Le Corbusier's Maison Curutchet Alejandro Lapunzina,1997 One of his very few built projects in the Americas, Maison Curutchet is a fascinating representation of Le Corbusier's stylistic transitional period, bridging his late 1920s purism and the maturity of his later work in India. Like Casa Malaparte, this book offers an in-depth analysis of a single building through original documents, drawings, and photographs.

Le Corbusier: The Built Work Richard Pare,Jean-Louis Cohen,2018-11-27 The most thoroughgoing survey of nearly all of Le Corbusier's extant projects, beautifully photographed and authoritatively detailed. Le Corbusier is widely acknowledged as the most influential architect of the twentieth century. As extensively researched and documented as his works are, however, they have never been exhaustively surveyed in photographs until now. Photographer Richard Pare has crossed the globe for years to document the extant works of Le Corbusier--from his first villas in Switzerland to his mid-career works in his role as the first global architect in locations as far-flung as Argentina and Russia, and his late works, including his sole North American project, at Harvard University, and an extensive civic plan for Chandigarh, India. Le Corbusier: The Built Work provides numerous views of each project to bring a fuller understanding of the architect's command of space, sometimes surprising use of materials and color, and the almost ineffable qualities that only result from a commanding synthesis of all aspects of design. With an authoritative text by scholar and curator Jean-Louis Cohen, Le Corbusier: The Built Work is a groundbreaking opportunity to appreciate the master's work anew.

Digital Modernism Heritage Lexicon Cristiana Bartolomei,Alfonso Ippolito,Simone Helena Tanoue Vizioli,2021-08-11 The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism

Le Corbusier Redrawn Steven Park,2012-11-07 Le Corbusier (1887-1965) was the most significant architect of the twentieth century. Every architecture student examines the Swiss master's work. Yet, all too frequently, they rely on reproductions of faded drawings of uneven size and quality. Le Corbusier Redrawn presents the only collection of consistently rendered original drawings (at 1:200 scale) of all twenty-six of Le Corbusier's residential works. Using the original drawings from the Le Corbusier Foundation's digital archives, architect Steven Park has beautifully redrawn 130 perspectival sections, as well as plans, sections, and elevations of exterior forms and interior spaces. These remarkable new drawings-which combine the conceptual clarity of the section with the spatial qualities of the perspective-not only provide information about the buildings, they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works.

1001 Buildings You Must See Before You Die Mark Irving,2007 1001 Buildings You Must See Before You Die is a visual testament to the beauty, grace, and fortitude of the world's greatest architectural achievements. Beginning in the ancient and Near East, the book explores middle age Byzantine and Gothic examples such as Notre Dame Cathedral, Paris, goes on to St Paul's Cathedral, London and continues through the Chrysler Building, New York City, with its art deco metal pinnacle, to splendid contemporary innovations such as Norman Foster's Reichstag parliament building, Berlin and Frank Gehry's Walt Disney Concert Hall, Los Angeles.The book is not only concerned with size--it also includes some of the world's most remarkable domestic buildings, such as the Mongolian yurt and houses of the American pioneers, as well as railway buildings, chapels, casinos, concert halls, gentlemen's clubs, and museums, cherished often for the way they represent and capture a particular moment in history in their details and atmosphere. 1001 Buildings You Must See Before You Die is the complete companion to the outstanding architecture of the world. A fascinating mixture of familiar landmarks and little-known gems.

The Double House Elizabeth Dejeans,1924

Towards a New Architecture Le Corbusier,2013-04-09 Pioneering manifesto by founder of International School. Technical and aesthetic theories, views of industry, economics, relation of form to function, mass-production split, and much more. Profusely illustrated.

Women Architects in the Modern Movement Carmen Espegel,2017-12-22 Heroines of Space looks at four groundbreaking women architects: Eileen Gray, Lilly Reich, Margarethe Schütte-Lihotzky, and Charlotte Perriand. You'll see the parts they played in the history of modern architecture and get a clearer view of the recent past. The book explains the social and historical setting behind their coming into being and includes research on the factors around their roles as space makers to show you how they practiced architecture despite pressure not to. New in English, the Spanish edition won the 2006 Milka Blinakov Prize granted by the International Archive of Women in Architecture. Includes 150 black and white images and bibliographies for each architect.

Le Corbusier Graham Livesey,Antony Moulis,2017 This four-volume collection of writings on the career and legacy of Le Corbusier traces the various periods of his life from his early training to his final projects. The writings, by Le Corbusier and leading scholars, also explore important themes and specific buildings. The final volume includes articles, some critical of his ideas, which examine his legacy and impact.

Not Always to Plan Colin Bisset,2013-04-01 Death and marriage, money and love: this family is about to find out what happens when their lives collide with the unexpected. The Dorman family lives a humdrum existence in a surfing suburb of Sydney until they are rocked by upheaval. Change is inevitable, but is it welcome? All that is certain is that each member of the family will have to confront new truths about themselves, some less comfortable than others. Set against a backdrop of Sydney's stunning beaches, the architecture of Europe and the enchanting beauty of southern India, this warmly humorous book tackles what happens when life doesn't go exactly to plan.

The Modulor and Modulor 2 Le Corbusier,2004-06-02 Le Corbusier's Modulor—a fundamental work in the history of architecture—as a beautiful facsimile edition.

The Lost Vanguard Richard Pare,Jean-Louis Cohen,2007 This book includes seventy-three structures, starting with the Shabolovka Radio Tower in Moscow and concluding with the Lenin Mausoleum. In between are buildings from all over Moscow (where the greatest concentration of modernist buildings still remains), St. Petersburg, Ivanovo, Ekaterinburg, Kiev, Kharkov, Zaporozhe, Nizhi Novgorod, Sochi, and Baku. The buildings range from grand projects such as Gasprom in Kharkov to a modest bus shelter in Sochi, a rare survivor by an unknown architect. In an essay, architectural historian Jean-Louis Cohen surveys the history of the period, providing a context for the emergence of this startling new architecture in parallel to contemporary experiments in Europe.--BOOK JACKET.

The Geometry of Love Margaret Visser,2015-06-23 A “delightful” tour of Rome’s St. Agnes Outside the Walls, examining the stories, rituals, and architecture of this seventeen-hundred-year-old building (The Christian Science Monitor). In The Geometry of Love, acclaimed author Margaret Visser, the preeminent “anthropologist of everyday life,” takes on the living history of the ancient church of St. Agnes. Examining every facet of the building, from windows to catacombs, Visser takes readers on a mesmerizing tour of the old church, covering its social, political, religious, and architectural history. In so doing, she illuminates not only the church’s evolution but also its religious legacy in our modern lives. Written as an antidote to the usual dry and traditional studies of European churches, The Geometry of Love is infused with Visser’s unmatched warmth and wit, celebrating the remarkable ways that one building can reveal so much about our history and ourselves.

Women and the Making of the Modern House Alice T. Friedman,2006-01-01 Investigates how women patrons of architecture were essential catalysts for innovation in domestic architectural design. This book explores the challenges that unconventional attitudes and ways of life presented to architectural thinking, and to the architects themselves.

Le Corbusier Jean-Louis Cohen,2013 This volume examines Le Corbusier's relationship with the topographies of five continents, in essays by thirty of the foremost scholars of his work and with contemporary photographs by Richard Pare.

Urban Planning in the Third World Madhu Sarin,2019-11-11 Originally published in 1982 Urban Planning in the Third World is concerned with some of the critical issues underlying urban planning in the Third World. Taking the specific case of Chandigarh, planned or rather ‘designed’ by Le Corbusier as the new capital of Punjab following Partition, the author describes the development of the city, showing how concepts inherent in the master plan and the policies pursued in its implementation not merely ignored, but totally excluded a major section of the population from ‘legal’ housing and employment. The book sets a distinct theoretical framework, examining the Indian context at the time of Independence, the Western origins of the planning concepts applied in the city, and the process by which Le Corbusier finalized its master plan in a matter of days. The book also examines the social forces determining the temporary resolution of inherent conflicts in the plan and examines the growth of non-plan settlements in the city and the impact of the plan on the lives of the settlement residents.

Towards a Political Economy of Degrowth Ekaterina Chertkovskaya,Alexander Paulsson,Stefania Barca,2019-10-04 Bringing degrowth into dialogue with critical social theories, covering previously unexplored geographical contexts and discussing some of the most contested concepts in degrowth, the book hints at informed paths towards socio-ecological transformation.

A Study of the Decorative Art Movement in Germany Le Corbusier,2008 The present publication, designed to accompany the exhibition Le Corbusier - The Art of Architecture, also coincides with the centenary of the foundation of the Deutsche Werkbund.--Foreword.
