Second Temple Songs of Zion Ruth Henderson,2014-07-28 Although in Second Temple literature we find a variety of songs concerned with the future of Jerusalem, little attempt has been made to analyse these comparatively as a generic group. In this study, three songs have been selected on the basis of their similarity in style, ideas and their apparent original composition in Hebrew. The texts have been subjected to a literary analysis both individually and then comparatively.

Material Forming Processes Bouchaib Radi,Abdelkhalak El Hami,2016-09-16 Manufacturing industries strive to improve the quality and reliability of their products, while simultaneously reducing production costs. To do this, modernized work tools must be produced; this will enable a reduction in the duration of the product development cycle, optimization of product development procedures, and ultimately improvement in the productivity of design and manufacturing phases. Numerical simulations of forming processes are used to this end, and in this book various methods and models for forming processes (including stamping, hydroforming and additive manufacturing) are presented.

The theoretical and numerical advances of these processes involving large deformation mechanics on the basis of large transformations are explored, in addition to the various techniques for optimization and calculation of reliability. The advances and techniques within this book will be of interest to professional engineers in the automotive, aerospace, defence and other industries, as well as graduates and undergraduates in these fields.

ALIVE Manuel Kretzer, Ludger Hovestadt, 2014-09-23 In times where the very concept of 'nature' is questioned not only in its philosophical dimension, but in the core of its biological materiality, we need to reconsider the interrelations between architecture and nature. This not only applies to strategies on environmental responsibility but equally on anticipatory human behavior and cultural or demographic variety. To address these challenges this book proposes to embrace the unknown and cultivate the architectural discipline towards an integrated and cross-disciplinary practice. It unravels compelling innovative and forward-thinking design narratives by leading international practitioners and researchers who investigate novel associations between architecture, nature and humanity for a future, alive architecture. Structured around the three closely cross-linked core themes "bioinspiration", "materiability", and "intelligence" the book engages with the starting point of an emerging new design field, where the symbiosis of physics, biology, computing and design promises the redefinition of what we call architecture today.

The Creation of Gods and Religions Miguel Rosado, 2021-08-17 Are you worshipping the proper God? Has your God been canceled? How did you choose your religion—and do you really need one? If you've ever asked yourself these questions, now you can take a journey to explore their answers. The Creation of Gods and Religions offers a brief and comprehensive narrative of the development of religions and the concept of God so that you can better analyze your beliefs. Religious practices and the concept of God have changed over time. The history of those changes is not often a topic of discussion at places of worship, but it is fundamental knowledge that can help you make a reasonable decision about what to believe. In his own search to find answers, author Miguel Rosado realized that the information available was aimed at higher-level readers and could at times be deceiving. Now he seeks to assist others in navigating the sea of religions. Straightforward and concise, this short guide examines how the concept of God and religions developed, how it has changed over time, and the impact it had on society.
