history and culture. Von Kremer still stands unsurpassed. He has had no competitors; he alone occupies the field. His researches patient, laborious, thorough have illumined every aspect of Muslim life. He is the most trustworthy interpreter of the social, political, economic, literary, and legal problems of Islam. The volume before us opens with an account of the death of the Prophet, and the trouble that arose over the question of succession. Faction fought faction. Heavy banks of cloud loomed up menacingly on the political horizon of Arabia. The spirit of tribal faction theretofore checked and kept in restraint asserted itself; and, in its very infancy, Islam was threatened with division, disunion, ruin and disruption. Omar saw the danger, and felt the need of prompt and vigorous action. He did as a

practical and sagacious statesman would do. He settled the question of succession at a stroke ;and with that the clouds rolled away, and the danger which had confronted I slam was at once averted. -- From <https://www.amazon.co.uk> (Sep. 21, 2016).

Steve Jackson and Ian Livingstone Present Tower of Destruction Keith Martin,Steve Jackson,Ian Livingstone,1991

La Sombra del Egombe - egombe Gudea de Lagash,2013-10-11 ...va pasando el tiempo en un ir y venir por el pasillo, y para el alba la tormenta ha perdido la fuerza, mientras que ?la Escopetilla? ha recuperado las suyas. Recostada entre las almohadas, sorbe una infusión de contrití que Junípero ha hecho para ella. A su lado, Juan José le toma el pulso que ahora late con normalidad. Ninguno de los tres tiene explicación para lo sucedido, hasta que entre las almohadas una bolsa del tamaño de una rosquilla de San Isidro asoma junto al camisón amarillo. En su interior, un dedo de mono seco, quizá el dedo corazón, y una pequeña hoja medio marchita? Esta es la historia de la familia Camaró y Ojos de Gato, que tras La Guerra Civil Española de 1936, y bajo el régimen del General Franco, emprenden una nueva vida en una tierra extraña y fascinante, como fue La Guinea Española -hoy Guinea Ecuatorial-. Una historia de sentimientos a flor de piel, que marcaron la vida de una niña hasta que en 1968-con la independencia- su familia, como la gran mayoría de los coloniales, dejó esa tierra bendita para no volver.

Conservation by Proxy Tim Caro, 2010-06-23 The vast scope of conservation problems has forced biologists and managers to rely on surrogate species to serve as shortcuts to guide their decision making. These species—known by a host of different terms, including indicator, umbrella, and flagship species—act as proxies to represent larger conservation issues, such as the location of biodiversity hotspots or general ecosystem health. Synthesizing an immense body of literature, conservation biologist and field researcher Tim Caro offers systematic definitions of surrogate species concepts, explores biological theories that underlie them, considers how surrogate species are chosen, critically examines evidence for and against their utility, and makes recommendations for their continued use. The book clarifies terminology and contrasts how different terms are used in the real world; considers the ecological, taxonomic, and political underpinnings of these shortcuts; identifies criteria that make for good surrogate species; outlines the circumstances where the application of the surrogate species concept shows promise. *Conservation by Proxy* is a benchmark reference that provides clear definitions and common understanding of the evidence and theory behind surrogate species. It is the first book to review and bring together literature on more than fifteen types of surrogate species, enabling us to assess their role in conservation and offering guidelines on how they

can be used most effectively.

Gender and the Boundaries of Dress in Contemporary Peru Blenda

Femenías, 2010-01-01 Set in Arequipa during Peru's recent years of crisis, this ethnography reveals how dress creates gendered bodies. It explores why people wear clothes, why people make art, and why those things matter in a war-torn land. Blenda Femenías argues that women's clothes are key symbols of gender identity and resistance to racism. Moving between metropolitan Arequipa and rural Caylloma Province, the central characters are the Quechua- and Spanish-speaking maize farmers and alpaca herders of the Colca Valley. Their identification as Indians, whites, and mestizos emerges through locally produced garments called *bordados*. Because the artists who create these beautiful objects are also producers who carve an economic foothold, family workshops are vital in a nation where jobs are as scarce as peace. But ambiguity permeates all practices shaping *bordados*' significance. Femenías traces contemporary political and ritual applications, not only Caylloma's long-standing and violent ethnic conflicts, to the historical importance of cloth since Inca times. This is the only book about expressive culture in an Andean nation that centers on gender. In this feminist contribution to ethnography, based on twenty years' experience with Peru, including two years of intensive fieldwork, Femenías reflects on the ways gender shapes relationships among subjects, research, and representation.
