Flying Boats & Seaplanes Stéphane Nicolaou,1998 Beginning with races that were staged at elegant French resorts in the early part of the century, flying boats and seaplanes have played an integral part in aviation history. World War I spurred the development of these machines, and by the 1930s, flying boats and seaplanes had become pioneers in transcontinental flight. This photo-filled history recalls the role of flying boats and seaplanes in civil and military aviation history, and the enthusiasm of the engineers and pilots who are associated with their development. In addition to the golden years of hydraviation prior to World War II, author Nicolaou examines the decline of the seaplane, and its subsequent renaissance in nations that are today considered seaplane paradises. The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe.

The Schneider Trophy Air Races Jerry Murland,2021-09-15 The history of the Schneider Trophy is the history of aircraft development. When Jacques Schneider devised and inaugurated the Coupe d'Aviation Maritime race for seaplanes in 1913, no-one could have predicted the profound effect the Series would have on aircraft design and aeronautical development, not to mention world history. Howard Pixton's 1914 victory in a Sopwith Tabloid biplane surprisingly surpassed the performance of monoplanes and other manufacturers turned back to biplanes. During The Great War aerial combat was almost entirely conducted by biplanes, with their low landing speeds, rapid climb rates and maneuverability. Post-war the Races resumed in 1920. The American Curtiss racing aircraft set the pattern for the 1920s, making way for Harold Mitchell's Supermarines in the 1930's. Having won the 1927 race at Venice Mitchell developed his ground-breaking aircraft into the iconic Spitfire powered by the Rolls-Royce Merlin engine. This new generation of British fighter aircraft were to play a decisive role in defeating the Luftwaffe and thwarting the Nazis' invasion plans. This is a fascinating account of the air race series that had a huge influence on the development of flight.

French Aeroplanes Before the Great War Leonard E. Opdycke,1999 French Aeroplanes Before the Great War is a catalog of the aeroplanes of the nearly 700 French builders who worked before the onset of World War I. Most of these aeroplanes flew some did not some were never even finished but all of them reflect the extraordinary vitality and sense of optimism that powered the aeronautical world before the future of the aeroplane began to become clearer in wartime. If the Wrights had not flown in 1903, one of the early French builders would very quickly have won the laurels for the first flight. Some of the machines appear in these pages probably for the first time in print; others are rarely seen. This collection serves as a kind of super Exposition Internationale de Locomotion Aérienne; readers are invited to enter the Grand Palais, as they might have in 1908 or 1909, to enjoy these marvelous aircraft.

Howard Pixton Stella Pixton,2014-07-02 This book is a truly remarkable account that captures the atmosphere, thrills and danger of the pioneering days of aviation. Howard Pixton was flying for A V Roe at Brooklands in 1910 when S F Cody at Laffan's Plain tried to persuade him to join him. But in 1911 he test flew A V Roe's 'tractor biplane, the forerunner of the 504. By now acknowledged as the first professional test pilot, he left A V to join Bristols and for two years demonstrated new models to dignitaries across Europe.??In 1913 he joined Tommy Sopwith and in 1914 he became the first Briton in a British plane to win an international race, the coveted Schneider Trophy. This gave Britain air supremacy and Howard was feted as the finest pilot in the World. Sopwith's Tabloid aircraft developed into the 'Pup', and then into the 'Camel'. Throughout The Great War Pixton test flew many of the rapid evolving designs.??For a biography of an early aviation pioneer of the top rank, this book cannot be bettered.

The Form of News Kevin G. Barnhurst,John Nerone,2002-04-01 This book takes a fresh look at the role of the newspaper in United States civic culture. Unlike other histories which focus only on the content of newspapers, this book digs deeper into ways of writing, systems of organizing content, and genres of presentation, including typography and pictures. The authors examine how these elements have combined to give newspapers a distinctive look at every historical moment, from the colonial to the digital eras. They reveal how the changing form of news reflects such major social forces as the rise of mass politics, the industrial revolution, the growth of the market economy, the course of modernism, and the emergence of the Internet. Whether serving as town meeting, court of opinion, marketplace, social map, or catalog of diversions, news forms are also shown to embody cultural authority, allowing readers to see and relate to the world from a particular perspective. Including over 70 illustrations, the book explores such compelling themes as the role of news in a democratic society, the relationship between news and visual culture, and the ways newspapers have shaped the meaning of citizenship. Piece of Cake Derek Robinson,2013-11-05 From the Phoney War of 1939 to the Battle of Britain in 1940, the pilots of Hornet Squadron learn their lessons the hard way. Hi-jinks are all very well on the ground, but once in a Hurricane's cockpit, the best killers keep their wits close. Newly promoted Commanding Officer Fanny Barton has a job on to whip the Hornets into shape before they face the Luftwaffe's seasoned pilots. And sometimes Fighter Command, with its obsolete tactics and stiff doctrines, is the real menace. As with all Robinson's novels, the raw dialogue, rich black humor and brilliantly rendered, adrenaline-packed dogfights bring the Battle of Britain, and the brave few who fought it, to life.
