Hex Jenni Fagan, 2022-03-03 A powerfully poignant tale of one of the most turbulent moments in Scotland's history: the North Berwick Witch Trials. IT'S THE 4TH OF DECEMBER 1591. On this, the last night of her life, in a prison cell several floors below Edinburgh's High Street, convicted witch Geillis Duncan receives a mysterious visitor – Iris, who says she comes from a future where women are still persecuted for who they are and what they believe. As the hours pass and dawn approaches, Geillis recounts the circumstances of her arrest, brutal torture, confession and trial, while Iris offers support, solace – and the tantalising prospect of escape. Hex is a visceral depiction of what happens when a society is consumed by fear and superstition, exploring how the terrible force of a king's violent crusade against ordinary women can still be felt, right up to the present day. 'This series has already produced two works of note and distinction. It raises the question – if a country cannot re-tell its history, will it be stuck forever in aspic and condemned to be nothing more than a shortbread tin illustration? Hex and Rizzio are showing the way towards a reckoning, and about time too' – Stuart Kelly, Scotland on Sunday

Star Formation Andrei M. Bykov, Corinne Charbonnel, Patrick Hennebelle, Alexandre Marcowith, Georges Meynet, Maurizio Falanga, Rudolf von Steiger, 2020-10-13 The review papers in this volume provide an in-depth examination of complex astrophysical phenomena of star formation via multi-wavelength observations and modeling. Among the fundamental issues discussed in the book are: The role of gravity and magnetized turbulence in the formation and evolution of molecular clouds The stellar feedback (supernovae, HII regions, winds, cosmic rays) in regulating star formation The origin of the stellar initial mass function and its universality across various environments Jets, magnetic fields and high energy particles in stellar clusters The origin of the first stars and black holes The goal of these papers is to review the major processes governing star formation and to investigate how they are interlinked. In doing so, they provide an in-depth look at the tremendous theoretical and observational progress that has been made in the recent past and also outline future perspectives. Previously published in Space Science Reviews in the Topical Collection Star Formation”

Blood Salt Spring Hannah Lavery, 2022-03-03 From Hannah Lavery, Edinburgh's Makar. 'Speaks to and for the conflicted conscience of Scotland ... with a power and authenticity like perhaps no other' – The Scotsman In a moment that is demanding you to constantly choose your side, how do you find your humanity, your own voice, when you are being pushed to find safety in numbers? Blood Salt Spring is a meditation on where we are – exploring ideas of nation, race and belonging. Much of the collection was written in lockdown and speaks to that moment, the isolation and the traumas of 2020 but it also looks to find some meaning and makes an attempt to heal the pain and vulnerabilities that were picked and cut open again in the recent cultural shifts and political wars. Organised into three sections this book takes the reader on a journey from the old inherited wounds, the trauma of tearing open again these chasms within recent discourses and events, to a hopeful spring, where pain and trauma can be laid down and a new future can be imagined. In this collection, the poet has sought to heal these salted wounds, and move out of winter and into spring – into hope. The National Theatre of Scotland has launched a new digital visual album, Blood, Salt, Spring - a digital accompaniment to Hannah Lavery's collection. You can view the visual album [here](#) .

Memo for Spring Liz Lochhead, 2022-03-17 This is an exclusive limited edition with a preface by Liz Lochhead and a new introduction by Ali Smith. Liz Lochhead is one of the leading poets writing in Britain today. This, her debut collection, published in 1972, was a landmark publication. Writing at a time when the landscape of Scottish poetry was male dominated, hers was a new voice, tackling subjects that resonated with readers – as it still does. Her poetry paved the way, and inspired, countless new voices including Ali Smith, Kathleen Jamie, Jackie Kay and Carol Ann Duffy. Still writing and performing today, fifty years on from her first book of poetry, Liz Lochhead has been awarded the Queen's Gold Medal for Poetry and was Scotland's second modern Makar, succeeding Edwin Morgan. Memo for Spring is accessible, vital and always as honest as it is hopeful. Driving through this collection are themes of pain, acceptance, loss and triumph.

The Persian Expedition Xenophon, 1975-06-26 In The Persian Expedition, Xenophon, a young Athenian noble who sought his destiny abroad, provides an enthralling eyewitness account of the attempt by a Greek mercenary army - the Ten Thousand - to help Prince Cyrus overthrow his brother and take the Persian throne. When the Greeks were then betrayed by their Persian employers, they were forced to march home through hundreds of miles of difficult terrain - adrift in a hostile country and under constant attack from the unforgiving Persians and warlike tribes. In this outstanding description of endurance and individual bravery, Xenophon, one of those chosen to lead the retreating army, provides a vivid narrative of the campaign and its aftermath, and his account remains one of the best pictures we have of Greeks confronting a 'barbarian' world.

Organic Matter in Space (IAU S251) International Astronomical Union. Symposium, 2008 Our knowledge of the origin, evolution, nature, and distribution of organic matter in space has undergone a revolution in recent years. Insights into various aspects of this material can be found using a variety of different technical approaches. These range from telescopic measurements by

observational astronomers over a wide range of wavelengths, to laboratory experiments and simulations by chemists, physicists, and spectroscopists, and analyses of actual extraterrestrial materials. IAU Symposium 251 brought together expertise of scientists from different disciplines, including observational astronomers, laboratory spectroscopists, and solar system scientists, to provide a synthesis of our current understanding of these organics and to identify areas in which additional work and new ideas are required to further our understanding.

Little Eyes Samanta Schweblin,2021-05-04 LONGLISTED FOR THE 2020 MAN BOOKER INTERNATIONAL PRIZE A NEW YORK TIMES NOTABLE BOOK OF THE YEAR Her most unsettling work yet — and her most realistic. --New York Times Named a Best Book of the Year by The New York Times, O, The Oprah Magazine, NPR, Vulture, Bustle, Refinery29, and Thrillist A visionary novel about our interconnected present, about the collision of horror and humanity, from a master of the spine-tingling tale. They've infiltrated homes in Hong Kong, shops in Vancouver, the streets of in Sierra Leone, town squares in Oaxaca, schools in Tel Aviv, bedrooms in Indiana. They're everywhere. They're here. They're us. They're not pets, or ghosts, or robots. They're real people, but how can a person living in Berlin walk freely through the living room of someone in Sydney? How can someone in Bangkok have breakfast with your children in Buenos Aires, without your knowing? Especially when these people are completely anonymous, unknown, unfindable. The characters in Samanta Schweblin's brilliant new novel, *Little Eyes*, reveal the beauty of connection between far-flung souls—but yet they also expose the ugly side of our increasingly linked world. Trusting strangers can lead to unexpected love, playful encounters, and marvelous adventure, but what happens when it can also pave the way for unimaginable terror? This is a story that is already happening; it's familiar and unsettling because it's our present and we're living it, we just don't know it yet. In this prophecy of a story, Schweblin creates a dark and complex world that's somehow so sensible, so recognizable, that once it's entered, no one can ever leave.

Random Heterogeneous Materials Salvatore Torquato,2013-04-17 This accessible text presents a unified approach of treating the microstructure and effective properties of heterogeneous media. Part I deals with the quantitative characterization of the microstructure of heterogeneous via theoretical methods; Part II treats a wide variety of effective properties of heterogeneous materials and how they are linked to the microstructure, accomplished by using rigorous methods.

Greek Myths Charlotte Higgins,2022-01-11 A brilliantly original, landmark retelling of Greek myths, recounted as if they were actual scenes being woven into textiles by the women who feature prominently in them—including Athena, Helen, Circe and Penelope “Greek myths were full of powerful witches, unpredictable gods and sword-wielding slayers. They were also extreme: about families who turn murderously on each other; impossible tasks set by cruel kings; love that goes wrong; wars and journeys and terrible loss. There was magic, there was shape-shifting, there were monsters, there were descents to the land of the dead. Humans and immortals inhabited the same world, which was sometimes perilous, sometimes exciting. “The stories were obviously fantastical. All the same, brothers really do war with each other. People tell the truth but aren’t believed. Wars destroy the innocent. Lovers are parted. Parents endure the grief of losing children. Women suffer violence at the hands of men. The cleverest of people can be blind to what is really going on. The law of the land can contradict what you know to be just. Mysterious diseases devastate cities. Floods and fire tear lives apart. “For the Greeks, the word *muthos* simply meant a traditional tale. In the twenty-first century, we have long left behind the political and religious framework in which these stories first circulated—but their power endures. Greek myths remain true for us because they excavate the very extremes of human experience: sudden, inexplicable catastrophe; radical reversals of fortune; and seemingly arbitrary events that transform lives. They deal, in short, in the hard, basic facts of the human condition.” —from the Introduction

The High House Jessie Greengrass,2022-01-04 Shortlisted for the 2021 Costa Novel Award In this powerful, highly anticipated novel from an award-winning author, four people attempt to make a home in the midst of environmental disaster. Perched on a sloping hill, set away from a small town by the sea, the High House has a tide pool and a mill, a vegetable garden, and, most importantly, a barn full of supplies. Caro, Pauly, Sally, and Grandy are safe, so far, from the rising water that threatens to destroy the town and that has, perhaps, already destroyed everything else. But for how long? Caro and her younger half-brother, Pauly, arrive at the High House after her father and stepmother fall victim to a faraway climate disaster—but not before they call and urge Caro to leave London. In their new home, a converted summer house cared for by Grandy and his granddaughter, Sally, the two pairs learn to live together. Yet there are limits to their safety, limits to the supplies, limits to what Grandy—the former village caretaker, a man who knows how to do everything—can teach them as his health fails. A searing novel that takes on parenthood, sacrifice, love, and survival under the threat of extinction, *The High House* is a stunning, emotionally precise novel about what can be salvaged at the end of the world.

Stones of the New Consciousness Robert Simmons,2021-01-12 • Details the spiritual, healing, and energetic qualities of stones such as Moldavite, Nuummite, Circle Stones, Nirvana Quartz from the Himalayas, and high-vibrational Natrolite from the emerald mines of Russia • Features color photos of exceptional examples of each of the stones • Includes practices for deepening one’s awareness of the stones’ gifts--from expanding consciousness, to healing, to awakening the Light Body, to fulfilling one’s personal and collective destiny In *Stones of the New Consciousness* Robert Simmons examines the 62 most important stones to help accelerate and enhance conscious evolution and spiritual awakening. Each entry is illustrated with color photos of exceptional examples. The stones include Moldavite, the extraterrestrial amorphous crystal; Nuummite, the oldest gemstone on Earth; and Circle Stones, the highly energetic Flint found in crop circle formations. Other featured rarities include Nirvana Quartz from the Himalayas and high-vibrational Natrolite from the emerald mines of Russia. Simmons begins with a new approach to meditation with stones and to the possibility of conscious relationship with the spiritual beings who express themselves in our world as crystals and minerals. He includes historical and mythological references for each stone, positing that the fabled Stone of the Holy Grail and the Philosopher’s Stone of the alchemists may have physical counterparts among the minerals discussed. Simmons presents practices for deepening one’s awareness of the stones’ gifts--from expanding one’s consciousness, to healing, to awakening the Light Body, to fulfilling one’s personal and collective destiny. While emphasizing direct contact with stones, the book also explores crystal energy tools, energy environments, and applications such as stone elixirs and essences that can aid anyone on a spiritual path.
