Nightchaser Amanda Bouchet,2019-01-01 Fans of Firefly and Star Wars can't help but fall for this sexy new paranormal romance from the author of the USA Today bestselling fantasy, THE KINGMAKER CHRONICLES. The galaxy's most wanted captain must trust her life to a charming and mysterious rogue if she doesn't want to see her latest mission go up in smoke... Tess Bailey: the galaxy's Most Wanted. Captain Tess Bailey and her ragtag crew are on the run, pursued by a tyrant who'll take them dead or alive. Her best hope is a tall, dark, and much-too-appealing stranger, Shade Ganavan. The handsome charmer claims he can help, but his motivations are far from clear... Shade Ganavan: arrogance, charm...and that special roguish something that makes you want to scream. There's no denying their chemistry, but with the dreaded Dark Watch closing in, what Tess and Shade don't know about each other might get them killed...unless they can set aside their differences and learn to trust each other before it's too late. This is no average space opera. Everyone is raving about Amanda Bouchet's *Nightchaser*: Breathtakingly hot.—Booklist STARRED REVIEW Chock-full of intrigue, heroism, conflict, and sexual tension.—Kirkus STARRED REVIEW Out-of-this-world.—JENNIFER ESTEP, New York Times and USA Today bestselling author Believe me when I say you need to own this book and anything Amanda Bouchet writes forever.—Kate LeBeau, Anderson's Bookshop (Naperville, IL) Makes an early bid for one of the best titles of the year.—Entertainment Weekly

Outer Space Law Yanal Abul Failat,Anél Ferreira-Snyman,2017 The potential use of space for military purposes has, since the end of the Second World War, been intrinsically linked to the development of space technology and space flight. The political relevance of outer space continues to be recognised by nations, and in particular the strategic benefit of Earth observation from outer space remains an important national security tool. However, because of the dual-use potential of many space applications, the distinction between the military and non-military uses of space is becoming increasingly blurred. The consequent potential for conflict between nations in order to protect their space assets is alarmingly clear.The outer space arena has, however, evolved to increasingly include non-state entities, which are becoming more and more involved in outer space activities. These activities currently comprise the use of satellites for navigation purposes, the transportation of supplies to the International Space Station and the offering of tourist flights into outer space. Today in all space-faring countries, the space industry contributes to national GDP and supports the labour force. It also serves as a catalyst for technological advancement and productivity growth, and has become an integral part of the day-to-day lives of people all around the world.The involvement of private actors in outer space has, however, given rise to a number of legal issues, including questions pertaining to liability, insurance and property rights in space. The current outer space treaties are to a large degree outdated and unable to deal with legal issues arising out of the military and commercial use of outer space.Outer Space Law: Legal Policy and Practice is aimed at readers looking for a single title to understand the key issues relevant to the space sector, with an emphasis on the practical application of those issues. The book will be specifically relevant to legal practitioners, academics and state departments primarily working in the space arena, as well as to those in other related sectors such as IT and media, insurance and political science. Edited by Yanal Abul Failat, lawyer at the international law firm LXL LLP, and Professor Anél Ferreira-Snyman, a professor of law specialising in international space law at the University of South Africa, the book includes contributions by leading experts from space agencies, space venturers, lawyers, economists, insurers, academics and financiers.

Adam's Starling Gillian Perdue,2013-01-08 Adam's Starling tells the story of a nine year old boy who is finding life difficult. At home, no-one has any time for him. At school things are even worse - a gang of bullies has singled Adam out for punishment. Life is becoming increasingly difficult for Adam. But then a scruffy little starling comes into Adam's life. This is Adam's secret, his own special friend. But can Adam's defend his small friend against the bullies? Will he find the courage he has needed all along?

Burt Rutan's Race to Space Dan Linehan,2011-07-17 Years ago, Burt Rutan told a reporter for Popular Mechanics, "If we make a courageous decision like the goal and program we kicked off for Apollo in 1961, we will see our children or grandchildren in outposts on other planets." Legendary science-fiction writer Arthur C. Clark would later recall Rutan's quote in a piece he wrote about SpaceShipOne and comment, "Fortunately, we need not rely solely on governments for expanding humanity's presence beyond the Earth." Burt Rutan's Race to Space showcases Rutan's herculean efforts to do just that. Smithsonian's Air and Space Museum displays his most celebrated achievements, including SpaceShipOne, which won the coveted \$10 million Ansari X Prize for private spaceflight; Voyager, which hangs with SpaceShipOne in the Milestones of Flight gallery; the Virgin Atlantic GlobalFlyer; and the VariEze. His many aerospace innovations preceding his most recently conceived designs, SpaceShipTwo and WhiteKnightTwo, chronicle a progressive, step-by-step attempt to break barriers with engineering know-how and a wondrous imagination, all the while remaining on the forefront of the burgeoning private spaceflight industry. Rutan's X Prize triumph and subsequent spacecraft designs are not a beginning, nor an end, but are steps in Burt Rutan's continuing adventure to expand humanity's presence beyond the Earth and into space.

Beowulf ,2012-03-01 Finest heroic poem in Old English celebrates the exploits of Beowulf, a young nobleman of southern Sweden. Combines myth, Christian and pagan elements, and history into a powerful narrative. Genealogies.

Themes and Issues in Asian Cartooning John A. Lent,1999 Today, comic art is the favorite reading fare for millions of Asians, and is a government-sanctioned, value-added product, as in the case of Korean and Japanese animation. Yet not much is known about Asian cartooning. Themes and Issues in Asian Cartooning uses overviews and case studies by scholars to discuss Asian animation, humor magazines, gag cartoons, comic strips, and comic books. The first half of the book looks at contents and audiences of Malay humor magazines, cultural labor in Korean animation, the reception of Aladdin in Islamic Southeast Asia, and a Singaporean comic book as a reflection of that society's personality. Four other chapters treat gender and Asian comics, concentrating on Japanese anime and manga and Indian comic books.

Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic Matthias Otto,2009 The work Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic deals with the topic space tourism, especially with the so-called suborbital space tourism a current trend of private businesses that offer commercial flights up to the edge of space. This edge of space, named Karman Line due to its founder Theodore von Karman, is defined by the FAI (Federation Aeronautique Internationale) to be at an altitude of approximately 100 km. The author conducts a detailed feasibility study about this phenomenon at the example of the Anglo-American business Virgin Galactic, and sets up future projections based on the results of this study. After a general introduction into the topic (history, motives for going to space, stages of space tourism etc.) the author addresses the focal points of the feasibility study. In detail, this includes an analysis of the Virgin Galactic approach and its most promising competitors (Space Adventures, Benson Space Company, Space Access, Incredible Adventures, Rocketplane Limited, Starchaser Industries, and Blue Origin), as well as an analysis of the several spaceships and its manufacturers. Subsequently, the regulatory framework is illustrated at the example of the FAA (Federal Aviation Administration). In the end, results from market research projects are evaluated in order to explain the demand for suborbital flights. The study comes to the conclusion that the industry is still in an early pioneer phase, but nevertheless shows an enormous potential to grow.

XCOR, Developing the Next Generation Spaceplane Erik Seedhouse,2016-03-29 Employing the same informational approach Erik Seedhouse used in SpaceX and Bigelow Aerospace, this new book familiarizes space enthusiasts with the company XCOR Aerospace and examines the design of the two-seater Lynx. The new spaceplane's low weight and high octane fuel confer important advantages,

such as direct runway launches and the ability to fly several times per day. Over the last 15 years, XCOR has developed and built 13 different rocket engines, built and flown two manned rocket-powered aircraft and has accumulated over 4,000 engine firings and nearly 500 minutes of run time on their engines. This book serves as a go-to reference guide for suborbital scientists and those seeking to learn how one company has found success. Additionally, it describes the medical and training requirements for those flying on board the Lynx and the related critical roles of the astronaut trainers and a new breed of commercial space pilots. The end result is a thorough chronicle of the development of rocket propulsion, avionics, simulator and ground support operations being put into play by XCOR with the Lynx.

Behind His Eyes Consequences Aleatha Romig, 2014-01-14 What was Tony thinking? A Consequences reading companion for Consequences. From New York Times and USA Today bestselling author Aleatha Romig comes the much-anticipated first companion to the suspenseful thriller about secrets and deception, passion and love, and choices and consequences. What was Tony thinking? Control? Acquisition? Domination? Love? BEHIND HIS EYES CONSEQUENCES explores significant scenes as well as behind-the-scenes moments from the first book of the Consequences series. Not a total re-write, this companion explores the mind of the man who thought he set the rules and delivered the consequences. From the beginning. Anthony Rawlings has the perfect world: money, influence, and power. Everything in his life is and has always been planned, executed, and predicted...until Claire. How long can he deny what is right before him? Experience the rare opportunity to see this esteemed man's world change, from behind his eyes. It is always darkest before the light. Through significant scenes, experience the dark journey into the mind of the man who believes that he controls everything yet controls nothing. Share his thoughts as glitches are overcome and accidents are survived. For the avid reader of the Consequences series, it is recommended that this companion be read after Consequences, Truth, Convicted, Revealed and Beyond the Consequences for more insight into the man who: "Once upon a time, signed a napkin that he knew was a contract. As an esteemed businessman, he forgot one very important rule. He forgot to read the fine print. It wasn't an acquisition to own another person as he'd previously assumed. It was an agreement to acquire a soul." —Aleatha Romig, CONVICTED

It is written by leading specialists and covers a wide spectrum of topics including space history and technology, the environmental, social, and legal aspects of the development of a future space tourism industry, and space tourism marketing.

The Korean Wave Youna Kim, 2013-11-12 Since the late 1990s South Korea has emerged as a new center for the production of transnational popular culture - the first instance of a major global circulation of Korean popular culture in history. Why popular (or not)? Why now? What does it mean socially, culturally and politically in a global context? This edited collection considers the Korean Wave in a global digital age and addresses the social, cultural and political implications in their complexity and paradox within the contexts of global inequalities and uneven power structures. The emerging consequences at multiple levels - both macro structures and micro processes that influence media production, distribution, representation and consumption - deserve to be analyzed and explored fully in an increasingly global media environment. This book argues for the Korean Wave's double capacity in the creation of new and complex spaces of identity that are both enabling and disabling cultural diversity in a digital cosmopolitan world. The Korean Wave combines theoretical perspectives with grounded case studies in an up-to-date and accessible volume ideal for both undergraduate and postgraduate students of Media and Communications, Cultural Studies, Korean Studies and Asian Studies.

Another Art Book Jefferson Hack, 2010 The final in a series of three collectable books rediscovering the archives of AnOther Magazine, one of the world's most influential fashion magazines. Another Art Book looks back on the ambitious artistic projects commissioned exclusively for the magazine's pages since 2001, bringing together some of the most iconic names in modern art including Jake & Dinos Chapman, Yayoi Kusama, Hans Peter Feldmann, Yoshitomo Nara, Ernesto Caivano, Keith Tyson, Urs Fischer and Damien Hirst. Opening an early copy of AnOther Magazine, readers were immediately confronted with ten pages filled with nothing but art - be it Jake and Dinos Chapman's twisted vision of the Holy Land Experience, a hypnotic sea of dots penned by Yayoi Kusama, or Damien Hirst's bloody skulls and severed heads shot by David Bailey (deemed so shocking the pages were sealed with glue). AnOther Magazine thereby subverted the expectations of readers accustomed to finding a bank of advertising at the front of magazines. Over the years the format has evolved, but AnOther Magazine's unique connection with the art world continues. In 2007 Dress Art paired fifteen artists including Jeff Koons, Annie Morris and John Isaacs with fifteen designers from Stella McCartney to Dolce & Gabbana, and challenged them to create fifteen unique dresses. The results brought together the fields of fashion and art as never before - worlds which have since become inextricably linked.
