**Bien Cuit** Zachary Golper,Peter Kaminsky,2015-11-17 Bien Cuit introduces a new but decidedly old-fashioned approach to bread baking to the cookbook shelf. In the ovens of his Brooklyn bakery, Chef Zachary Golper bakes loaves that have quickly won over New York's top restaurants and bread enthusiasts around the country. His secret: long, low-temperature fermentation, which allows the bread to develop deep, complex flavours and a thick, mahogany-coloured crust - what the French call bien cuit, or 'well baked'. Golper recreates classic breads for the home baker along with an assortment of innovative 'gastronomic breads'.

**The Wines of Northern Spain** EVANS,Sarah Jane Evans,2024-02-07 - Much needed thorough and up-to-date analysis of the wines of northern Spain - Author is a leading authority on the wines of Spain and has received honors from many of its wine regions for her work championing the wines - Spain is currently one of the most exciting and dynamic wine-producing countries in Europe and its third largest wine exporter Although rightly famed for the wines of Rioja, the north of Spain has even more to offer the wine adventurer. Criss-crossed by rivers, its landscape ranges from the dramatic Pyrenees in the north-east to the low inlets of the Atlantic coast in the west. Growers - and consumers - can enjoy a diversity of terroirs and an exciting array of native varieties. This introduction to the wines of northern Spain explores the changes, starting in the west, where the wineries of Galicia - from Rías Baixas to Valdeorras - have multiplied, while Bierzo is building a reputation for aromatic, refreshing reds, and Castilla y León is home to a growing number of individual, top quality producers. Traveling east, the success of Ribera del Duero has attracted investors from outside the region, all eager to gain a share of the limelight, while Aragón is busy building an international reputation for its venerable bush vine Garnachas. Across the country, a new generation is joining established producers in a remarkable blossoming of fine wines. Extensive producer profiles and established and well-known estates mingle on the page with newer makers and small producers to provide a thoroughly up-to-date and indispensable reference. For all wine enthusiasts keen to explore this region - whether in person or from a favourite armchair - The Wines of Northern Spain is essential reading.

Handbook of Burns Volume 2 Lars-Peter Kamolz,Marc G. Jeschke,Raymund E. Horch,Markus Küntscher,Pavel Brychta,2020-07-23 The second edition of this volume has been updated with chapters on scar treatment using laser, microneedling, tissue engineering, adipose tissue and lipofilling. It compiles the perspectives of a multi-author team, examining the entire spectrum of burn reconstruction and long-term treatment. Individual updated chapters cover basic aspects of wound healing and scarring, and plastic surgery relating to tissue rearrangement and the use of flaps, as well as the long-term use of skin and skin substitutes. Furthermore, it addresses topics such as rehabilitation and scar management in detail. It provides comprehensive reconstruction guidelines organized by anatomic region (e.g. face, hands, ...) as well as future trends and prospects

in burn reconstruction, such as allotransplantation and bionics. Please also have a look at the volume Handbook of Burns Volume 1 - Acute Burn Care 2nd edition

Bread Alone: Bold Fresh Daniel Leader, 1993-11-19 Good bread is hard to find and easy to make, says Dan Leader as he draws you into the ancient world of traditional bread baking. Unlike any other bread book, Bread Alone will provide you with a comprehensive guide to creating—at home—the country-style breads that have consistently captured the imagination and the taste buds of the world. In a richly told tale, Leader chronicles his crossings of America and Europe to locate the most vital ingredients at the source, to learn from the methods of the world's great bakers, and to perfect their traditional techniques. His recipes are ones that have been used for centuries: large sourdough ryes, rich and dark raisin pumpernickel loaves, real French pain au levain, big round wheats with walnuts, crusty baguettes, high and airy breads, and more. Made from organic, stone-ground grains, these breads are slow-leavened, hand-shaped, and baked to perfection on heated baking tiles. As you read through the recipes, you can almost smell the ancient aroma of baking bread. And as you begin to bake, you will learn the importance of the primary ingredient in great bread: your own observations. These are some of the breads and techniques you will master: In the chapter Becoming Bread, you will learn to identify and shop for the highest quality flour available. And you will seek it out because you'll taste the difference. Making a poolish will become second nature to you as you master the Learning Recipe: Classic Country-Style Hearth Loaf and its delicious variations. Whatever your schedule, there is a bread for you. In the chapter Straight-Dough Breads: Traditional Breads for a Modern Life-Style, you are shown how to start and finish a recipe in five hours, or morning-to-night, or night-to-night. You will bake sourdough bread in its many forms. By gently introducing the concept of sourdough—how it is made, how it is maintained, and how to get the best flavor from it—Leader demystifies it and makes it accessible to you. Discover the wonders of rye bread: From the dense and chewy Finnish Sour Rye to the fragrant Danish Light Rye, everyone's tastes are served. The mystery of pain au levain, French for bread from a sourdough or wild yeast, unfolds into an understandable, user-friendly process. From My Personal Favorite Pain au Levain, a typical large Parisian loaf, to Pain au Levain with Pecans and Dried Cherries, the Family of Traditional Pain au Levain includes some of the best loaves baked around the world. A perfect baguette is a beautiful thing. From shaping to scoring, you will learn how to make the authentic French baguette at home. The purpose of an organic certifier—find out how and why one farmer becomes dedicated to his role as land steward. Brioche, Chocolate-Apricot Kugelhopf, Panettone, and Semolina Sesame Rolls are a few recipes you will find in A Family of Breads Inspired by Traditional French and Italian Breads. Finally, when a quick bread is all you have time to bake, you will find recipes for such delights as Vanilla Bean Butter Loaf; Dried Pear, Port, and Poppy Seed Loaf; and Provolone Sage Corn Loaf. Bread Alone is the bread book that cooks and bakers have been waiting for. From the wheat fields of the Midwest to the hot and steamy boulangeries of Paris, you will travel the long and delicious road to flawless bread baking. You will emerge a better baker and with a deeper understanding of what it takes to make perfect loaves. Bakers entertain you with stories of their love of baking (even in the most adverse situations). Bread Alone is the bible of bread books and a must-have for bread lovers everywhere.

**Chasing the Moon** Robert Stone, Alan Andres, 2019-06-04 JFK issued the historic moon landing challenge. These are the stories of the visionaries who helped America complete his vision with the first lunar landing fifty years ago. A Companion Book to the AMERICAN EXPERIENCE® Film on PBS® Going in depth to explore their stories beyond the PBS series, writer/producer Robert Stone—called “one of our most important documentary filmmakers” by Entertainment Weekly—brings these important figures to brilliant life. In 1961, President John F. Kennedy proposed the nation spend twenty billion dollars to land a man on the Moon before the end of the decade. Based on eyewitness accounts and newly discovered archival material, Chasing the Moon reveals for the first time the unknown stories of the fascinating individuals whose imaginative work across several decades culminated in America’s momentous achievement. More than a story of engineers and astronauts, the moon landing—now celebrating its fiftieth anniversary—grew out of the dreams of science fiction writers, filmmakers, military geniuses, and rule-breaking scientists. They include • Science fiction author Arthur C. Clarke, whose writing inspired some of the key players in the Moon race. A scientific paper he wrote in his twenties led to the U.S. beating Russia in one area of space: communications satellites. • Wernher von Braun, the former Nazi military genius who oversaw Hitler's rocket weapons program. After working on ballistic missiles for the U.S. Army, he was recruited by NASA to manage the creation of the Saturn V moon rocket. • Astronaut Frank Borman, commander of the first mission to circumnavigate the Moon, whose powerful testimony before Congress in 1967 decisively saved the U.S. lunar program from being cancelled. • Poppy Northcutt, a young mathematician who was the first woman to work in Mission Control. Her media exposure as a unique presence in this all-male world allowed her the freedom to stand up for equal rights for women and minorities. • Edward Dwight, an African American astronaut candidate, recruited at the urging of the Kennedy White House to further the administration’s civil rights agenda—but not everyone welcomed his inclusion. Setting these key players in the political, social, and cultural climate of the time, and including captivating photographs throughout, Chasing the Moon focuses on the science and the history, but most important, the extraordinary individuals behind what was undoubtedly the greatest human achievement of the twentieth century.

Dino Hazard Tito Aureliano, 2020-01-16 If you like dinosaurs, adventure, and sci-fi, you'll love this time-travel tale written by a real-life dinosaur hunter! (Steve Brusatte, University of Edinburgh paleontologist and author of 'The Rise and Fall of the Dinosaurs') This takes you on an imaginative adventure, it introduces you to some of the incredible landscape, people and animals of Brazil, AND it takes you into the work of a paleontologist. (Jeanne Timmons, Gizmodo) An absurdly creative central idea. (Pirula, Darwin sem frescura) Intense action-packed storyline ... It's very rare to be able to relate to a book not only for its theme but also for where the story takes place. (Atila Iamarino, Nerdologia) In 'Dino Hazard: Hidden Reality', we follow the events portrayed in an old diary of a nineteenth-century lady. The chronicles narrate the time-travel adventure of paleontologist Giovanna Antunes to one of the most incredible periods on planet Earth. It all begins with an unusual discovery that leads a group of scientists to embark on a voyage full of dangers and dinosaurs. Transported to the Cretaceous in an incomprehensible way, they will fight for survival and seek to understand the whole thing. ('Today is book day!')

**Pop-up!** Duncan Birmingham,1997 There is a growing interest in the field of paper mechanics and this manual explains how they work and provides clear instructions for creating everything from the most elementary pop-up cards to highly sophisticated fold-away paper sculptures. The basic principles are simple and the book introduces these. It then shows how they can be developed and combined to produce a kaleidoscope of 3-D possibilities. Duncan Birmingham lectures at the University of West of England and this book is a distillation of his practical experience. It explains the factors which have to be considered when designing, as well as solutions to potential pitfalls. There are masses of ideas for interesting projects, all illustrated with lively and informative drawings.

**The Dilbit Disaster** Elizabeth McGowan,Lisa Song,David Hasemyer,2016-10-19 InsideClimate News won the 2013 Pulitzer Prize in national reporting for this four-part narrative and six follow-up reports into an oil spill most Americans have never heard of. More than 1 million gallons of oil spilled into the Kalamazoo River in July 2010, triggering the most expensive cleanup in U.S. history - more than 3/4 of a billion dollars -- and after almost two years the cleanup still isn't finished. Why not? Because the underground pipeline that ruptured was carrying diluted bitumen, or dilbit, the dirtiest, stickiest oil used today. It's the same kind of oil that the controversial Keystone XL pipeline could someday carry across the nation's largest drinking water aquifer. Written as a narrative, this page-turner takes an inside look at what happened to two families, a community, unprepared agencies and an inept company during an environmental disaster involving a new kind of oil few people know much about.
